**TITLE** Teacher Corps: A Collection of Abstracts. A Program to Improve Educational Personnel Development and to Strengthen Educational Opportunities in Low-Income Schools. (1965-1982).

**INSTITUTION** Department of Education, Washington, D.C. Teacher Corps.

**PUB DATE** May 82

**NOTE** 432p.

**EDRS PRICE** MF01/PC18 Plus Postage.

**DESCRIPTORS** Annotated Bibliographies; Disadvantaged Schools; \*Educational Practices; \*Educational Research; Elementary Secondary Education; Federal Programs; \*Instructional Innovation; Research and Development Centers; \*Staff Development; \*Teacher Education

**IDENTIFIERS** \*Teacher Corps

**ABSTRACT**

Abstracts of documents published by Teacher Corps projects and of documents concerning Teacher Corps practices and procedures were culled from the ERIC database for this computer-generated bibliography. It lists, alphabetically by title, 637 documents announced in Resources in Education (RIE) between 1965 and 1982. Information given for each document includes: (1) ERIC accession number; (2) title; (3) author; (4) institutional and sponsoring agencies; (5) publication date and pagination; (6) document availability information; (7) type of document; (8) date of appearance in RIE; (9) geographic source; and (10) an abstract of the document's contents. The bibliography contains conference papers, research reports, project descriptions, position papers, reference works, curriculum guides, teacher and administrator guides, and test and evaluation instruments. ## PREFACE

Teacher Corps, after sixteen years of existence, is being terminated with its inclusion into block grants to the states (Reconciliation Act of 1981). Although the Teacher Corps projects funded in 1978 and 1979 were not able to complete five years of operation; practices, products, and processes designed to strengthen the educational opportunities available to children in areas having concentrations of low-income families were developed.

Initially, the program focused much of its effort on the preservice and inservice training of classroom teachers; in 1978 the mission was expanded to include all educational personnel. Cooperating universities, local education agencies, and elected representatives from the community managed the projects.

This collection of abstracts was compiled to provide educators, researchers, and all other interested persons with a panoramic view of the Teacher Corps program as reflected in materials submitted to ERIC-Educational Resources Information Center - in the period between 1965-1982.

It is hoped that this chronicle of achievement will serve to extend the program's contribution into the future.

Document Type: PROJECT DESCRIPTION (141)

Geographic Source: U.S.; Pennsylvania

Journal Announcement: RIESEP80

The purpose of this document is to explore some strategies which may be helpful to new projects during their planning and implementation years. Each chapter of the document is composed of a separate project description. Topics discussed in this paper include: 1) the adaptation of educational research to improve elementary reading comprehension; 2) the development of a community support program for students involved in a community, industrial, and school system-based career education programs; 3) the research base for precision teaching techniques; 4) the development and implementation of a program combining the resources of local elementary school teachers and the surrounding community in order to meet student needs; and, 5) indepth discussion of the attempts of a rural school to focus on the delivery and improvement of services to its exceptional child population. The authors of the document stress that none of the programs described have been subjected to formal validation. (Authors/LH)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEJAN78

This report represents an in-depth analysis of one institution of higher education's response to a New York State Department of Education mandate on the establishment of performance based teacher education (PBTE) programs, and it focuses on factors involved in the development of a PBTE program viewed from the perspective of intra- and inter-organizational conflict. The methodology employed was

interviews and the study of documents available from the institution. The questions, which served to organize the information dealt with the acts of the participants, the activities engaged in by groups, meanings attributed to the acts and actions, level of involvement of participants, relationship of individuals and groups, and the setting in the development of a CBTE program. Most of the conclusions of the study dealt with the strong impact of mandated change and its effect in generating conflict. The second area from which conclusions were drawn was in regard to the distribution and exercise of power. This study points up examples of the abuse, misuse, and misconception of power. The importance of the case study lies in its implications for educational leaders who seek to gain insight into some of the processes involved in organizational change. (MJB)

Document Type: DICTIONARY (134)

Journal Announcement: RIEMAR75

This catalog of concepts in the pedagogical domain of teacher education organizes the critical concepts and provides definitions, indicators, and illustrations of the concepts. Chapter 1 presents a rationale for the selection of concepts in teacher education and discusses pedagogical domain, interactive teaching, the format of concepts in this catalog, and aspirations for this catalog. In the eight remaining chapters cognitive content categories, control of content, groups, and individuals are discussed, and concepts are defined in terms of each topic. A six-item bibliography concludes chapter 1. (PD)

Language: ENGLISH  
Document Type: CLASSROOM MATERIAL (050)  
Journal Announcement: RIEGCT75

This four-part monograph discusses the competency-based teacher education (CBTE) program at the State University of New York (SUNY) at Albany. The report attempts to (a) state the purpose and goals of the CBTE model, (b) suggest operation procedures, and (c) offer aids to facilitate development of a CBTE program. Part 1 presents a statement of the philosophical view of CBTE and sets guidelines for working in a CBTE mode. This section also discusses the limits of CBTE and explains and interprets the essential elements of the CBTE program. Part 2 presents the model used in the SUNY at Albany College of Education program. Part 3 provides a step-by-step procedure for creating a CBTE program, building on an institution's existent teacher-preparation program. Part 4 helps guide administrators with questions and suggestions for judging the effectiveness of the CBTE program. Figures illustrating the CBTE model and a sample evaluation form are included. (Author/JS)

**A Comparison of Attitudes Held by Traditionally Prepared Teachers and Teacher Corps (Cycle 5: 1968-70) Prepared Teachers Regarding Subject-Oriented Instruction and Student-Oriented Instruction.**

Johnson, Olin Chester  
Jun 1972 22p.  
EDRS Price - MF01/PC01 Plus Postage.  
Language: ENGLISH  
Journal Announcement: RIEFEB73

This study was conducted to show how a teacher's training affects his or her attitudes toward teaching. Twelve statements dealing with various aspects of education in relation to subject and student oriented instruction were distributed to 15 traditionally prepared teachers and 15 Teacher Corps prepared teachers. Each participant indicated in writing and verbally the extent of agreement or disagreement with the statement. Samples were stratified in order to determine patterns and areas of agreement and disagreement among teachers. Fisher's T-Table was used to correlate the differences between the two groups. Results indicated a significant difference between the two sample groups. Implications, recommendations, and conclusions are presented. Research material and an 8-item bibliography are included.

EDRS Price - MF01/PC07 Plus Postage.  
Language: ENGLISH  
Journal Announcement: RIEDEC74

This report describes a 1-year project for the initial development and implementation of a competency-based teacher education program. The project was part of a fifth-cycle Teacher Corps program. Project activities were directed toward planning, faculty development, assessment of changes in attitudes and program structures, and facilitation of education models developed under the auspices of the U. S. Office of Education. Procedures included workshops, inservice professional conferences, systems management activities, the development of instructional modules, the assessment of changes in perceptions, and general evaluation of competency-based aspects of the teacher education program. Data from the assessments and evaluation indicated positive changes in perceptions and cognitive development, and use of materials and procedures centered around competency-based criteria. It was found that the complete transition from a traditional to a competency-based program required more than 1 year. (Author)

Document Type: PROJECT DESCRIPTION (141); NON-CLASSROOM MATERIAL (055)

Geographic Source: U.S.; New Hampshire

Journal Announcement: RIEAUG80

This trainer's manual describes a college level mini-course on moral education. As a result of the course experience, participants will gain an appreciation of the importance of moral education, learn to lead moral discussions, and incorporate relevant moral issues into the elementary and secondary curriculum. There are three parts to the mini-course. The first part of the course requires the students to do prerequisite readings. The second part of the course is direct instruction, requiring eight to ten hours of contact time. A description of the content of the instructional units to be used in the direct instruction is included in the trainer's manual. A variety of instructional activities are used to help the participants relate content to their actual work situations. Participants view slides and video tapes, listen to lectures, read books, solve problems, and discuss. In the third part of the course, the application stage, participants apply the skills acquired in their classroom. Follow-up with the instructor completes the mini-course. (Author/RM)

Document Type: CONFERENCE PROCEEDINGS (021)  
Geographic Source: U.S.; Georgia  
Journal Announcement: RIESEP80

This document reports the activities of the Southeastern Teacher Corps Network's May 1979 conference on the validation of programs and the dissemination of information. Concerns of the meeting were: the establishment of procedures for program validation processes, the increased awareness of naturalistic data-gathering techniques for educational research, the increased familiarization of educational practitioners with programmatic evaluation techniques leading to validation and dissemination, and the use of National Teacher Corps Validation and Dissemination Initiatives. The conference sponsors also sought to establish an awareness of ideas for validation processes consistent with the Joint Dissemination and Review Panel and the National Teacher Corps Validation and Dissemination Initiatives, and to review established processes for validation in the Southeastern Teacher Corps Network with the eventual goal of developing new procedures. **A Deans' Response to a Review of Procedures & Policies Governing Appointment, Promotion & Tenure in New England Institutions of Higher Education.**

Philippi, Harlan A.  
New England Teacher Corps Network, Portsmouth, N.H.  
May 1979. 22p.  
Available from: New England Teacher Corps Network, P.O. Box 1065, Portsmouth, NH 03801  
EDRS Price - MF01/PC01 Plus Postage.  
Language: English  
Document Type: POSITION PAPER (120)  
Geographic Source: U.S.; New Hampshire  
Journal Announcement: RIEDEC79

Statements and documents concerning the criteria and standards used for faculty promotion, retention, and tenure in member institutions were collected by the Deans' Council of the New England Teacher Corps Network. The response presented in this publication is made in the form of a memo to the faculty senate, from the dean of a college of education. It is concluded that as more uniformity in policies, more precision in statements of criteria and standards, and more regulation of practices are sought, there will be a gain in an important efficiency index and in institutional definitions of fairness.

However, there is a consequent risk of diminished adaptiveness. In the extreme, both positions are seen as damaging, and are cautioned against. It is suggested that a Professional Equity Compact be used by institutions as a tool for equity in faculty personnel matters. Such a formal document is proposed and would contain a statement of rights, responsibilities, privileges, obligations, objectives, focused interests, and whatever other referents are thought to be important to the individual and the institution for evaluation purposes for a specific period of time. Journal Announcement: RIEFEB82

A report is given of a fifteen-day summer workshop sponsored by the Teacher Corps. The workshop was held in Chicago, Illinois and involved faculty from the Hyde Park Career Academy, Dumas Elementary School, representatives from the Community Council, and interns from the Teacher Corps Member Training Institute. The focus of the workshop was on improving the school climate. Both large and small group sessions were held, involving a total of 37 participants. Large group seminars were devoted to group dynamics, multicultural education, and general principles of special education. In the small group sessions, discussions were held on record keeping for teachers, beliefs and values, extra-curricular activities, communications, and reading. An overview is presented of the activities of the workshop and the evaluations offered by the participants. The appendix contains sample worksheets and materials used in the workshop. (JD)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEJAN78

This document is the first in a series of ten related works investigating the experience of New York State in the implementation of performance based teacher education (PBTE) and consists of preliminary data gathering efforts to describe the persons applying for individual assessment for certification and a survey to determine their receptivity to individual assessment emphasizing demonstration of competence. The survey is restricted to individuals desiring certification on the basis of (1) accumulation of sufficient credits, though they have been earned from one or more institutions with approved programs, (2) reciprocity of licensing provisions with other states, and (3) completion of teacher education sequences and experience in states that have no licensing reciprocity with New York State. Two major questions addressed in the survey are (1) how much time and (2) how much money are applicants willing to expend in completing assessment activities. The first chapter of the report presents historical notes to the survey. Chapter two focuses on the development of forms for recording data and a set of recording procedures. Chapter three presents a summary and analysis of data obtained, presented in three subsections, covering the major questions, several hand tallies to manipulate the data, and the survey. Chapter four presents suggestions for utilizing the survey results. The appendix to this document is an abbreviative form of the entire appendix, printed in a separate volume, and contains instrumentation, recording instructions, various codings, identification of errors in sampling, analysis of errors, and identification of cards corrected. (MJB)

**Journal Announcement: RIEOCT74**

The paper describes four alternative teacher training approaches offering Navajo Indian college students the opportunity to become certified classroom teachers within proximity of their homes and jobs on the reservation. Programs discussed include Navajo Tribal Teacher Education Program, Career Opportunities Program, Teacher Corps, and a representative regular college program offered by Northern Arizona University, Flagstaff. The purpose of the paper is to give prospective Navajo teachers insight into the ways and means of obtaining the education prerequisite to becoming fully certified elementary school teachers, hopefully encouraging an increased number of Navajos to enter the teaching profession and to remain on the reservation. Two of the approaches discussed are associated with nationwide, federally funded programs. An attempt is also made to describe the history and philosophy of the Career Opportunities Program and Teacher Corps. (Author/KM)

Document Type: RESEARCH REPORT (143)  
Journal Announcement: RIEMAR75

This six-chapter study provides a summary of active programs that aim towards professional development of educational personnel, and it generates attributes of programs of professional development that would distinguish teacher centers from other types of programs. Chapter one provides information regarding the historical background of teacher centers, in-service programs in other countries, and origins of the teacher center concept. Chapter two presents the following information: a) the conceptual base on which the three populations were developed and the sampling procedures used in each case, b) the processes used for the development of the instrument, c) data collection procedures, and d) plans for the analysis of the data. Chapters three through six discuss demography, nature of programs, administration and governance, and finance. Chapter seven highlights the important findings to provide helpful information for future program development. The authors conclude that children should continue to be the primary focus of teacher centers and that the centers should be evaluated by measuring their impact on the lives of children. A 19-item bibliography is included, and complete data returns are appended. (PD)

This paper describes the use of student teacher interns who lived and taught on a Hopi Indian reservation. People in the Hopi community housed these teachers and cooperated with them in the classroom and in formulating educational material that would be relevant to their local culture. One Teacher Corps team developed a whole Hopi unit in social studies. Teaching

teams were led by a Hopi who coordinated educational and administrative tasks and helped the interns and the community communicate with each other. The author sees such model programs as useful in supplementing institutional teacher training for bicultural situations. (CD)

This document presents a framework for planning a statewide program for staff development of education personnel. It is primarily intended for use by state department of education personnel. There are three sections. The first gives a perspective on statewide staff development, problems involved in planning, and the issues to be considered, such as the differing roles and responsibilities of staff, the focus of the development program, and funding. In the second section guidelines are presented for forming planning teams. The last section gives detailed information on developing a statewide plan, identifies the successive phases of planning, and presents the seven generic components of a statewide plan for staff development. A bibliography is appended along with the information collection worksheets and questions used in developing this framework. (JD)

Journal Announcement: RIEMAR75

This 10-chapter catalog of teaching skills, which is based on the concept that specific teaching skills vary with the age of the student, social behaviors, and skills or subject matter to be taught, contains sections of special skills, development of training materials, and generic skills. Chapter 1 states that each specialized chapter is structured according to the following: (a) the content field or level of student to which the chapter is devoted, (b) the teaching approaches in this field or at this level, (c) the functions of teachers within specific approaches, (d) teaching skills within teaching functions, and (e) the separation of the indicators for each skill according to context. Chapter 2 discusses systematic development and teaching skills and deals with selecting competencies in this document that justify an instructional development effort. Chapters 3-9 deal with special skills in early childhood programs, socialization and classroom management, elementary language arts, social studies, mathematics, secondary English, and science. Chapter 10 deals with teacher skill training and discusses elaboration of training skills by phases and functions. Tables of skills related to goals and objectives, learning environment, face-to-face instruction, and diagnosis and evaluation conclude this chapter. (PD)

Journal Announcement: RIEAUG78

This document, one of a series on planning an inservice teacher education program, provides a conceptual base for understanding and developing such programs. The document is divided into four sections. Section one suggests that there are six assumptions, constraints, and mandates that must be

addressed at the local level in order to plan a consistent, comprehensive program. Section two explores nine elements that define the actual inservice plan itself. Section three provides a set of "scenarios" intended to provide concrete examples of effective programs that could be developed under the rubric of the planning process. Section four presents a review of some specific critical areas that need to be assessed in an evaluation of a local inservice plan. Appendices present related materials in the set of inservice planning guides and possible funding criteria for the inservice components of Teacher Corps projects which would be consistent with the "Planning Process for Inservice Education" series. For staffers, consultants, community coordinators, and community council chairpersons in Teacher Corps projects, this guide tells how to use the Corps' consultant teams for onsite assistance in project goal-setting, planning, implementation, and skills development. The text describes how to determine the need for consultants; clarify the kind of help needed; choose the expertise and characteristics desired in the consultant team; design and implement the consultant team visit; evaluate the visit's impact; and, with the help of the team's collaborative report, decide on future needs and activities. A large selection of sample forms and documents further aids the user in organizing and analyzing the consulting activities. Included in this section are forms for needs assessments, consultant planning, team visit documentation, and consultant evaluation, as well as sample agendas and reports and a list of resource people in the Southeast. Journal Announcement: RIEDEC75

This list of materials from a Teacher Corps Materials Fair is basically intended for use by teacher educators, and includes items dealing with many important aspects of teacher education. The first section is an annotated list of books, booklets, pamphlets, and papers published since 1968, some of which cover the following topics: (a) inservice education, (b) internships, (c) open classrooms, (d) futures of education, (e) competency based teacher education, (f) staff training and development, and (g) racism, desegregation, and minority groups. The second section contains protocol and training materials which basically concern improving teaching skills. Each item is described, addresses are provided, and some prices are listed. Section three is a list of films and filmstrips which cover a wide variety of topics in education. Each entry includes a description, the length of the film, and the address of the distributor. The last section contains an annotated list of kits, programs, and training systems which cover (a) character education, (b) human relations training, (c) staff development, and (d) reading. (RC)

Journal Announcement: RIENOV79

The basic premise behind the Dine Teacher Corps Project is that teacher pre-service and consequent inservice education and training is held to be a crucial factor in upgrading the quality of education received by American Indian students, particularly in a reservation setting. Although the Dine Teacher Corps Project includes three phases, only Phase I--Planning has its management system developed thus far. The management system is organized into six categories: (1) planning, to provide management control of the analytic and

decision making activities conducted by the appropriate staff, to identify needs, problems, objectives, and program direction, and to analyze the decision making essential to the conduct of other processes; (2) programming, to develop the specific program plans as identified in category 1; (3) budgeting, to develop the resource costs of each program plan and maintain fiscal information essential to the conduct of each program; (4) forming a community council, elected to insure the operation of parity decision making; (5) documenting and evaluating progress, by systematic collection of evidence to authenticate facts, to substantiate claims and opinions, and to support inferences drawn from the evidence; and (6) developing a chain of command or ladder of communications, to illustrate level, roles, and linkages of the Dine Teacher Corps Program '78. Journal Announcement: RIENDV79

The overall objective of the Dine Teacher Corps Project is to demonstrate the effectiveness of an interdisciplinary approach to the development and implementation of a bilingual/multicultural training and inservice training program for educators who will be cognizant of and responsive to the unique educational needs of the Indian child. The five year project, begun in 1978, is designed as a cooperative program between Northern Arizona University, Dine Teacher Corps, and two Bureau of Indian Affairs Navajo boarding schools (Kaibeto and Leupp). In order to perform the three phases of activities required by the project (planning, training programs, demonstration and dissemination), a Management Information System (MIS) has been developed and implemented to provide adequate, accurate, and timely information for decision making, reporting accomplishment, and using resources effectively. The MIS is an integrated information system comprised of seven subsystems: finance, school communities, management, facilities and equipment, personnel, students, and instructional programs. Diagrams, flow charts, models, and tables illustrate details of the MIS program design. (NEC/BR)

Journal Announcement: RIENDV81

Since 1978, federal legislation and regulations have required that Teacher Corps projects involve the participation of elected councils of at least seven members representative of the parents and other residents of the communities within the boundaries of the project schools. These councils participate in such project functions as needs assessment, improvement of communications among parties affected by the project, identification of resources in the community, contribution to curriculum development, and encouragement of community participation in the program. Councils may be formally or informally organized, but must document their activities in either case. Those responsible for organizing the election of community councils may consider use of polling places, mailed ballots, or community conventions as election procedures. Scenarios of possible elections under these procedures are provided. Appendixes offer samples of by-laws, election notices, and election calendars, a suggested outline for minutes, and hints for the council chairperson. (PGD)

focus of this program is on the school and the classroom learning environment in which the graduate student's performance takes place. The training takes place in the teacher's school with the university instructor jointly planning, implementing, and evaluating; success being measured by the impact the program is having on students in the classroom. This report contains a model of the program, a discussion of the program's history and objectives, and an overall evaluation of the program. (JD)

Journal Announcement: RIEDCT81

Resources necessary to maintain a valid information dissemination system for the Teacher Corps are identified in this report. Emphasis is placed upon practical cost-effective mechanisms that may be employed in extending educational improvements developed by the Corps. Previous studies have indicated that most Teacher Corps projects will need specialized technical assistance and external support if they are to carry out even minimally effective outreach programs. It is pointed out that, while most members of the Corps regard themselves as educators and not "disseminators", it is critically important that school improvement programs be extended beyond local project activities. It is suggested that the Teacher Corps employ direct measures to reward dissemination activity and that the Corps provide training and technical assistance to projects to build their capabilities for outreach. Seven specific recommendations are made for improving the information dissemination processes, and the means of implementing and funding them are discussed. Statistical data on Corps projects are included in the appendices. (JD)

This 2-hour seminar is designed for institutions that have a traditional teacher education program but whose faculty or

state department of education is considering a change towards performance-based teacher education. The materials required for this seminar include both readings and filmstrips. After completing this module, each participant should be able to: (a) define competency-based teacher education; (b) list the essential characteristics of a competency-based teacher education program; (c) write behavioral objectives in the affective, cognitive, and psychomotor domain; (d) list the elements of a module; and (e) design a module. The module is divided into preassessment sections for each objective with filmstrip and reading assignments required if the answers to the preassessment questions are not satisfactory. The appendices include the answers to the preassessment sheets and detailed descriptions of all material required for the seminar. (JA)

Journal Announcement: RIEOEC69

Statistical analysis of the videotape recorder as a feedback device used to train teacher interns produced four conclusions: that videotape feedback to teacher interns did not produce behavioral changes significantly different from those teacher interns who did not receive feedback; that the addition of inputs such as critique and type scripts did not produce behavioral changes significantly different from those teacher interns who received video-audio feedback; that the time interval between treatment sessions did not produce significantly different behavioral changes between teacher interns' initial status and their final status; and that the interaction of treatments and time interval did not produce significant differences between the groups' means. Twenty-five Teacher Corps interns were placed in five groups and were videotaped three times in 20-minute sessions. Each group was given different treatment: video feedback only; video-audio feedback; audio feedback only; video-audio feedback including critique and type script; and no feedback. All of the videotape recordings were coded with the Flanders Verbal Interaction Analysis System by two independent coders. The statistical analysis was accomplished by using a 3x5 Type I Lindquist Analysis of Variance Design. (MM)

Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; Vermont

Journal Announcement: RIEDEC80

This qualitative research report focuses on the phenomenon of teacher burnout at the junior high school level. Three teachers were interviewed as to the role teacher burnout played in their professional and personal lives. A jury of peers reviewed the transcriptions of these interviews and categorized interview data into five categories: How was burnout defined? What were the types of burnout reported? What efforts were expended to alleviate its effects? and, What were the symptoms? The results are reported for those factors agreed to by all three members of the jury. The report concludes with observations concerning burnout at the junior high school level, suggested future research possibilities, and action steps public school personnel (administrators, teachers, students) might undertake to combat its debilitating effects. Geographic Source: U.S.; California

Journal Announcement: RIEAUG81

In examining the relationship between teaching experience and concerns of teachers, it has been generally assumed that the experienced teacher will be less concerned about self and more concerned about student achievement than the teaching intern. The Teacher Concerns Checklist and the Teaching Anxiety Scale submitted to Teacher Corps personnel were designed to explore the developmental progression of teacher concerns and the effect of anxiety on this progression. It was discovered that both experienced teachers and teacher interns considered student achievement their primary concern. However, the self concerns of interns were not as high as expected. In analyzing this result, it is pointed out that Teacher Corps interns are required to have a higher academic degree than

most preservice teachers, and because of the nature of Teacher Corps commitments, they are inclined to have more advanced concerns than other teacher trainees. A copy of the Checklist and selected items from the Teaching Anxiety Scale used in the study are appended to this report. (JD)

This document is Volume 3 of the report on the first phase of a two-phase longitudinal study of the Teacher Corps program being conducted by Pacific Training and Technical Assistance Corporation. It contains supplementary material, usually statistical tables or technical material, which supports Volume 1, the main volume of the report (see ED 098 240). The purpose of Phase 1 of this study was to identify and analyze those combinations of intern background characteristics and Teacher Corps program characteristics that are related to desired teaching skills and attitudes of interns at the end of their training. Phase 1 was also used to formulate hypotheses for phase 2 which will assess the effectiveness of Teacher Corps graduates in working with low-income minority group children. Section 1 of this volume 3 is an introduction. Section 2 presents a list of the derived intern background factors as well as tables which, for each intern background factor, show what original intern background variables loaded on this factor. Sections 3 and 4 contain parallel information for Teacher Corps program and intern exit factors respectively. In Section 5, the factor scores for each of the 20 projects on each of the 65 program factors are presented, as are the exit factor scores for each project on each exit factor. Section 6 contains tables related to the relationship of intern background and Teachers Corps program to intern exit factors. (PB)

Journal Announcement: RIEMAR75

Data collection instruments used in the first phase of a two phase longitudinal impact study of the Sixth Cycle Teacher Corps program are contained in this volume. The object of Phase 1 was to determine the relationship of intern background and Teacher Corps Program characteristics to intern exit characteristics. After a brief introduction, short descriptions of the intern background, program variables, exit variables, and institutional change instruments are presented. The remaining two sections of the volume are devoted to chronological presentation of the instruments themselves--the first part devoted to instruments used during the fall of 1972 and the second part to instruments used during the spring of 1973. Instruments used during 1972 obtained data on intern characteristics and program dimensions. Information about program variables, intern exit characteristics, and the impact of the Teacher Corps Program on its supporting institution of Higher Education was collected during the spring of 1973. Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEMAR75

This report describes the first phase of a longitudinal study of the Sixth Cycle Teacher Corps program, focusing on the relationship between intern background characteristics, Teacher Corps Program characteristics, and intern exit characteristics. Data about all Sixth Cycle projects that prepared elementary school teachers were collected at each site by interview and questionnaire. Data about the exit

characteristics of interns were gathered using: (a) classroom observation, (b) log of professional activities completed by interns over a week's time, (c) interviews, and (d) questionnaires completed by interns and their team leaders. Descriptive and analytic results are reported. Analytic findings are: (a) the relationship of intern exit skills was not very strong; (b) Teacher Corps Program characteristics rather than intern background characteristics were most closely associated with intern exit skills; (c) the extent that teacher competencies were specified and used by the project was not closely related to any intern exit skill; and (d) the sets of program characteristics that were most closely associated with intern exit skills were those pertaining to collaborative decision-making, personalization of the program for interns, and the community component. (Author/HMD)

Language: ENGLISH

Document Type: CONFERENCE PAPER (150)

Journal Announcement: RIEJAN75

The findings of the first year of a 2-year study of Teacher Corps graduates are reported in this document. The goal of the first year of the study was to identify and analyze those combinations of intern background characteristics and Teacher Corps program characteristics that are related to desired teaching skills and attitudes of interns at the end of their training. Data were collected at 20 sixth-cycle projects that prepared elementary school teachers. Data about the training program at each site were obtained from university professors and deans, project staff, local education agency superintendents, school principals and teachers, community persons and interns through questionnaires and interviews. Data about intern characteristics after training were gathered through classroom observations, questionnaires, intern activity logs, and interviews with interns. It was found that important trends related to positive exit factors were, without exception, program factors; that is, none of the background experiences or characteristics (excluding ethnic background) had an impact on the intern's exit characteristics. Only three exit characteristics could be predicted from program factors with an acceptable level of accuracy. In another aspect of the study it was found that undergraduate programs compare favorably with graduate Teacher Corps programs and that they are, in fact, doing better than graduate programs. (HMD)

Language: ENGLISH

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEMAR75

This report examines the second phase of a longitudinal impact study of the Sixth Cycle Teacher Corps. Phase I focused on the relationship of intern background and Teacher Corps Program characteristics to intern exit characteristics. Its goals were to: (a) contrast teacher performance and pupil gains of graduates with those of control group teachers; (b) analyze the relationship of teacher background, teacher education program, teacher performance, and pupil performance for the graduates; and (c) assess the effects of professional support which graduates and controls receive. The 84 subjects taught grades 2-6 in self-contained classrooms. Data about teacher and pupil performance were obtained through a classroom observation guide, teacher questionnaire, data, standardized reading test, and standardized self-concept scale. Graduates were superior to controls in developing ethically relevant curricula, using community resources and initiating contact with parents, and developing positive attitudes about reading development and the causes of poverty in society. Graduates facilitated greater self-concept development in pupils, but there was no significant difference in reading gains between the two groups. The consistent pattern of relationship between pupil variables and Teacher Program characteristics suggests that teacher training makes a difference on pupil behavior and on related teacher performance. Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEFER77

This document is a summary of two years of activity of the Maine Teacher Corps presented in outline form. Throughout, several questions are asked (What was done? What was learned? What was expected? What was found?) followed by

recommendations for other programs. Section I is an introductory essay entitled, "Maine Teacher Corps, A Viable Alternative." Section II discusses the selection process of interns and team leaders--the processes and criteria used--and their implications. Section III, "Program Structure," discusses grades and credits, and other information used in their place. Section IV describes the instructional program of interns in terms of content, supervision, and evaluation. Section V, "In-Service Program," focuses on the dimensions of the Teacher Corps' interactions with in-service teachers. Section VI discusses the host university's relationship to the Teacher Corps in light of the University of Maine's statement that Teacher Corps is a way to provide new input into the staff, implement an experimental model, explore alternatives within the school, and provide financial assistance. The appendices offer a sample Teacher Corps transcript including a list of minimal competencies attained by graduates of the Teacher Corps program. (MM)

Document Type: BDDK (010)

Journal Announcement: RIEFEB77

The concepts of educational research, development, and dissemination can be examined and defined so that a framework in which the relationship of each to adaptation, documentation, and evaluation can be visualized. Using the Teacher Corps Projects, a component of the federal research and development effort, as a concrete example, it can be seen that its demonstration functions are in actuality a form of dissemination of educational innovation. In any Teacher Corps project, three cycles must occur: adaptation (site-specific arrangement of the process or product); documentation (recording of events during adaptation and implementation); and evaluation (measurement of documented effects against expected outcomes). These cycles occur constantly, not only during dissemination, but also during research and development. In research, the adaptation cycle is synonymous with hypothesis generation; documentation may be called experimentation; and evaluation is called validation analysis. In development, the cycles are called invention, field testing, and summative analysis, respectively. Since the key function of dissemination is to make research and development information known in a useable form, projects such as the Teacher Corps support the research and development efforts when they describe how they adapt, demonstrate, analyze, and judge the innovation. By examining such projects, it can be seen what works in classrooms to improve the quality and relevance of education. (MB)

Journal Announcement: RIEAUG74

There are three major phases of this competency-based, humanistically oriented adaptation plan for the Teacher Corps program. The first is the adaptation of the national Teacher Corps program to the local Teacher Corps program. This

requires adapting the national literature to realistically fit local needs, adapting the national interest and interpretation of a given curriculum to the local program clientele, and involving teachers in a community program that integrates the school into the community as a positive social agency. In the second major phase the Teacher Corps program as conceived by the college or university is adapted to the Teacher Corps program as conceived by the local education agency. This requires the two institutions to share responsibilities; for example, the local school can select from intern candidates who have passed an in-depth selection process and who have requested to work at that particular school site. In the third major phase the Teacher Corps program is adapted to the institutions of higher education through meeting required standards and striving to ensure that everyone feels involved in the decision-making process. In conclusion, the effectiveness of the change process depends on people, and national programs should consist of broad guidelines within which people can adapt their own programs. (PD)

In this book a collection of articles report the results of several projects designed to adapt research findings into classroom practice through inservice education. In the first of four sections an introductory article discusses the concept of research adaptation as a tool for staff improvement. The second section is devoted to articles on using inservice education to promote the utilization of research in the schools. Section three contains examples of the use of innovations in the elementary classroom. An article on delivery systems in staff development programs comprises the fourth section. A final coda presents a summary of the topic and conclusions. (JD)

Case studies were conducted to assess the personal learning styles and behaviors of elementary school children to provide teachers the opportunity of using prescribed teaching techniques to match students' styles. Six groups of behaviors were identified: (1) students demonstrate little internal control and are likely to act out and create disturbances; (2) students are resistant to authority and imposed structure; (3) students are fearful and avoid situations involving risks; (4) students are easily distracted; (5) students are concerned with adult approval and show respect for authority; and (6) students have internal controls, can be relied upon to stay on-task, and respond well to self-managed study plans. The behavior characteristics of each of the six groups are described. Treatment schedules for teachers to use in a classroom setting of each type of student are described in detail. The results of their application by teachers in eight case studies are presented and discussed. (JD)

Document Type: CONFERENCE PAPER (150)

Journal Announcement: R1EAPR78

Prior to an intensive 3-day conference, position papers were prepared by a select group of Mexican American scholars, representing the areas of history, anthropology, bilingualism, sociology, political science, education research, psychology, and cultural arts. Under suggested guidelines, selected

Mexican American educational leaders reacted to the papers in small-group sessions at the conference. Based on these reactions, the papers were then revised for this publication, which is divided into two sections. The first contains two introductory papers concerning the general topic of education for the Mexican American. The second section includes a paper discussing specific problems of the Mexican American child and the eight main position papers. Topics of the papers are: a challenge for educational institutions--an educational philosophy for the instruction of Mexican Americans; anthropological implication in the education of Mexican Americans; toward a philosophy of education for the Chicano, bilingualism and intellectual development; current educational research, the basis for a new philosophy for educating Mexican Americans; politics and education; a tri-partite development for the cultural arts in the education of the Mexican American; the ethnocentric response of public education to the Chicano, implications for school administrators; the psychology of the Mexican American; a historical perspective on the Mexican American. Each paper is preceded by a short preface and followed by a list of the panel members and their reactions. (NQ)

Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; California

Journal Announcement: RIEFEB81

The Teacher Corps has been directed to put a greater focus on demonstration, documentation, institutionalization, and dissemination of the results of Teacher Corps projects. This report deals with program policy alternatives for improving the dissemination of project-developed products, practices, and processes to educational agencies and institutions. Resource requirements for maintaining efficient operation of an information sharing system over a five-year period are examined. Projections are made on the resources that would be necessary to support program outreach activities at minimum, middle, and maximum levels. An attempt is made to identify effective means for Teacher Corps projects to extend the impact of their school improvement programs beyond their local sites. Techniques for establishing an effective dissemination system are described and the feasibility of applying these practices in Teacher Corps projects is discussed. Detailed cost projections for implementing Teacher Corps information dissemination projects of varying size and efficacy are provided. (JD)

Language: English

Document Type: PROJECT DESCRIPTION (141)

Geographic Source: U.S.; Texas

Journal Announcement: RIEMAY79

The advantages and disadvantages of an extended planning period for implementing a Teacher Corps program are examined. A planning period of several months duration, four to six months for example, is deemed beneficial to the outcome of a project, while a longer period may possibly cause a loss of momentum and sense of goal. However, a planning period longer than two months provides the potential for a more effective project only if management plans formulated during proposal writing and revised during preplanning periods are monitored regularly. It is pointed out that special training opportunities should be provided as part of the planning period for program managers, and that intern recruitment should be initiated early. A set of guidelines developed for Teacher Corps Advisory Groups is presented. Appended to this report are: (1) a chronicle of study events; (2) memoranda to study team; (3) indicators of extended planning period; (4) areas to consider in assessing planning; (5) materials reviewed during the study; and (6) interview protocols. Journal Announcement: RIESEP80

The effects of training on twenty-one teachers in a Teacher Corps school were examined according to the type of training chosen, the preference exhibited by the teacher for certain types of delivery systems, and the level of transfer to classroom practice which were applicable to the different systems. This four-year study of inservice teacher education involved the correlation of personality measures for each teacher with a frame of reference developed by Abraham Maslow to describe individual needs patterns. Specific patterns emerged in the preference and use of training methods. Nearly all the teachers were able to replicate the training activities in their classrooms, but actual use of the learned strategies was a completely different matter. Those teachers at the self-actualizing end of Maslow's scale were able to implement and incorporate much of the training into their natural styles. Those at the middle level on the scale generally used only those things that helped them to "fine-tune" their current practices. Those at the lower end of the scale showed no consistent pattern of choice but were consistently unable to transfer activities into practice. (Author/LH)

Journal Announcement: RIEFEB79

The document describes a sampling of federal resources available for improving citizen education. It was prepared to give staff members of federal agencies an overview of educational programs dealing with citizen education and to help educators as they design and implement citizen education programs. The document is presented in two parts. Part I reviews and analyzes U.S. Office of Education (USOE) programs

which directly support citizen education or which indirectly contribute to public participation in citizen education. Programs include Fulbright-Hays, Ethnic Heritage Studies, International Studies Centers, and Teacher Corps. Part II describes citizen education activities of the Education Division, Department of Health, Education, and Welfare, as well as some programs of the Law Enforcement Assistance Agency, the National Endowment for the Humanities, and the National Science Foundation. For each program, information is given on type and extent of Federal involvement, objectives and background, eligible applicants, geographic participation, address and contact person, and relationship of the program to citizen education. **An Educational Model for Planned Intervention in Language Development.**

Damron, Rex; Engelhardt, Ken

Black Hills State Coll., Spearfish, S. Dak.

Jun 1971 15p.

EDRS Price - MF01/PC01 Plus Postage.

Language: ENGLISH

Journal Announcement: RIEMAR74

A program of planned intervention to facilitate language growth in kindergarten children at Cheyenne Eagle Butte was conducted during the 1970-71 school year. The study sample consisted of the students in 2 kindergarten classes, one considered low and one considered high, as judged by family economic background, Headstart experience, and educational advantage. The low group was the experimental group, while a kindergarten class in another school and the high group were control groups. Two interns in the Teacher Corps Project, both Indians, administered tests to the students. The instruments used were the Peabody Picture Vocabulary Test and the Illinois Test of Psycholinguistic Abilities. The test results were analyzed and individual student profiles were formulated. The program of planned intervention was then implemented, building on the child's strengths while concomitantly remediating his deficits. The major conclusion was that the psycholinguistic method was significantly better at teaching the specified set of skills to the specified set of children and that the usefulness of this model of teaching is a framework for diagnosing and remedying educational deficits of Sioux Indian children. A case study of a child in the experimental group was also presented. (PS)

Language: English

Document Type: PROJECT DESCRIPTION (141)

Geographic Source: U.S.; West Virginia

Journal Announcement: RIEAUG81

A community-based education program enables rural communities to meet needs and solve problems by utilizing the total community environment and its human resources. Components of this program are: (1) expanded use of school facilities; (2) lifelong learning and enrichment programs; (3) interagency coordination, cooperation, and collaboration; (4) citizen involvement and participation; (5) utilization of community in K-12 programs; and (6) community organization and development. Many communities begin a community-based education program by using school buildings as community-centered schools for educational, social, and community events. The school, community groups, and individuals share responsibility for development of lifelong learning and enrichment programs. Coordinated activities of service and governmental agencies and social, youth, and civic groups can produce a total program to meet community needs. Citizens participate through a community council which takes an active role in developing and implementing all aspects of the community-based education program. Through integration of solutions to home, school, and community needs, the program strengthens and reinforces learning experiences and provides a means of reinforcing values, beliefs, and attitudes. Finally, community members can exert their collective power to bring about needed changes. A general comparison of school-based and community-based educational philosophies is included. (CM)

**An Experiential Model for Graduate Teacher Education in Reading.**

Mangieri, John N.; Readence, John E.

12p.

EDRS Price - MF01/PC01 Plus Postage.

Language: ENGLISH

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEAUG77

The authors present a brief description of an experiential, sequenced, graduate program in reading instruction which answers traditional criticisms of field-based graduate study. Such criticisms include the belief that graduate teacher education is not in the domain of field-based instruction,

that adequate supervision is difficult to provide, that goals are vague and poorly defined, and that activity sequences are poorly planned. The Ohio University Teacher Corps Project in Reading, constructed to avoid these shortcomings, consists of six experiential phases, which may be viewed as comparable to the quarters of a school year, or as sequential components not bound by time constraints but by the student's competencies. Phase One consists of observation, tutoring, and team teaching, designed to acquaint the graduate student with the experiences and processes necessary for effective instruction. In Phases Two and Three, the student functions as an instructional team member, first at the elementary level and then at the secondary level. As the student proceeds through these phases, he becomes less of an observer and more of a contributing member of the team. Phases Four and Five are devoted to developing diagnostic-prescriptive skills, again as a team member in elementary and secondary level situations. Phase Six provides the student with the opportunity to demonstrate the integration of all his previous skill attainment by assuming the role of instructional leader in reading. The variety of experiences provided in this program give the student the necessary expertise in reading necessary to effectively deal with students at all grade and achievement levels. (MB)

Language: ENGLISH

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEJAN78

This report presents a model for single school staff development projects or programs within a large urban-suburban central system. Characteristics of such a system are identified as: rapid changes in the nature of the student population; active community interest; active teacher participation; the use of annual school plans and school board goals as planning tools for implementing development; a built-in staff development vehicle in each system-based program; and the need to distinguish between goals and shrinking financial resources for supporting inservice activities. In addition to examining traditional inservice activities at a single school site, this report and the models proposed emphasize a concept of continuing staff development. The report is divided into three components. The first presents an analysis of a central system's organization and resources in terms of its impact on single school staff development programs and the impact of single school programs on the system level. The second section discusses the role of the principal, the decision-making process at different levels, teacher incentives, collaboration with agencies outside of the school, and inservice problems. In the third section, two hypothetical models are offered for initiating preservice and inservice projects at a single school site. The elementary model is based on an open-concept school organization characterized by active teacher involvement in a vertical and horizontal committee structure for staff and curriculum development purposes. The secondary model suggests ways to teach the four basic academic skills of reading, writing, computation, and study across discipline lines. (JD)

Language: ENGLISH

Document Type: CLASSROOM MATERIAL (050)

Journal Announcement: RIEJAN76

This guide to simplified performance management approaches contains five sections. The first section, entitled "Simple Techniques for Managing an Innovation," is written from the viewpoint of a principal as manager. It describes how to manage an innovation, develop an objective, allocate resources for the innovation, keep organized records, and assess the program. There are many worksheets and charts included in this section. The second section is a discussion of the origins and the current state of management by objectives. The next section tells project directors how to implement a management and supervision by results approach, and how to evaluate the outcomes. This section also includes charts and worksheets. Innovation adoption is the subject of the next section. It is entirely composed of charts and forms to be completed. The final section is an introductory workbook to management by objectives for Department of Education personnel. It is divided into an introduction, an overview of management by objectives, a description of how to develop an objective, and a description of how to use objectives to manage activity. There are also several worksheets and charts in this section. (RC)

An Investigation of the Relationship Between the Abilities of Troubled Youth and the Degree to Which These Abilities Could Be Termed Gifted and Talented.

Garamella, Mary; Lang, Helene

New England Teacher Corps Network, Portsmouth, N.H.

Jul 1980 36p.

EDRS Price - MF01/PC02 Plus Postage.

Language: English

Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; New Hampshire

Journal Announcement: RIEMAY81

Twelve disadvantaged behavior problem youth were interviewed, observed, and evaluated in a case study approach to determine whether their abilities could be termed gifted and talented. Among measures used were the Renzulli Rating Scale, school records, teacher evaluations, parent interviews, peer evaluation, and observations of psychomotor and arts abilities. Among findings were that the Renzulli Scale is a good indicator of characteristics for gifted and talented youth, and that parent interviews provided insight into early development, family status, and school experience. Evaluation forms and data are included. Eight recommendations are made, including that schools develop a more responsive attitude and curriculum for gifted students who may be disadvantaged, culturally different, or underachievers. Individual case summaries are reported. (CL)

Language: English

Document Type: EVALUATIVE REPORT (142)

Geographic Source: U.S.; Texas

Journal Announcement: RIESEP81

A six-phase inservice plan based on a cybernetic, modified operations research model was used and evaluated in elementary and secondary schools. The cybernetic planning loop is characterized by adaptation and adoption based on continuous assessment, dissemination, and feedback processes. In phase one, a needs assessment identified planning and implementation needs, participant priorities, and resource persons available to deliver the system. On the basis of this information, it was decided to address four areas with the plan: public schools, a local college of education, community resources and development, and intern training. The second phase consisted of interactive planning and development for each of the program areas by Teacher Corps staff. Phase three was implementation, and phase four was evaluation. The fifth phase marked the institutionalization of the successful processes, such as a community resource guide, a professional development center, a community education component, and mainstreaming inservice. In phase six, the dissemination of information was accomplished through publications, presentations, handbooks, and dissertations. Extensive analysis showed that the program achieved most of the original inservice objectives. Appendices provide copies of the needs assessment instruments, evaluation summaries, levels of participation, and a record of the types of dissemination. (FG)

Document Type: CLASSROOM MATERIAL (050)

Journal Announcement: RIEAUG78

This booklet is part of a set of materials based on the belief that by getting teachers to agree on fundamental issues and values, a comprehensive program of inservice can be easily planned. This component of the set presents six generalizations about effective inservice programs and illustrates each with several different, but satisfactory, possibilities. These generalizations are: (1) teachers are more likely to benefit from programs in which they can choose

goals and activities, as contrasted with programs in which they are preplanned; (2) school-based training programs have more influence than college-based programs; (3) program objectives should be specific; (4) programs that have different training experiences are more likely to accomplish their objectives than programs having common activities required of all participants; (5) teacher's personal goals/needs and those of the school should be congruent if training is to improve school system operations significantly; and (6) training (related to job assignments) is likely to be effective if adequate time is provided within the current work schedule for each activity. Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEMAR78

This booklet is the first in a series of eight that describe the tenth-cycle Lincoln, Nebraska, Teacher Corps Project, located at Goodrich Junior High School under the joint sponsorship of the Lincoln Public Schools and the Teachers College of the University of Nebraska-Lincoln. The three goals of the competency-based preservice and inservice project were (1) improvement of the delivery of educational opportunities and services through the use of diagnostic-prescriptive teaching approaches; (2) the development, implementation, testing, and refining of a comprehensive model for competency-based preservice and inservice teacher education; and (3) the integration and articulation of services to the pupil and his or her family through the cooperation of community, university, and school resources. Booklet One expands upon these three goals by presenting themes and diagrammatic models for each, presented as workable, practical processes that served to realize the goals established for the Lincoln Project. The remaining booklets present descriptive reports of the project themes and models (booklets two through seven) and a report of results obtained with learners, teachers, and community personnel (booklet eight). Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEJUN76

The National Advisory Council on Education Professions Development was established by law to review federal programs for the training and development of education personnel and report its findings and recommendations to the President and to Congress. In 1975, the council held four meetings. The first resulted in 15 recommendations concerning inservice teacher education, adult education, research, and other issues. Also, a draft report, "Gatekeepers in Education: A Report on Institutional Licensing," was discussed and adopted for publication at this meeting. The report was written to combat consumer abuse and improve standards for institutional licensing. The second meeting adopted a report on directions for the Teacher Corps. The third meeting discussed the council's testimony before the Senate Subcommittee on Education and the Congress' reluctance to continue the Education Professions Development Act in a time of teacher surplus. The council's position was that, while recruitment of new teachers is no longer a problem, the priority has become quality of teachers and improvement of inservice education. The last meeting of 1975 left it unclear whether the council

would be continued, but the staff was to develop an issues paper presenting the council's view of the federal role in education professions development. (The text of the law establishing the council and its responsibilities is included in this report, as are numerous details on selection of officers, reports approved, educational institutions visited, and other business). This resource guide for initiating assessments of educational needs provides perspectives concerning possible and feasible ways to plan, organize, and implement such an assessment. The essence of needs assessment is discussed and a perspective on the effort is given. Crucial planning processes for a needs assessment are outlined and illustrative charts and procedures are presented. Ways in which to set goals, determine current conditions, analyze data, and implement change strategies are described. (JD)

Journal Announcement: RIENDV71

Eleven of the schools in this Teacher Corps program are on the Navajo Reservation and one on the Hopi. Corps members provided individualized instruction and introduced several new teaching methods to make the instruction more relevant to the children's culture. These methods have now been adopted by the regular teaching staff. Corps members also participated in various education-related community activities, and devised and carried out a cultural exchange project with 25 Hawaiian children. Exposure to Indian members, who made up 42 percent of the Corps, gave the children incentive for their own schooling, and about three-quarters of the interns who had completed the program were hired as teachers in reservation schools. The program also broadened the university's teacher education program and fostered a more cooperative relationship among the various colleges in the university. The Arizona Department of Education plans to increase the dissemination of information on successful innovations used by the Corps, and the U.S. Office of Education plans to offer technical assistance through the Corps for evaluation and to cooperate with the department of education as soon as staff are available. Journal Announcement: RIENDV71

The Teacher Corps program strengthened the educational opportunities available to pupils in classes to which corps members were assigned, but the report concludes that it had much less impact than it might have had. Innovations were not continued after the Corps members finished their assignments, with lack of staff and funds cited as the reasons. School principals and teachers generally agreed that the new methods and individual attention increased the learning capability and improved the attendance of many students. Over half the interns who completed the program were hired as teachers in schools serving poor areas. The program had some degree of success in broadening the University's teacher preparation program, with new courses and adaptations of regular courses to make them more relevant to teaching children from poor families. The Teacher Corps programs in Florida could be made more effective through broader dissemination, by the State Department of Education of information on experiments and methods used successfully in the program. Journal Announcement: RIEMAY72

This is the fourth in a series of reports comprising a nationwide review of the Teacher Corps program; it assesses the program at the University of Southern California and participating schools in Los Angeles and Riverside counties. The program focused on the special educational needs of Mexican-American and black children living in the Los Angeles metropolitan area. Corps members worked with individuals or small groups of children who had language difficulties, disciplinary problems, or were slow learners. Some regular teachers adopted corps members' techniques but others believed that the innovations were not of particular benefit. Corps members were instrumental in the development and operation of learning centers which provided elementary school children with materials for developing their knowledge of mathematics, science, and social studies, and which continued operating after the end of the program. Members also organized or participated in community activities. Eighty-two percent of the interns continued in teaching, most in areas serving low-income families. The university developed two teacher preparation programs modeled in some respects on the Teacher Corps program. The General Accounting Office believes the effectiveness of the programs could be increased by the wider dissemination of information on successful experiments and teaching techniques. Related documents are ED 005 208, ED 005 252, and ED 005 140. (MBM)

Journal Announcement: RIEDEC71

This report found that Corps members enabled the schools to give more individualized instruction, provide expanded classroom and extracurricular activities, and improve the

ratio of students to teachers. Corps members introduced English as a second language, and science and algebra taught in Spanish. School officials and teachers believed that the interns were well prepared for teaching and communicated well with the children. Some believed that the individual instruction and classes taught in Spanish were especially beneficial. The interns assigned to two high schools did not get along well with the faculty, and some were reassigned to elementary schools while others resigned. At one elementary school two full-time regular teaching positions were filled by Corps members, contrary to the requirements of the legislation. As a result of the program the university developed a similar teacher internship sequence in the regular teacher education program to meet the needs of Spanish-speaking children, and a center for studies in rural and migrant education. The report recommends that the Office of Education should monitor the program more closely to ensure that Corps members are correctly used and to help create a cooperative attitude in the participating schools. Journal Announcement: RIENDV71

The Teacher Corps program increased the educational opportunities available to pupils in grades to which corps members were assigned, however, the program's impact was not nearly as great as it could have been. Some interns participated in special projects or used new methods of instruction, but few of these activities were continued after the corps members left. Program officials said that manpower and resources were insufficient and that they had not evaluated the activities to identify those that were successful. Officials believed that the program had benefited individual students by reducing the student-to-teacher ratio, and by exposing the children to interns from a variety of backgrounds. Although the program's influence on the regular teaching staff was limited, it was believed that some of the teachers had changed their methods of instruction. Few interns remained permanently in the area because of its isolation, the low salary levels, and the small number of teacher vacancies. University officials believed that the program had contributed to the development of new approaches to student teaching in the regular curriculum. (MBM)

Journal Announcement: RIEJUN75

"The Role of the State in Performance-Based Teacher Education-Certification" by Robert Roth creates a context for viewing how state agencies are approaching performance education. Peter Airasian then explores the value questions that are at the heart of evaluation issues. Fred McDonald looks at "The State of the Art in Performance Assessment," and Barak Rosenshine lists recommendations concerning the research dilemmas. James Popham, in three papers, touches on the problems of selecting assessment systems, developing performance tests, and identifying minimal competencies. Del Schallock then details what occurs when "Moving from Conceptualization to Practice in Assessment." Concerning costs and teacher concerns, two educators, Bruce Joyce and Herbert Hite present their conclusions. Beatrice Ward discusses the cost factors involved in developmental work at the Far West Regional Laboratory. Finally two teachers, Sandra Feldman and Bernard McKenna, note their interest in the potential of performance-based teacher education and reveal their most serious concerns. (RC)

Journal Announcement: RIEJUN69

A presentation on socio-cultural-attitudinal characteristics of migrants and the impact of education is one of a series of

lectures given during the pre-service phase of a 2-year Teacher Corps training program. An outline of the cultural differences which exist between the Mexican American and the Anglo American reveals differences in personality characteristics and modes of life style. Problems are described which the Mexican American encounters in the process of acculturation, and programs are suggested which are designed to satisfy the needs of the Mexican American and to give him a positive image of his cultural heritage. Interview summaries and schedule, and worksheet scales used in the pre-service phase of the program are included. Related documents are RC 003 081 and RC 003 082. (SW)

Journal Announcement: RIEJAN74

This report presents evaluations of the supplementary programs at Austin T. Walden Middle School, partially funded under Title I of the 1965 Elementary Secondary Education Act. The Instructional Assistance Program had such goals as: to develop lasting materials that provide a more integrated learning experience for the pupil from the inner city; to develop within the pupil an appreciation of learning and school; to create some situation/experiences which led the pupil to make appropriate decisions; and others. The Career Opportunities Program is a teacher training program. The Title I program provided appropriate and meaningful learning experiences consistent with the performance of pupils as determined by data derived from teacher evaluation, and standard and informal diagnostic instruments. The purpose of the Teacher Corps Program at Walden was to train an instructional team to use competency-based education in the inner-city schools by planning and executing activities according to pupils' needs. Also, the Teacher Corps team sponsored community activities and made the pupils' learning experiences more relevant to the community. The Program for Education and Career Exploration is a guidance program that provided experiences for second and/or third year pupils that will enable them to make realistic educational and career choices at future major decision points. This exploratory module provides activities designed to enable the learner to develop an awareness of self. Activities suggest the formation of a group of 12-16 people and the presentation of a statement of self. The group is then subdivided, and participants share their statement after they have completed the following activities: personal inventories; who is the learner in relation to roles, responsibilities, qualities, beliefs, and feelings; where is the learner in relation to his/her life at present; and creation of a collage expressing thoughts, feelings, events, activities, relationships, and themes about the participant's past. Journal Announcement: RIEMAY75

This paper outlines a seven-step program for helping teacher interns deal with classroom behavioral problems. In step 1, "preassessment of interns," interns indicate a lack of training in the area of behavior modification through discussion and classroom behavior. In step 2, "instructional objectives," interns observe and discuss principles of behavior modification. In step 3, "instructional alternatives," interns who do not attempt to incorporate behavioral modification techniques directly in their teams are encouraged to utilize other strategies to increase desirable classroom behavior. In step 4, "materials," a bibliography of books and films is recommended. In step 5, "postassessment," observation sheets and changes in the frequency of undesirable and desirable behavior are examined. In step 6, "remediation," individual team consultants are employed to implement successfully behavioral modification techniques. In step 7, "student feedback," intern representatives at future seminar-planning sessions are queried about this program. (PD)

Journal Announcement: RIEMAY80

Field-responsive inservice education represents a program by which a college of education faculty goes into the field and forms collaborative relationships with individual schools, providing inservice training to teachers in the form of a graduate course, generally leading toward a master's degree. The university field team has access not only to students, but also to real-life situations and children, therefore instruction has direct relevance to actual practice. The major concern in the program is not only the transmission of knowledge and skills, but also the solving of educational problems. This report examines the program and discusses the issues and problems for both the university faculty and the teacher participant. (JD)

Journal Announcement: RIEDEC74

This paper describes a survey conducted to determine the needs of a group of California teachers who deal with bilingual, bicultural children. The one-page questionnaire listed areas of interest and possible methods to acquire skill in those areas. Areas of interest included developing a workable Spanish vocabulary for teachers to use when presenting math or other subjects and developing an approach to deal with problems in the affective domain such as unconscious cultural clashes and motivation patterns of Mexican-American children. Respondents were asked to select three areas of interest and to check one of the following methods to acquire knowledge in those areas: lectures, seminars, encounter groups, workshops using a variety of methods, small-group discussions, and individual learning packages. Totalled responses are presented in a table. (PD)

This booklet, containing eight instructional modules on works by major British writers, can be used either within a lower-level literature course for non-English majors or in a survey course for English majors. The first four modules focus on works from the early English period through the Elizabethan Age: "Beowulf," "Sir Gawain and the Green Knight," "Everyman," and "Henry IV, Part I" (Shakespeare). The other four modules concentrate on selections from the seventeenth, eighteenth, and nineteenth centuries, thematically examining the war between the sexes: "The Man of Mode" (G. Etherege), "School for Scandal" (R. Sheridan), "Wuthering Heights" (E. Bronte), and "Arms and the Man" (G.B. Shaw); The various activities in each module are designed to encourage familiarity with the terms, tools, and history of literature and to expose students to poetry, prose, and dramatic literature, as well as to literary criticism. Each module lists objectives and goals, prerequisites, assessment procedures, instructional

activities, and suggested readings. Examples of forms for teacher records and evaluations are attached. (RL)

Document Type: RESEARCH REPORT (143); POSITION PAPER (120)

Geographic Source: U.S.; Massachusetts

Journal Announcement: RIEOCT81

The ways in which principals have influenced or been influenced by four Teacher Corps projects are described and explained in case studies based on field interviews, observations, and a review of the documents produced in the course of the projects. The studies also provide the background both for an analysis of factors affecting the role of the principal and for the compilation of a user's manual for administrators and project staff. The studies were conducted in the second year of a five-year project lifespan. They report the observations of two-person teams who observed their assigned schools for a total of five days during two site visits. Within all four projects, the teams observed changes taking place in the organization, substantive direction, and distribution of authority. (Author/WD)

These two lists are the Catalog of Holdings for the Teacher Education Developmental Service (TEDS) and the Addendum to the Catalog of Holdings. TEDS is a group of professional educators skilled and available to assist teacher education consortia in New York State to develop programs in the competency based teacher education (CBTE) format. The library's collection, which includes multimedia materials, is divided into two parts. Part one consists of sample modules from more than 60 sources throughout the United States, while the second part contains general works about CBTE. The catalog of holdings and the addendum are divided in the same way giving separate listings for general works and modules. The modules are grouped according to their place of origin. These sources are listed in alphabetical order by the name of the educational institution or commercial firm by which they were produced. The listing of general works is arranged alphabetically by title, with an author and source number provided. General works have simply been assigned an accession number. The modules are classified by means of a code consisting of an abbreviation of the name of the source. (SK)

education program; (2) to initiate and implement performance-based professional education at Grambling College; (3) to develop interdisciplinary and field-based teacher education; (4) to operationalize an elementary school with team teaching and differentiated staffing approaches; (5) to operationalize an elementary school with a performance-based curriculum; (6) to develop a competency-based program for team leaders; and (7) to facilitate school-college-community interaction. The document is divided into four sections. Section One describes the following facets of the program for the period 1971-1973: (1) plans for program operation; (2) participant recruitment; (3) faculty training; (4) pre-program orientation; (5) mini-school philosophy and schedule; (6) teacher intern-welfare; (7) graduate credit for team leaders; and (8) plans for transition from preservice to inservice. Section Two provides an evaluation of the college, classroom, and community phases of the program. Part Three describes the achievements attained during the program, and a reprint of the "New Venture" brochure developed by the college to describe the program. Section Four provides appendixes including various questionnaires, lists of participants and schools, course requirements, and activities. (MB)

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEJUN77

To more nearly relate teaching skills or enabling competencies to the real performance world of the teacher, the Teacher Corps program at Emporia State College proposes that the intern demonstrate teacher competencies through a series of performance projects in each of five performance areas. These performance areas, selected from the real experience world of the intern, are: (1) facilitating the growth and development of individual students; (2) providing instruction and facilitating group processes with a group of students; (3) promoting a positive climate in the school; (4) facilitating school involvement in the community and community involvement in the school; and (5) communicating ideas and experiences to others in the teaching profession. The individual in training contracts for projects and is responsible to the training team for demonstrating that (1) the objectives of the project were achieved and (2) that a systematic learning process was used in planning and implementing the project. The key to the successful completion of a performance project is the Systematic Learning Process Model involving 12 stages: initial search; debriefing and clarifying goals; data collection and initial write-up; strategy development; consideration of skills and resources; final write-up; competency development; project approval; project implementation; project write-up; project evaluation; and sign-off or recycle. Possible performance projects in each of the five areas are illustrated, and some specific comments about performance projects are presented. (MM)

This is one of a series of eight Teacher Education Modules developed by Adams State College Teacher Corps Program. The dual purpose of these modules is stated as follows: trying to understand children and their needs and becoming familiar with and developing criteria for evaluating children's literature. The objectives of the modules, which are listed, stress acquisition of definitions, background, standards, techniques, understanding of children's needs, and overall selection ability as related to children's literature. Specific assignments, such as the accumulation of cards for each book covered in this course, are outlined. The module is then divided into eight units; each unit includes a brief introduction identifying the subject and general procedure, a list of general readings, and a list of references. The eight units are as follows: Understanding Children and Their Needs; Classics; Picture Books; Traditional Literature--Folk Tales, Fairy Tales, Myths, Legends and Fables; Fantasy; Fiction; Historical and Realistic; and Poetry. There are two appendixes: Literary Definitions and An Annotated Bibliography of Selected Selection Aids, which is subdivided into Basic Lists, Specialized Lists, and Aids Reviewing Non-Print Media. Techniques and activities for effective classroom management are presented in this module. The stated objectives of the module are to promote appropriate student behavior, to develop good interpersonal relationships and a positive socioemotional climate, and to establish and maintain a productive classroom organization. Samples of pre-post assessment instruments are included for student self-evaluation, student interest inventory, and teacher or administrator self-evaluation. A profile of the typical disruptive student is also included. Learning tasks and activities are presented for brainstorming, role playing, contracting, utilizing a rewards program, employing a buddy system, communicating, clarifying values, exploring self concept (Maslow), and following a positive discipline model (Glasser). Types of control techniques are examined briefly and classroom organization is touched upon. General tips for being a good classroom manager and specific tips for managing inner city classrooms are offered. A list of printed and audio-visual resources is included. (JMB)

Document Type: BOOK (010)

Journal Announcement: RIEDEC75

The purposes of this booklet are (a) to suggest the kinds of research needed to close the knowledge gap that now exists with respect to competency based teacher education (CBTE), (b) to build a case for CBTE programs as contexts for research in education and teacher education, and (c) to outline a framework for proceeding with basic research in these areas. The booklet outlines four different kinds of studies that need to be undertaken. These are (a) studies of alternative approaches to the mastery of teaching competencies; (b) studies to collect information to facilitate broad policy-level decisions about CBTE; (c) studies to search for new constructs and new ways of measuring constructs, to test models, and to search for principles of instruction that can be applied to teacher education; and (d) studies to describe the development, structure, operation, and/or diffusion of programs. The remaining sections of the booklet deal with how CBTE programs can be organized so as to function as contexts for research as well as training, and how the program of research might best be implemented. Two examples of programs which are now functioning as research contexts are described, and a plan for implementing the research and documentation program being called for is outlined. An appendix is included which describes a competency based teacher education project for the Consortium of Southern Colleges for Teacher Education. (RC)

The seven case studies presented in this publication are

representative of successful programs for the professional development of practicing teachers. They were selected to give a sampling of the variety in programs underway across the country. Two describe teacher centers jointly operated by a school system and a university; another, a Teacher Corps project involving an R&D laboratory with the university/school district collaboration. Two originated in the staff development offices of public school systems, but differ markedly in their structure: one of these works primarily with a single school site and a single university center toward a specific goal; the other uses the resources of community agencies, area higher education institutions, and individuals for a multitude of discrete offerings. Two programs feature cooperation among several universities; in both of these programs, the roles of teacher organizations, administrator associations, school districts, and state department of education are essential components. The final case study describes the concept of a two-year internship or residency for beginning teachers, how it may be funded, organized, and governed. (Editor/JD)

The purpose of this cluster of learning modules is to increase the teacher intern's understanding and skills with regard to his role as a communicator. The cluster contains three modules: (a) objectives for teaching handwriting, (b) methodology of manuscript writing, and (c) practice teaching of manuscript handwriting. Each module contains a statement of the module objective, prerequisites for the module, instructional activities, and pre- and postassessment procedures. Objectives for the three modules, included in the cluster are to enable the teacher intern to (a) formulate a rationale for handwriting and test its appropriateness, (b) analyze the methodology of teaching manuscript handwriting, and (c) synthesize the methodology of teaching manuscript writing and the skill in forming letters by teaching a manuscript handwriting lesson to peers. Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; Georgia

Journal Announcement: RIENOV81

To gather information on the community councils mandated for each Teacher Corps project, this pilot study surveyed 34 project directors and council chairpersons in 24 southeastern projects initiated in 1978 and 1979. The study's questionnaires asked about community council elections, membership, training, leadership, meetings, procedures, interest levels, project involvement, and relationships with the community and the project's policy board. Results showed that all community councils were chosen in community-wide elections, that their members were mostly women and parents, and that they all had standard operating procedures and some involvement in project governance. They also shared similar problems involving council members' attendance, interest, and understanding of the council's role. Those councils started in 1979, however, had consistently higher levels of project and community involvement, council member attendance, and communication with the project policy board than did councils started in 1978. The explanation of these differences may lie in the 1979 councils' earlier elections and training and their use of associate members for broader community representation.

Speeches and resource materials from the 1979 Teacher Corps

"Community Council Chairpersons' Workshop" in Atlanta have been compiled in this sourcebook. Four major speeches, including one by then Teacher Corps Associate Director Robert Ardike, provide the rationale for community involvement in Corps projects, discuss the history and structure of community involvement, offer strategies for leadership skills, and define the concepts of planning, implementation, and evaluation in everyday terms. The resource materials are for use in Corps projects as well as in understanding the conference proceedings. Among the resources are the conference agenda, lists of conference presenters and participants, basic information on the Corps and community-related issues, guides to developing planning and leadership skills, and bibliographies of printed resources. Combining cartoons with brief narratives, this handbook identifies the five steps for developing the community councils mandated for each Teacher Corps project. The five steps are (1) establishing the community council as an organization, (2) identifying short and long-term goals, (3) expanding community involvement, (4) training council members and the Teacher Corps volunteer, and (5) practicing shared governance. Included in the discussion of these steps are Teacher Corps structures and requirements, leadership needs and styles, information needs, council functions, community and Teacher Corps objectives, and ways of building community support. The author states in the opening pages of this paper that community involvement in educational programming, whether for children's learning or teacher training, is an absolute necessity for the development of alternative strategies and solutions for present and future educational problems. The paper reviews some of the ongoing attempts to maintain a broad base of community involvement in teacher education programming. There are discussions of a number of models as typified by selected programs, followed by program descriptions by representatives of the respective programs. The models under consideration are (1) Teacher Corps; (2) Urban/Rural School Development Program; (3) Follow Through Program; (4) Community School Concept (Mott Foundation); and (5) The Home School Institute (Trinity College). A community component matrix is utilized as a guide for study and consideration. The paper ends with the author's conclusions and recommendations. (JA)

This publication features thirteen articles on community involvement. Several programs and individuals concerned with the role of the community in educational development and improvement are discussed. The main points made in all of the articles are: 1) research on community involvement appears limited, and 2) research "experts" are grass roots people and many academicians tend to shun or fear community involvement. Several programs sponsored by the Teacher Corps are also described. (CJ)

Journal Announcement: RIEJAN71

An expressed purpose of the Teacher Corps program is to encourage and assist changes in teacher education directed toward better ways to prepare teachers for work in areas of concentration of low-income families. Too often community involvement in such programs takes place after most decisions and plans have been made. As the 1970-72 Teacher Corps Guidelines are followed, most of the new proposals for training interns will reflect the movement toward competency-based programs. And since the Model Elementary Teacher Education Programs meet this condition, there will be a close cooperation between the Models and Teacher Corps. The effective preparation of Teacher Corps interns requires participation by the local community in the planning of that preparation. The Model Programs, through their various provisions for local responsiveness, provide an excellent vehicle for accomplishing these desired outcomes. As one example, the Georgia Educational Model allocates a segment of the continuing inservice education of the teacher to cooperative planning by the local community, the teacher and the school system. All three of these would also share in the implementation of the proficiency modules, and university credit is designated for these "local-conditions" modules. The past has shown that community participation is vital. The present indicates that exciting new models can effectively facilitate that participation. (JS)

Document Type: CLASSROOM MATERIAL (050)

Journal Announcement: RIENDV74

One of the expressed aims of the Teacher Corps project is to encourage community members to develop their own potential for self-development. The present course on Community-Based Education (CBE) has been constructed with this goal in mind. The central issues of the course are presented in modularized format in an attempt to guide the first steps of corps members already committed to the task of stimulating projects of community development directly related to education. This guidebook, however, is not organized to provide information on the community per se; it is to suggest methods for the collection of such information and to help in the planning of strategies for decision-making and action. Methodologically, the course is addressed to coordinate the aims of the CBE component with the realities of community needs, priorities, and resources in the educational field, and to elucidate the role of the intern in this process. The modules in this manual are designed to shed light on the problems and prospects of community development in South Texas; they have also been sensitized to reflect the perceived needs of depressed rural communities in the Southwest. The main issues, however, derive from the fieldwork experiences of the interns of the Seventh Cycle in Crystal City, Texas and the communities of Zapata County, Texas. (Author/JM)

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIENDV75

This report summarizes the programs and processes used by Sixth and Eighth Cycle Teacher Corps projects at Emporia Kansas State College in the formulation of community-based education programs. Functions of the programs include the following: (a) to broaden the base of educational experiences for children, (b) to involve members of the community in the educational process in order to give credence to the idea that education continues throughout life, (c) to extend and coordinate existing social services to insure that help gets to those who need it but who are uninformed about their options, and (d) to give the broadest possible base to a community's knowledge of what the educational process is by involving community people as teachers and learners. In order to determine community needs, the following methods were employed: (a) application of community dynamics studies of the target communities and their populations, (b) surveys, and (c) development of instruction which was conceived, organized, and implemented by community people. In order to evaluate the program, a survey and discrepancy evaluation were used by the Teacher Corps teams to determine achievement of objectives. (A

This paper provides statements of teacher competencies that are essential for diagnosing reading difficulties of learners. These statements are organized into three orders of teaching competencies. First-order statements describe in broad terms eight kinds of teaching competencies related to diagnosis of reading difficulties. Second-order statements list for each of the first-order statements the next level of specificity of performance. Third-order statements describe the next higher level of specificity of the intended communications of second-order statements. The author states that the lists are incomplete and untested and that more accurate lists will evolve. An 11-item bibliography is included. (PD)

Document Type: TEST, QUESTIONNAIRE (160)  
Journal Announcement: RIEMAY75

This document contains an instrument and procedures designed for the observation of Teacher Corps interns. The instrument covers four areas: (a) academic preparation, instructional preparation, and preparation to meet community needs and expectations; (b) instructional performance and performance in the community; (c) student success and attitudes; and (d) professional behavior. Prior to observation, the observer and intern confer to review the instrument, establish specific areas of observation, and review lesson or unit plans. During the observation the observer should concentrate totally on the performance of the intern and objectively record all observable behavior agreed on during the preobservation conference. After the observation, a session should be held to review thoroughly all data recorded by the observer in order to evaluate the performance of the intern and to determine remediation that may be required. The intern and observer then jointly prepare a summary sheet of the evaluation which emphasizes desirable behavior and levels of competency and includes agreed-on remediation stated in behavioral terms. Language: ENGLISH

Document Type: MISCELLANEDUS (999)

Journal Announcement: RIEDCT74

Competency-based teacher education is a positive force for change which offers educators, university scholars, and students the opportunity to collaborate and to become meaningfully involved in determining the education process. To the culturally and linguistically different, it offers the hope that the monolingual, monocultural nature of American schools will change in ways that will allow them more equal opportunity. Competency-based education has two attractive features for the linguistically and culturally different: (a) it assures fairness because it is a collaborative effort involving the school and the community and (b) its evaluation method is diagnostic and prescriptive rather than judgmental. The Community, Home, Cultural Awareness, and Language Training (CHCALT) model is an example of a competency-based program designed to meet the needs of the linguistically and culturally different. The model was developed for Teacher Corps and is to be implemented in the School of Education at San Diego State University as a program for a Specialist Credential. The CHCALT teacher training model is divided into four basic components: (a) Philosophy of Education for the Culturally and Linguistically Different; (b) Sociocultural Awareness--Home and Community Based; (c) Oral Language and Assessment Techniques; and (d) Diagnostic and Prescriptive Strategies. (HMD)

an overview of competency-based teacher education focusing in particular on the instructional component. An outline of the general characteristics of competency-based programs is followed by a summary of the social and historical antecedents of the competency-based movement. Part two presents a rationale for the development of the competency-based approach in preservice and inservice programs. Sample module clusters are included. The concluding section examines the future of competency-based teacher education and its potential impact on the profession. (JD)

The purposes of the project at Western Kentucky University were a) to serve as a data-collection agency for the National Project, b) to assist the Teacher Corps faculty in developing competency-based instruction, and c) to monitor the effectiveness of the competency-based instruction provided by the teacher education faculty. Three indicators to ascertain the degree of success were employed: a) intern feedback, b) organization of a competency-based curriculum and c) degree of faculty involvement. Measurement instruments included a questionnaire, opinionnaire, and interviews administered to 36 Teacher Corps Interns. Although 11 of the 36 original Teacher Corps Interns terminated their association with the program for various reasons, it is the feeling of the Teacher Corps directors that if the competency-based program had been instituted earlier in the program, it would have met with greater success. Data obtained suggested that the interns developed a positive overall feeling toward competency-based instruction and the program. Intern responses indicated that they "agreed" that competency-based education was superior to traditional education. The project stimulated seven of the teacher education faculty to become involved in competency-based teacher education. Appendixes are included. (Author/MJM)

Journal Announcement: RIEJUL72

This study investigated a competency-based project for instructing teacher corps interns. The specific goals for the project were to develop and use competency-based instructional materials. The specific objectives were a) to bring about role changes for faculty, b) to change from course structure to

instructional modules and varied learning environments, c) to develop a competency-based curriculum with stated objectives and performance criteria, d) to provide for greater interdisciplinary involvement in teacher education programs, and, e) to create more effective prototypic evaluation schema. Interns were asked to respond at three times during their training comparing ideal competency-based programs with traditional programs. In each case the ideal competency-based program was rated much higher. Twice the interns were asked to rate the Oakland University Programs and both times they gave high ratings. Staff members in the Oakland University Teacher Corps Project were asked to review the program's ability to achieve the goals of the project. The response was favorable in every situation. The study attests to the value of competency-based instruction. Appendixes include a response form and an observation sheet used during the study. Also provided is a prospectus for a modular program to present literature to children. (MJM)

This document describes the competency-based teacher education program developed as a joint effort between Glassboro State College and the Camden City School System in a Teacher Corps project. The following competencies for elementary teachers, developed for the project, are listed and described: a) competence in instructional skills, b) competence in learning theory, c) competence in materials and programs, and d) competence in establishing a positive school environment. The competencies are taught through the use of module clusters; the design of module clusters is described. (JA)

This is a script that was designed for a set of mediated materials intended to introduce the concepts which are basic to competency-based teacher education (CBTE). The materials consist of 115 35mm slides, a 22-minute cassette audio tape, and this script. Each page contains two columns, one for visual descriptions, the other for audio. The audio description defines knowledge, product, and performance criteria; compares competency-based programs to traditional programs; defines instructional and expressive objectives; and describes the use of instructional modules. Finally, the audio stresses the advantages of the field-based component of CBTE as opposed to traditional programs. (JA)

Journal Announcement: RIEMAY81

This manual is designed for use in a workshop on leadership training. A discussion is given on the interaction between individuals that produces change in both personal behavior and gradual changes in organizational structures. Theories are presented on methods of bringing about desired change. The major theory under consideration is that of using the human life cycle as an example of gradual change, from the complete immaturity of the infant to the independent maturity of the adult. It is suggested that developing a style of leadership, similar to the parent-child relationship, that takes into consideration the individual growth and development of workers will lead to successful organizational growth and increased personal job satisfaction. Included in this manual are group activities for increasing decision making skills, a leader effectiveness model, and suggested methods of self analysis for leadership potential. (JD)

Document Type: CONFERENCE PAPER (150); RESEARCH REPORT (143)

Geographic Source: U.S.; Texas

Journal Announcement: RIEJUL80

This paper reviews objectives, methodology, and data analysis procedures of a study concerning educational innovation. This research, part of the Procedures for Adopting Educational Innovations (PAEI) Program at the University of Texas at Austin, was undertaken to study interventions and their effects. It was considered a first step in determining what actions can be taken to assist individuals in their efforts at implementing an innovation. The initial objective of the research was to develop a taxonomy of interventions. The particular innovation looked at in the study was a Teacher Corps Project located in a junior high school in a university town. An onsite ethnographer documented interventions at the site and these data were utilized to conceptualize and characterize the emerging taxonomy of interventions. Tentative classification categories were defined using field data. In accomplishing this task, definitional and conceptional issues were the focus of dynamic interactions of the program staff

with each other and with the qualitative and quantitative data. A procedure was developed for reducing the data and at the same time isolating each intervention for further study. (Author/JM)

Language: ENGLISH

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEFEB77

The Western Washington State College Teacher Corps Project (WWSC/TC) has developed a teacher designed inservice model as part of its Ninth Cycle program. The model is based on a collaborative approach to inservice education, in which the teacher is able to draw on the resources of an institution of higher learning, a local education association, and a teacher association for design, implementation, and evaluation of his/her inservice model. The purpose of this document is to describe the preparation and present state-of-the-art of the cost benefit model for the inservice project. The term "cost" signifies the specific dollar value that might be assigned to an activity or material. "Benefit" and "liability" indicate value judgments placed on institution, training, environment, or programs of interest to teachers and/or administrators, for which a dollar amount cannot be assigned. The document (1) reviews the cost, benefit, and liability model for the individual teacher contracts and discusses budget and funding sources; (2) reviews cost, benefits, and liabilities for the inservice consortium, with a discussion of its fundings and functions; (3) reports on some initial cost studies in which the models have been applied; and (4) comments on the application of cost studies to the WWSC/TC model. Three appendices are included (1) a sample teacher contract; (2) a catalogue description for a problem-solving practicum in action research to identify specific needs of a target school; and (3) a general fund expenditure classification for the model. (MB)

This course syllabus is one of over 80 developed and written by the Henry County School System (Tennessee) as part of a Teacher Corps demonstration project. These syllabi provide specific descriptions of what is to be learned and at what level the student is expected to perform. The art course described here is available for students who have completed two semesters of art or its equivalent. The time frame for the lesson units is: (1) basic design, five weeks; (2) drawing, three weeks; (3) acrylic and oil painting, five to six weeks; (4) sculpture, three weeks; (5) ceramics, six weeks; (6) printmaking, three weeks; (7) commercial design and graphics, three weeks; (8) textiles and weaving, four weeks; and (9) art history and appreciation, one to two weeks. Unit objectives, student responsibilities, and learning activities are outlined, as well as equipment, media materials, and community resources for additional supplies. The student evaluation procedure is explained, and includes classroom observation, discussion, and tests. (FG)

DESCRIPTION (141)

Geographic Source: U.S.; Tennessee

Journal Announcement: RIEFEB82

Teachers in the Henry County Public School System (Tennessee) developed and wrote over 80 course syllabi for most subject areas taught in grades 7-12 for a Teacher Corps demonstration project. The intent of the project was to inform students and parents of specific requirements in each subject at each grade level. This outline is written for a band course for which the prerequisite is that the student have some playing experience. The course objectives include developing the student's ability to work with a large group and perform increasingly difficult music. By the end of the year, the student should achieve a minimum level of competence in recognizing music vocabulary, the principle forms of music, and the different instruments, and be able to produce a rich, full tone with reasonable facility and accuracy. The course requirements, learning materials, and learning activities are listed, including voluntary and advanced studies. The criteria and methods for student evaluation are reported. (FG)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEFEB77

The Inservice Teacher Education (ISTE) Concepts Study was designed to study the data needs in this area and to conceptualize the area in such a way that the Teacher Corps could guide its activities more effectively in light of the facts and opinions of the field. Report IV deals with the problems of creative authority and collaboration. Eight papers are presented, each giving a different perspective on the development of collaborative models. Sam J. Yarger describes a complex model for identifying populations and determining goals in relation to a variety of issues. James Boyer presents a model that can be used to sort out the varieties of inservice teacher education and its governance focusing on the need for multicultural education. Kenneth R. Howey presents an analysis of a teacher center developed by the Minneapolis Public Schools and the University of Minnesota to prepare teachers to operate in open classrooms. A group of papers deals with three aspects of social change which are becoming increasingly important to the creation of inservice teacher education programs: job sharing, current and pending legislation; and the problems generated by the extension of the school downward to include younger children. Papers representing the views of the American Federation of Teachers and the National Education Association regarding inservice teacher education are also presented. (JMN)

Journal Announcement: RIEMAR70

This collection of 44 program descriptions, compiled from reports solicited from directors throughout the nation, is intended as a reference source on a variety of alternative approaches to the training of various educational personnel. Each entry includes listing of collaborating agencies, director's address, and funding sources (most were at least partially funded through the U.S. Office of Education). Eight descriptions are in the "Basic Studies" category including programs for teachers of English as a second language, industrial arts, math and science, music, and social studies; several focus on disadvantaged groups. Nine are in the "Special Projects" category, several on specific training techniques (e.g., Mobilabs, minicourse, team internship). Three report Teacher Corps programs for specific trainee groups. One of two descriptions fall into each of these categories: Early Childhood, Educational Administration, Trainers of Teacher Trainers, Special Education, Support Personnel, Teacher Improvement through Curriculum Development, Teacher Leadership Development, and Vocational and Technical Education. An index provides further breakdown into specific project focuses or approaches, e.g., differentiated staffing, urban and inner-city, community experience, sensitivity training, media. (JS)

Document Type: PROJECT DESCRIPTION (141)

Geographic Source: U.S.: Florida

Journal Announcement: RIEMAR80

In compliance with the Teacher Education Center Act of 1973 (Section 231.608, Florida Statutes), a select group of Florida educators, Department of Education members, and State Council on Teacher Education Centers (TEC's) representatives developed proposed criteria for both the evaluation of teacher centers and evaluation of the evaluation methods. The proposed criteria explored four areas of TEC assessment: (1) the

rationale behind TEC's; (2) the extent of collaboration and participation of TEC users; (3) the description of programs or activities of TEC's; and (4) the adequacy and availability of resources a given TEC may or may not provide. This document describes the theory and design of the evaluation methods and criteria and includes discussion of the conceptual views involved in the Florida TEC program. A bibliography of 13 sources is appended. (LH)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEFEB77

The eight papers in the report are tied together by the theme of pluralism and social change in an attempt to determine information needs in the area of inservice teacher education (ISTE) and to identify the contemporary issues surrounding ISTE. The first three papers describe case studies of substantial efforts in inservice education: a thirty-year child study movement devoted to the proposition that there are enormous individual differences among children which can be fully appreciated only in the context of each child's total personality; the Urban/Rural Program efforts to generate community-oriented inservice teacher training programs; and the attempt of Montgomery County, Maryland, public schools to mount a comprehensive teacher education program that would represent the needs both of the district and of individual teachers. Two papers address the future: a description of alternative conceptions and definitions of inservice teacher education and suggested languages which would permit us to talk coherently with one another using a wide variety of concepts; and a speculation on the meaning of general cultural change. Three papers explore multicultural education. (JMF)

This module is designed to assist a participant in evolving the organization of a value system that supports competency-based teacher education (CBTE). The enabling objectives for this module are as follows: (a) the participant recognizes the elements of CBTE by entering into discussions about new ideas in teacher education and by responding willingly and with pleasure to dialogue about changes in teacher education and (b) the participant values the elements of CBTE by advocating CBTE as a basis for evolving change in teacher education and by actively supporting the merits of CBTE. The terminal objective of this module is that the participant will demonstrate commitment to CBTE by making a statement which incorporates the major concepts of CBTE and by expressing a preference for participation in CBTE efforts and a willingness to contribute to its growth and development. (The document includes prerequisites for the module; a description; a flow chart; steps for completing the module, including reading assignments; and a description of enabling activities, pre- and postassessment, and remediation.) Teachers are continuously faced with decisions, and often there is no one correct solution or answer. Therefore it is important for the teacher to be able to examine a situation and consider many alternative solutions before making a decision. This module is designed to give the learner an opportunity to consider situations and generate alternatives through various activities, including group discussion, presentation of a video tape which the learner has made, and participation in teaching situations and teaching decisions. The purpose of this learning module developed at the University of Houston is to aid the prospective teacher in defining problems so that decision making can be handled in a flexible manner. The student is presented with five situations and asked to define the problem from the point of view of the student, the teacher, and the parent. The module has no prerequisites, no enabling objectives, and no preassessment procedures. The terminal objective is exploratory in nature. (HMD)

This competency-based teacher education module focuses on decision making. It is stated that in this module the participant will make a tentative commitment toward a certain course of action, receive feedback from his/her surroundings and peers as to the adequacy and appropriateness of the commitment, then reshapes the commitment into a different form as he/she learns more about himself/herself and environment. The module centers around an activity called the "In-Basket." In this activity the participant is given information about an imaginary situation through a series of letters, memos, notes, and other material. He or she is then asked to make a decision from a teacher's point of view. (JA)

This document focuses on the role of the curriculum specialist as an advisor to interns in their attempts to acquire and master teaching skills. The curriculum specialist has responsibility for the training of interns and for determining if the intern has met all of the teaching competency objectives. The major portion of the document is devoted to a chart which presents five teaching competencies, their specific objectives, related courses of study, intern activities, and the activities of the curriculum specialist in support of the intern. The five competencies state that interns will be able to: (a) facilitate human relations in all areas of their professional responsibility, (b) demonstrate mastery of knowledge necessary to implement effective instruction, (c) plan and implement instruction effectively to meet the educational needs of their students, (d) evaluate their attainment of specified teaching competencies based on student achievement, and (e) demonstrate knowledge and use of research techniques necessary to implement research objectives. Journal Announcement: RIEDEC70

This document reports the 2-year Cycle II Teacher Corps program in which San Diego State College and three school districts (San Diego Unified, Santee, and Escondido) cooperated to develop dedicated teachers (with M.A. degrees) prepared to teach in disadvantaged communities. Objectives of the program are listed, including that of meeting needs of the communities containing low-income populations of rural Mexican-American farm workers and inner-city Negroes and Western Europeans. The evaluation section of the report summarizes assessments of professional knowledge, teacher

attitude, and general attitude of the corpsmen during and at the end of the program. Another section outlines changes or innovations brought about by the program: teaching and curriculum changes in the public schools and in the college and institutional changes in course development, degree program, certification, admission requirements, and community links. Two sections describe the program in the communities and schools in which interns worked, noting suggestions for improvement. Included are interns' descriptions of the communities; an outline of community work within the program schedule (preservice, inservice first year, interim summer, and inservice second year); and descriptions of corpsmen's inservice school involvement in each of six schools. Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEAPR76

This is the final report of the Cycle 8 Teacher Corps Project of the University of Iowa. The project was designed for 20 bilingual interns, all third and fourth year undergraduates. The cooperating teachers were selected upon the recommendation of local Superintendents and principals. The planning period of the program was August 1973 to May 1974. The interns completed their preservice in August 1974 and immediately began the inservice period working in various communities. Each intern experienced working in both the lower and upper elementary grades. During the inservice, the interns were involved in developing proposals for community projects. During the 1975 summer session, they completed all work required for the bachelor's degree and/or certification. As a result of the project, competency-based and field-based teacher training programs were seen to be viable approaches to teacher education. The project appeared to have an impact on the schools and communities served. (Appended to this report are an excerpt from "An Analysis of Extended Planning Periods for Teacher Corps Projects," module clusters; a list of advisory committee members, interns, and cooperating teachers; orientation activities; grading procedures and an evaluation form; a letter of explanation regarding Teacher Corps grading procedures; faculty summaries of Teacher Corps modules; and program evaluation forms.) Journal Announcement: RIENOV77

The collaborative procedures used to derive the instructional objectives for Arizona State University's Teacher Corps training programs for inservice teachers, preservice teachers, and teacher aides were time consuming and costly, but have resulted in increased respect and better working relationships between teachers, parents, and teacher educators. The instructional objectives developed by teachers, parents, teacher interns, and program developmental staff included observable teacher performance and usually included the qualitative characteristics of an acceptable performance. Objectives were based on teacher skills in three areas: (1) instructional skills, (2) personal/interpersonal skills, and (3) setting related skills. Appended are: (1) a list of skills developed collaboratively, (2) the relationship of skills to objectives; and (3) teacher competencies review checklist. (STS)

This report is the first of two volumes concerning the 1977 Teacher Corps Corps Member Training Institute (CMTI). Volume I is a description of CMTI as it occurred; Volume II is an analysis of the data. The information is divided into six general categories: 1) a profile and description of the participants in the summer institute; 2) a discussion of the various modes and organizational concepts of the institute, and the degree of application those concepts enjoyed in relation to schools, communities, and multicultural settings emphasized by the CMTI; 3) the impact of CMTI on the participants' organizational concepts, perspectives on multiculturalism, and general outlook; 4) a chronicle of the interpersonal relationships which evolved during the

institute; 5) the participants' assessment of the CMTI experience; and 6) the impact of CMTI on participants' local projects. (LH)

Journal Announcement: RIEFEB75

This eight-part document describes a process of developing and implementing a competency-based teacher education program that considers the present teacher education program and provides for the translation of courses in a competency mode. This approach involves a delivery system built around the module, module cluster, and components. Part 1 describes the rationale for using the module cluster approach. Part 2 examines the entire system from modules through components and how these interrelate to form a program. Part 3 examines the format for a module and explains the different types of modules that can be developed and how modules can be sequenced to move from the cognitive to the consequential. Part 4 suggests one way to move from goals to objectives to modules. Part 5 focuses on the need for a taxonomy of goals to produce a program that meets the gestalt of teaching and provides an effective guidance system. Part 6 focuses on the supportive services to implement a modular approach and some of the problems that may arise. Part 7 provides sample module clusters to demonstrate an ongoing product. Part 8 lists materials available to assist in the development of a program. (PD)

The University of Georgia Office of Professional Laboratory Experiences has developed several different programs to provide practical experience for future teachers. The School Practicum is a program in which students spend several weeks in the beginning of the school year observing and participating in a local public school prior to the opening of the college's fall quarter. The Work-Study Program for Elementary Teachers provides full-time employment as teacher aides for students during one quarter of their sophomore and junior years. The Athens Unit of the Georgia Retardation Center provides clinical experiences for students in 15 disciplines in the field of mental retardation. The Adult

Education Program for Prison Inmates utilizes a Georgia state prison as a laboratory facility for graduate students training as student teachers. The Teacher Corps Program uses community involvement to help interns gain experience in teaching the disadvantaged. The development of Professional Laboratory Experience Centers is a cooperative effort with other colleges and the Atlanta school systems to provide more flexible and intensive practical experiences for education students. The Tutorial Enrichment Program is designed to provide early exposure to the realities of teaching. The Supervising Teacher Program is a series of three inservice courses which has now been recognized by the State Department of Education as a requirement for supervising teachers. (RT)

This cognitive/performance module is designed to teach the use of diagnostic techniques beyond those techniques provided by traditional mass testing. Terminal objectives include: (a) identifying a learning goal, (b) identifying a child who cannot successfully accomplish the learning goal, (c) diagnosing the child's learning strengths and weaknesses and presenting these to a team of peers, and (d) trying instructional activities with the child and providing feedback to peers who designed the activities. To accomplish these objectives, participants investigate the principles underlying assessment and evaluation, survey the instruments of assessment and evaluation currently used in the schools, investigate alternative ways of assessing and evaluating, and explore the language of assessment and evaluation. Learning activities include reading, film viewing, participating in seminars and experimental demonstrations, assessing, evaluating, and interviewing. A flow chart illustrating specific steps of the module is included. (PD)

This module cluster is designed to enable the interns to become teacher-diagnostic analysts on the emotional level. Diagnosis has been conventionally used to evaluate the learner. The objectives herein are designed to initiate a process that makes a better match between the learner and the instructional activities by utilizing the diagnostic data to determine what the instructional activities will be. The module cluster contains three modules, each of which is related to the overall objectives of the cluster. The modules are as follows: (a) The Psychology of Adjustment Vocabulary; (b) Diagnostic Teacher Strategy--Games; and (c) Diagnostic Teacher Strategy--Children's Drawings. For each module,

objectives, preassessment procedures, instructional activities, and postassessment and remediation activities are listed. (JA)

This booklet, the second in a series of eight describing the tenth-cycle Teacher Corps project of the University of Nebraska-Lincoln and the Lincoln Public School System, describes the diagnostic-prescriptive (D-P) instructional model used as the basic teaching process in the project. Key concepts in the D-P approach to teaching are presented, and the use of the process in relation to the competency based teacher education model described in booklet four is described. Steps in implementing the D-P teaching process are identified as: (1) diagnosing learner needs; (2) establishing desired learning outcomes; (3) planning and implementing prescriptions; and (4) assessing learning outcomes and program results. Record keeping in the D-P process is performed using two profiles: an individual learner profile and a group profile. Guidelines for their use are presented, and examples from each part of the two profiles are presented in the appendices. (MJB)

Document Type: EVALUATIVE REPRT (142)

Geographic Source: U.S.; New Hampshire

Journal Announcement: RIEMAR81

A Teacher Corps project at the University of Southern Maine College of Education consisted of a competency-based teacher education program including components in special education, human relations, reading, and language development. The responses of 24 former participants indicate the impact of the program on the participants, their work, in the schools, and at the university. The area of attitudes, traditionally considered the most difficult to change, was the central area of impact for most of the participants. Differences that participants brought to schools and children were: an openness to divergence, flexibility, self-confidence, concern for the individual, and willingness to work in teams and groups. At the university, the undergraduate and graduate teacher education programs remained unchanged. The experimental program and its faculty were not integrated into the curricula. The project seems to have made a difference in the training and the later work of participants, but has made no difference at the university. (CJ)

The second approach involved performance contracting in which teachers, working in teams, submitted bids to the school board, thereby competing with colleagues for contracts to accomplish specified teaching tasks with results measurable in terms of student achievement. (PD)

**Differentiated Staffing: The Second Generation.**

Mann, Peter B.

16p.

EDRS Price - MF01/PC01 Plus Postage.

Language: ENGLISH

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEMAY75

This paper describes two approaches to differentiated staffing. The first approach involved reorganizing teacher staffing by creating a career ladder to permit hierarchical staffing without freezing faculty in positions that would limit growth, fix rewards, and destroy morale. The career ladder allowed the use of teachers and paraprofessionals in teams organized to provide different services to students, with roles determined by the learning task at hand and the students' need for mastering that task. This approach tended to result in a rigid hierarchy, which assumed that certain teacher functions are always of greater importance than others. However, student needs shift constantly, and an effective teaching team should shift accordingly, which is the objective of the second approach to differentiated staffing.

Journal Announcement: RIEJUN72

This report deals with dissemination efforts associated with the Ohio Elementary Teacher Education Model project located at the University of Toledo. A necessary prerequisite for development activities is an adequate expository base upon which a model can be built. A face-to-face confrontation is then needed between those who participated in this process and those interested in developing the model for their own situations. The dissemination activities fall into three groups: 1) Twelve non-Ohio universities and colleges were visited by staff members who explained the Ohio model and then discussed with decision makers the necessary efforts and anticipated problems in developing the model. Results of this dissemination varied, depending on the resources available to the individual institutions. 2) Dissemination of Ohio state-supported universities was an ongoing process with a 3-day conference in Toledo at the conclusion of the second phase of the project. Follow-up institutes were held to work on actual program development and the revision of re-sequencing of parts of the Ohio Model. 3) Dissemination efforts were also conducted with other agencies, including the Teacher Corps, and at regional meetings of the American Association of Colleges for Teacher Education. Additional dissemination is needed to bring the Model well into the development and implementation stages. (MBM)

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEFEB77

This collection of papers is an attempt to document the living-learning spirit of the New York State Teacher Corps Network staff development program meetings. These Network meetings are characterized by three types of activities: (1) presentations and/or workshops conducted by outside consultants; (2) problem identification and strategy sessions to encourage development of individual Teacher Corps projects and to enhance collaboration among the various projects in the state; and (3) formal and informal sharing of knowledge and skills by project staff members from around the state. Accordingly, this publication begins with four articles that emanate from consultant presentations, each relating in some way to the present Teacher Corps emphasis on in-service teacher education: "Teacher Corps and In-service Teacher Education"; "Educational Needs Assessment--The State of the Scene"; "Toward More Effective Job-Embedded In-service Teacher Education"; and "Legal Issues for the Handicapped: National and State." A second section contains a series of reports on sessions at which collaborative efforts were used to identify problems and develop appropriate strategies: "Some Thoughts on the Change Process and Emerging Teacher Corps Roles"; "Fostering Change"; "Reinforcing the Infrastructure of the Regular Classroom"; and "Linking Educational Environments." A final section presents seven papers authored by Teacher Corps staff members which reflect many of the dimensions that help to make Teacher Corps the change agent that it is. Each section is prefaced with a series of introductory notes. All of the papers address dynamics associated with attempts to change teacher education in line with the goals, needs, and aspirations of our society. (MM)

The Greenville Teacher Corps project developed a model demonstration of a field based teacher education program designed to provide both preservice and inservice training to a rural and isolated region in northern Maine. The project was designed to be responsive to local needs. Collaboration and participation of all constituents was central to the operation of the project. Major project goals included facilitating linkages between the University and the Greenville community; enabling the University to develop a field based graduate education model; and developing and installing a K-12 individualized instructional program. Accomplishments of the project are clearly evident. The Teacher Corps project was directly responsible for the delivery of a number of important services. (JN)

This paper discusses a role group sharing meeting held July 30-31, 1979 in Windsor, Connecticut, and attended by documentors and evaluators. Examined, in documentation form, are issues and learnings from the sharing meeting and an analysis of the design of the meeting, which was a pilot for other network role group meetings anticipated during the next year. A copy of the agenda is reproduced together with an evaluation of the meeting. (Author/LD)

Journal Announcement: RIEAUG77

This paper describes a model of a collaborative inservice education program based on the work of a Teacher Corps Project sponsored jointly by the School of Education at Stanford University and a neighboring junior high school in the San Jose Unified School District. In this model, the power to determine the content of the inservice program resides with the teachers and, because literature reviews have shown that teachers themselves are better inservice educators than administrators and professors, the teachers are also the inservice educators. A case study is used to describe the model and provides a picture of how collaboration between universities and schools can and did take place. Implementation of the model involves: (1) briefing the relevant community on the inservice topic, outlining its dimensions, and correcting any misconceptions; (2) identification of needs by teachers, administrators, parents, students, and inservice educators; (3) summarizing and cataloging pertinent literature; (4) obtaining additional information from practitioners in the field; (5) selecting and

developing appropriate policies; (6) adopting policies; (7) evaluating policies; (8) disseminating information and writing articles for publication. (MM)

Journal Announcement: RIENOV74

This document reviews problems, alternatives, and recent developments in the education of prisoners. The authors state as a guiding argument that while inmates are severely handicapped according to traditional academic measures, in terms of the current movement in education towards individualized instruction nowhere is there a more fertile ground for receptive students than in correctional institutions. The following problems are cited: the lack of programs to prepare inmates for socially constructive roles in communities; job discrimination against former inmates (the New Careers program for rehabilitated offenders is discussed as a solution for this); and the poverty background of many prisoners. The document reports specifically on work release programs; the prevention of juvenile delinquency through education; vocational, career, and college programs; and the education and certification of teachers of inmates. The extensive appendixes are: (a) A Summary of Teacher Corps Corrections Projects, 1968-74; (b) College Programs in State and Federal Penal Institutions (listed by state); and (c) National Survey of Postsecondary Education Programs for Incarcerated Offenders. Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEAUG78

The content of this work is based upon the proceedings and outcomes of the Workshop on Multicultural Education held in the State of Washington. This workshop was designed to present critical substantive material, examine the decision making process of the schools, and identify and teach skills and techniques for inservice staff training. The advantages of cultural diversity and the crucial role of educators in imparting the values and diversity implied by cultural pluralism were stressed throughout the workshop. Administrative decisions, educational planning, and accountability issues were addressed in the context of designing multicultural education programs. The primary goal of inservice programs was identified as increased personal awareness and sensitivity. Cultural influences on teaching and learning styles were discussed in terms of their effect on reaching this goal. An annotated bibliography of works on multicultural education as well as samples of biocognitive measurement instruments, are included. (Author/GC)

Journal Announcement: RIEDEC70

This booklet contains descriptions of the programs under the Education Professions Development Act (EPDA) administered by the Bureau of Educational Personnel Development during fiscal year 1971 (July 1, 1970 to June 30, 1971). Material on each of the 14 programs includes a list of objectives, an outline of eligibility requirements for applicants and participants, brief descriptions of program characteristics, and an address to which letters of interest or inquiry may be directed. The programs are organized under four headings: (1) Programs to

improve the education of children from low-income families: Career Opportunities Program, Teacher Corps, and Urban/Rural School Development Program; 2) Programs to reinforce the preparation of all educational personnel: Training of Teacher Trainers Program and Training Complexes Program; 3) Programs to help meet critical qualitative and quantitative shortages of educational personnel: Bilingual Education Program; Educational Leadership Program, Early Childhood Program, Personnel Services Staff Program, Special Education Program, Vocational Education Personnel Program, and State Grants Program; 4) Programs to meet special needs for education personnel as they arise and to develop and test solutions for those needs: School Personnel Utilization Program and Teacher Development for Desegregating Schools Program. Also included is the Media Specialists Program administered by the Bureau of Libraries and Educational Technology. (JS)

Document Type: POSITION PAPER (120); COLLECTION (020)

Geographic Source: U.S.; District of Columbia

Journal Announcement: RIEOCT81

Growing out of a meeting to explore alternative directions for community-based education in the Teacher Corps Program, the three papers in this document provide insight into how neighborhood involvement, the coordination and collaborative delivery of human services, and the utilization of political processes can be used to strengthen a community's participation in its educational system. A study of neighborhoods is important to an understanding of how they behave and how they can be changed to solve human problems and to facilitate interaction between school personnel and community members. The Teacher Corps community council can play a central role in coordinating human service delivery and in building a political base to implement desired programs. The council can also encourage the development of community support systems as an important adjunct to the formal human service network. To be most effective, each Teacher Corps project should analyze the political structure of the community it serves and determine how this information can be beneficially used. Such analysis should encompass both formal and informal structures. A brief annotated bibliography is included. (Author/WD)

Document Type: PROJECT DESCRIPTION (141); EVALUATIVE REPORT (142); CONFERENCE PAPER (150)

Geographic Source: U.S.; Texas

Journal Announcement: RIE0CT81

Community education programs have seldom presented quantitative data to validate the usefulness of the program. This study was an attempt to establish a beginning community education program while planning for quantitative evaluation from the initiation of the project. Based on a group process, community residents were involved in the development of a 49-item Likert-formatted survey instrument which was administered to a one percent, random, stratified sample of a southwestern metropolitan city. The instrument dealt with community concerns about education. Based on the factor analysis, analysis of variance, Scheffe tests, and Spearman Rho rank order correlations among teacher, parent, and community respondent groups, a community education plan was designed for the elementary school in the area. One of the four components developed was analyzed in detail using a separate-sample pretest-posttest control group-design to test eight hypotheses regarding the effect of the program on parental perceptions of the school. The results indicated that community education can be an effective force in modifying parental perceptions of the school in a positive direction. (Author/KC)

Language: ENGLISH

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEMAY75

This paper describes a program designed to prepare teachers to teach reading. Nine general objectives and 10 categories of behavioral objectives are listed. For each objective within the program, the student will have at least two choices of instructional modes. In addition, students may plan their activities for achieving a stated objective by negotiating with the professor. Complete development of each instructional module requires the production of a prospectus, preassessment procedures, instructional options, and postassessment

procedures. Diagrams that illustrate the projected sequence of a student through the course, the basic conceptual design of the modules, and the student's route through a module are included. (PD)

Geographic Source: U.S.; Nebraska

Journal Announcement: RIEAUG80

This report is a description and analysis of Teacher Corps' Pilot Trainer Workshops (PTW) conducted in July, 1977. The volume serves two purposes: First, it provides descriptive information to those parties who may be involved in the delivery of programs similar to the Teacher Corps project, as well as providing specific recommendations regarding strategies for program design and implementation. Second, questions are raised and general suggestions are provided for persons responsible for policy decisions regarding Teacher Corps' approach to providing training for education practitioners. The Teacher Corps' project is based on the principle that the study of organizational theory is critical to the effective performance of professional educators, an attitude reflected in the content of this report. Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEAPR77

This document reports the first-year activities of Teacher Corps projects demonstrating the training framework entitled, Adaptation of Research Findings. These projects incorporate into their design the results of research, empirical practices and processes that have proven effective and relevant to the educational processes for schools serving low-income populations. Chapter I provides an overview. Chapter II presents an in-depth look at the evaluation process and discusses the differences between impact and process evaluations. A comparison is made among projects that focus on either student outcomes, teacher outcomes, or institutional outcomes, and the implications of these different foci are discussed. Considerations of where to begin to conceptualize the evaluation process are presented in Chapter III. The fourth chapter discusses the design of impact evaluation studies and presents some alternative approaches to evaluation such as quasi-experimental designs and the establishment of criterion standards. Chapter V discusses the design and selection of evaluation instruments. A variety of instruments are considered as well as behavioral indicators that can be used to evaluate project outcomes. Chapter VI argues that the process of evaluating ongoing activities during the course of the project is of critical importance both to the management of the project and to the eventual sharing of the project's outcomes. The importance of careful preparation of data gathered during the evaluation process is considered in Chapter VII, and the importance of the organization, display, and interpretation of data in order to maximize usefulness is emphasized. Chapter VIII focuses on some of the major problems that arise in the impact evaluation process. The final chapter summarizes the importance of both process and impact evaluations. (MM)

Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; Nebraska

Journal Announcement: RIEAUG80

These technical papers examine alternative approaches to the evaluation of inservice and preservice training programs for Teacher Corps interns. The first paper explores the theoretical and practical consequences in conceptualizing teacher education as a socialization process. In the second, the suggestion is made that to understand the socializing impact of a teacher training event, it may be necessary to have as full a description of that event as possible, and offers ways in which this may be obtained. An argument is made in the third paper that current standard evaluation methods are not appropriate for illuminating many features of an event in teacher education. The final paper explores the problems experienced by contractual evaluators of teacher education programs, raising the ethical and political questions with which they are faced. (JD)

Journal Announcement: RIENOV72

This report on the NCERD/Teacher Corps competency-based teacher education project (CBTE) is an assessment of the extent to which the project's objectives were realized. Two methods of inquiry were employed. The principal method of inquiry was interviewing key participants on the Teacher Corps program. The secondary method employed was a review and analysis of project records, proposals, memoranda, and reports. The project's principal goals and progress toward those goals were assessed as follows: the goal of project clarification was fully realized by July 1971; the goals of CBTE program implementation was fully realized in the San Francisco State College Teacher Corps Cycle 5 as of August 1971; and the goal of collaboration in project operations was fully realized after appropriate revisions in the decision making process were made. It was recommended that future CBTE projects of this type be funded on a fee per student successfully trained basis. (Related document is SP 005 814.) (Author/MJM)

Journal Announcement: RIENOV72

This report describes a 1-year effort at San Francisco State College to incorporate as part of a Cycle 5 Teacher Corps Project some aspects of competency-based education in the instruction of the Teacher Corps interns. A 3-hour weekly course in curriculum and instruction occurring for the entire 1970-71 academic year, served as the vehicle of

competency-based instruction. Intern and staff dissatisfaction with the initially traditional nature of the course resulted in a number of innovative changes. The most noticeable of which being the formation of cluster-development teams, consisting of both interns and staff members. These teams worked jointly to design instructional modules and clusters (groups of modules), and to collect, store, and organize the material necessary for the implementation of these modules. Intern attitudes toward the Teacher Corps program were assessed both at the beginning and end of the 1970-71 academic year. A number of recommendations for developing competency-based instructional programs are given. An 18-item bibliography and appendixes are included. (Related document SP 005 815.) (Author)

Journal Announcement: RIEJUL71

Evaluation of the preservice portion (summer 1969) of the 2-year fourth cycle Teacher Corps Program at the University of Pittsburgh involved 1) determination of objectives for the preservice program; 2) literature and document search; 3) interviews with interns, instructional consultants, corps administrators and university instructors, public school personnel, and community residents; 4) observation of interns and instructional consultants in their schools and observation of the selection and screening process for interns and instructional consultants; and 5) questionnaires. The 8-week preservice program for 50 interns working with eight instructional consultants included 1 week devoted to orientation and intercultural sensitivity training; 6 weeks of student teaching, community seminar, reading and arithmetic methods seminars, and field experiences including seminars on microteaching, educational objectives, and analysis of teaching; and one week of assessment. (Included are behavioral objectives and criteria for the program with evaluation of attainment; summary evaluation of various program phases; and recommendations regarding planning, screening, intercultural training workshop, placement, program, and management.) Journal Announcement: RIESEP72

This study is a systematic follow-up, undertaken by the Chicago Consortium, to evaluate the classroom performance of its graduates. Inferences about their effectiveness were made through assessments of their observed behavior, using the Classroom Observation Record (COR) and the Flanders Interaction Analysis Categories (FIAC). Trained observers observed each graduate intern two times. They also obtained data on two control groups matched on important variables for comparative purposes: a) a random selection of teachers with similar experience, and b) experienced teachers who were designated superior. Outcomes of the study are as follows: no significant differences were found between the graduate interns and the two control groups on the FIAC. Significant differences, ranking superior teachers first and graduate interns second, were found on major variables of the COR; the most striking result was the sameness of the three study groups on the FIAC. Also noteworthy was the inability of superior teachers to display any of the distinguishing features of other superior groups cited in the research. The feasibility of using school system personnel as observers was demonstrated. School system cooperation, although difficult to give in the normal functioning of the schools, was excellent. Further research and innovative programs are recommended. A 32-item bibliography, tables, figures, and appendixes are included. (Author/MJM)

Descriptive characteristics of participants in the 1978 Teacher Corps Conference are first presented in this report. This data includes information on role in the teacher corps project, age, race, and geographic location. The report discusses participants' overall assessments of the sessions they attended daily. The major events of the conference are described, as well as how each event and its component sessions were judged by the participants and how they were selected for follow-up at the project level. The overall evaluations of the entire conference as seen in the post conference ratings of success are presented. A section is included dealing with interpretations of the evaluation data and recommendations for future national conferences. (Author/JD)

Journal Announcement: RIEJAN79

The monograph presents seven papers which challenge the extent to which experiential backgrounds are used in the context of the school's teaching-learning process. The first paper discusses mind sets, multi-cultural variants and mastery learning, maintaining that many minority students are victims of educational mind sets. Next, past and present research on how black children learn, and what can be done to educate them more effectively are discussed. The third paper addresses selected problems experienced by most Chicano children upon entering the school culture and presents several essential factors that, if used, will help teachers design educational approaches to better meet the needs of these students. The next paper discusses lifestyles of Native Americans from rural-reservation environments; compares achievement and intelligence potential of Native and non-Native American children; and maintains that there is a direct relationship between Native American culture and learning styles. The fifth paper suggests that differential learning styles are more related to economic status than to ethnic status and that the problems faced by poor whites are not related to learning styles per se. Working from Old World antecedents, Chinese values transformed and created on American shores are examined in the next paper. Two learning styles are distinguished from the characterological types that have emerged from these experiences: the atavistic (warrior) and the orthodox (victim). Finally, a schema for developing instructional units for diverse teaching-learning styles within multicultural classroom settings is given. (Author/NQ)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEJAN78

This report is one in a series of ten documents examining the experiences of New York State in the transition from traditional to competency based teacher education. This volume presents data on institutional perceptions of problems relating to program development. Institutions of higher education and the State Education Department perceptions are reported and compared. An additional dimension of the report is an analysis of the State Education Department's proposal review process. Background, statement of the problem, and purpose of the research are discussed in an introductory section. The body of data is presented in three phases: Phase I--elements of program development; Phase II--State Education Department program review process and perceptions of elements of program development; and Phase III--comparison of these perceptions. Instrumentation and correspondence are presented in the appendices. (MJB)

Journal Announcement: RIEJAN78

This report sought to identify, describe, and compare the characteristics of technical assistance as they related to the process of meeting the New York State Department of Education mandate for the establishment of performance based teacher education programs (PBTE). Research questions dealt with (1) the knowledge levels of participants regarding PBTE before and after working on program development, (2) difference in knowledge levels of those who received one-year program registration as opposed to those who received four-year program registration, (3) usefulness of technical assistance for the different categories of respondents. In relating four- and/or one-year program registration to the change in knowledge levels, and the usefulness of seven types of assistance (consultants, internal and external training, conferences, general and skill training materials, and other types) to knowledge of the concept of PBTE, knowledge of the New York State mandate, and knowledge of program preparation, the researchers identified certain trends. Although schools receiving one-year registration indicated less knowledge of the PBTE concept at the outset, they also reported knowing more about it by the end of program development than did participants from schools receiving four-year registration. In general, there was very little difference shown in the usefulness of technical assistance between large and small institutions. Internal training was the most useful type of technical assistance identified. The report concluded that institutions whose program was registered for one year spent more time and gathered more information in seeking to prepare themselves to meet state requirements but, in doing so, seemingly spread their resources widely and dispersed the focus of the project. Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEJAN78

This report examines consortia leadership factors in institutions of higher education (IHE) responding to a New York, State Department of Education mandate for performance based teacher education (PBTE). To assess the effect of leadership on program registration, the following questions were investigated: (1) the nature of leadership within and across the task force, policy board, and IHE in terms of leaders' commitment to PBTE, to the design of a PBTE program, to provisions for logistical and psychological support, and to frequency of meeting with his group or individual members; (2) the similarities and dissimilarities in leadership styles, viewed across the varied categories of IHE size and type, program registration respondent group, and program type; (3) the relationship, if any, between the various elements of leadership; and (4) the set of leadership variables most strongly related to program design being accepted for a four year rather than a one-year period. Analysis of the data is presented, and the conclusion is drawn that leaders generally took an active role in the work of their groups, contributed both logistical and psychological support, and that good leadership contributed significantly to design efforts that resulted in a four-year program registration. Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEJAN78

This report focuses on the decision-making process of institutions of higher education and their consortia as they responded to a New York State Education Department mandate for competency based teacher education programs. The following questions guided the research: (1) Who was involved in making decisions about policy board composition, consortium operating procedures, plan content, and final plan signoff procedures and protocol? (2) What was the nature of individual involvement in the decision processes of the policy board, task groups, and institutions of higher education (IHE)? (3) What were the characteristics of the process in terms of individual participation and influence in decision making, decision-making style of the consortium leader, degree of conflict and amount of time involved in reaching decisions, and pressure to conform to the majority decision? and (4) What was the structure of the decision-making process followed by the consortium? The consortium type of organization for program development seemed to be a workable one, with the majority of participants feeling that the democratic nature of the decision-making process, with an effective feedback system, allowed them to engage in participation to their satisfaction. On the whole, it appeared that size was the crucial factor in the differences among institutions, since smaller IHE's with smaller consortia, tended to receive four-year program registrations more frequently. (MJB)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEJAN78

This document examines common organizational change factors that were evident as teacher education institutions moved toward a performance based teacher education (PBTE) model of teacher certification pursuant to a New York State Department of Education mandate. Four questions were addressed: (1) What was the nature of the PBTE design process? (2) What organizational change variables facilitated the design of a PBTE program? (3) Are all consortia equal in their ability to design a PBTE program? and (4) What variables can be used as strategic manipulable levers in the design of PBTE programs? Policy boards, task forces, and institutions of higher education respondents completed questionnaires focusing on the design phase of program development and provided generally positive reactions to PBTE and their PBTE programs. Study findings indicate that PBTE programs may be more easily designed if the administrators of institutions of higher education work together to (1) set up communications networks between consortium design groups, (2) channel PBTE information exchange through the communication networks, (3) obtain design funds and materials to support the consortium's efforts, (4) set up an inservice training program to assist the consortium designers in developing the program, and (5) keep the policy board and task force groups informed of each others' design activities! The aims of the Teacher Corps are (1) to strengthen educational opportunities for children in areas with concentrations of low-income families; (2) to attract and prepare persons to become teachers in such areas through coordinated work-study experiences; and (3) to encourage colleges and universities, schools, and state departments of education to work together to broaden and improve their teacher education programs. During their 2-year training, the Teacher Corps interns work directly with deprived children in assigned school districts. The Teacher Corps members at Texas A & I University worked in the communities of Corpus Christi, Rio Grande City, Ben Bolit-Palito Blanco, and East Central. In this report, some methods, procedures, and materials which the corpsmen found useful during their work experience are presented to teachers and individuals interested in the education of economically and educationally deprived children, specifically in South Texas. The report is divided into 2 major sections containing (1) a general introduction to the subject, problem, and purpose of the report, including descriptions of the communities and of student characteristics; and (2) suggested methods, procedures, and materials for working with similarly deprived children. Also given are brief descriptions of the student characteristics, simple descriptions of 13 of the students, and pieces of conversation taken from discussions with some of the students. (NQ)

Journal Announcement: RIEJAN82

Two conferences were held to assist principals,

superintendents, deans, and Teacher Corps directors in institutionalizing the temporary systems of Teacher Corps projects into the permanent systems of the school, community, or university. The overall goals for the conferences were: (1) to develop and test a variety of professional development models for educational decision makers; (2) to help educational decision makers explore anthropology and organizational theory as analytical and evaluative frameworks for viewing institutional/community relationships; (3) to specify generic experiences and skills which would assist change and legitimation strategies; and (4) to evaluate and disseminate. Participants were highly satisfied with speakers, and activities in both conferences. Papers were presented on the following topics: anthropology and education; intercultural understanding; organizational concepts; simulation activities in decision making; and institutionalizing a resource center in an elementary school. This booklet is the seventh in a series of eight that document the University of Nebraska-Lincoln/Lincoln Public School involvement in the Tenth-Cycle Teacher Corps Program. In addition to the five models discussed in other booklets (two through six) in the series, six other models were developed to aid in accomplishing the program goals. These six models form the basis of this booklet and are: (1) Learning Opportunities for Teachers (LDFT) model, designed to encourage teachers to provide students with a physical environment in which the student can best work; (2) leadership; (3) motivation; and (4) decision making models; (5) a community awareness model; and (6) a multicultural education model. Graphic displays of each of these models are presented, and basic characteristics of each are described. (MJB)

Document Type: PROJECT DESCRIPTION (141)

Geographic Source: France

Journal Announcement: RIEDCT81

Government: International

This description of federal compensatory education programs for the economically disadvantaged was prepared for the Organization for Economic Cooperation and Development's review of national education policies. As background, the report first describes the U.S. educational system, the social and educational changes since 1954 that gave rise to compensatory programs, and the current debates over these programs. Six chapters then discuss the goals, target populations, services, and results of federal compensatory programs at the preschool, elementary, secondary, and postsecondary levels, including the training of teachers to serve disadvantaged groups. Among the programs covered are Head Start, Title I of the Elementary and Secondary Education Act (ESEA), youth employment training, vocational education, Upward Bound, Talent Search, Special Services for Disadvantaged Students, Educational Opportunity Centers, college work study, Educational Opportunity Grants, college student loans, and the Teacher Corps. Three final chapters examine the compensatory programs' common objectives and implementation procedures, assess the programs' impact on educational resources and achievement, and analyze the multiplicity of federal compensatory programs and the proposed solutions to this problem. An appendix presents detailed case studies of Head Start, Title I of ESEA, and the Teacher Corps. (RW)

Children Act) is reported. Changes in school based organization and management stemming from the legislation are divided into three categories: (1) general school types of procedures, including such areas as evaluation and assessment of the individual student's program and progress and evaluation of home/school relationships; (2) intervention team types of procedures, among which are such practices as team selection and better utilization of personnel; and (3) special education types of procedures, which initiate due process, formulate the individualized educational programs, format program implementation, and establish progress reporting. Implications for the teacher corps are considered in the areas of staff development and the determination of school needs. (PHR)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEJAN78

This document examines three process environment factors (communications networks, morale of consortia members, and teacher's union attitudes) and their influence on the responses of educational institutions to a New York State Department of Education mandate on performance based teacher education (PBTE). In studying the communications networks, the research focused upon three aspects: (1) formal vs. informal, (2) availability of information, and (3) centralized vs. decentralized networks. It appeared that formal communications networks helped somewhat in receiving a four-year program registration as did high availability of information concerning PBTE. The data seemed to indicate no relationship between the degree of centralization and whether a four-year or one-year registration was received. Morale and compliance with the mandate were looked at in terms of five areas related to satisfaction felt by members of the consortium and initial resistance of individuals to the PBTE mandate. Research in this area was inconclusive. Data seemed to support a relationship between cooperation of local teacher unions and four-year program registration. More general findings, as background for further research, include: (1) major objectives of the PBTE groups participating in this study were reported to be a) assistance to universities in the development and implementation of PBTE programs, b) meeting the state mandate on PBTE, and c) obtaining registration for the given programs; (2) PBTE group members were involved to a degree that they collectively found satisfactory in establishing requisite group objectives; and (3) implementation of proposals is a key area of concern to respondents in the survey. Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; District of Columbia

Journal Announcement: RIEMAR79

Ideas and recommendations emerging from three regional workshops on staff development are presented. The workshops, conducted in early 1978, focused on three aspects of faculty development for inservice: the identification and analysis of current and likely future staff development in colleges and universities whose mission in elementary and secondary school is to assist in the continuing education of practicing teachers; an expansion of awareness among college and university faculty on the state of the scene in inservice education and the roles they can assume in the process; and the provision of examples different colleges and universities have used in providing staff development services. The monograph is divided into seven sections, excluding introductory remarks. Section one considers various meanings of the term "faculty development," and places focus on the provision of more effective job-imbedded inservice education to school personnel. Section two examines the nature and impact of total institutional contexts, local school and community contexts, and state contexts upon the provision of staff development efforts. Section three reports on critical development needs, and section four relates those needs to components of inservice education. Section five details the search for exemplary programs of faculty development for inservice education. Section six presents a college-wide approach to the problem, and section seven presents recommendations and conclusions drawn from the regional workshops. (MJB)

Language: ENGLISH

Document Type: CONFERENCE PAPER (150)

Journal Announcement: RISJUN77

This document examines developments in federal elementary and secondary education support programs and suggests ways in which teacher education institutions might respond to future developments in the field. Federal policy enacted in the Elementary and Secondary Education Act (1965) promotes five distinct goals: (1) equal educational opportunity; (2) educational reform; (3) educational research; (4) employment preparation; and (5) limited general support. While the role of the federal government has remained basically unchanged since, policy debate continues, centering on (1) education's position in national social policy, with an emerging consensus that the federal government should concern itself with economic stabilization, income security, and health insurance, leaving responsibility for educational support mainly to the states and (2) program management in the intergovernmental system, that is, the power positions of the federal and state governments and the local educational areas. Future trends indicate a heavy focus on state level activity involved in retrieving public confidence in the educational system and in managing decline due to shrinking enrollment, with new federal programs focusing on preschoolers, handicapped students, and adults. Implications for teacher training institutions involve: (1) responding to changed demographic factors (shift to inservice education, career preparation components, development of preschool and adult education services); (2) a planning effort to prevent a renewed teacher shortage in the 1980's; (3) concentration on management problems; and (4) cooperation in those programs that the federal government does offer for facility extension and improvement (teacher centers, teacher corps). (MB)

AND (2) THE TEACHER IS SO ISOLATED IN THE UNIVERSITY SETTING THAT HE CAN MAKE NO LINKAGE BETWEEN HIS LEARNING AND HIS TEACHING. EXPERIENCE SHOWS THAT (1) CRASH PROGRAMS DO NOT WORK, (2) THE INSTITUTION THAT DESIRES CHANGE IN THE STUDENT MUST BE ON THE SCENE AND REMAIN ON THE SCENE TO RECEIVE FEEDBACK AND CRITICISM, (3) SELECTION PROCEDURES ARE CRUCIAL TO THE SUCCESS OF A TRAINING PROGRAM, (4) PROGRAMS MUST BE RECEPTIVE TO FEEDBACK AND CRITICISM, READILY AMENABLE TO CHANGES, AND (5) GRADUATE PROGRAMS SHOULD HAVE OPEN SESSIONS FOR EXCHANGE OF INFORMATION AND PROBLEMS. OTHER NONFIELD-TESTED IDEAS SET FORTH ARE (1) ATTENDANCE BY GROUPS RATHER THAN ISOLATED INDIVIDUAL TEACHERS WILL RESULT IN GREATER IMPACT, (2) CURRICULUMS SHOULD BE BASED ON STUDENTS' WANTS AND NEEDS, (3) FIELD EXPERIENCE MUST BE GIVEN, (4) CONTINUOUS FACULTY ATTENTION MUST BE GIVEN TO DIAGNOSIS AND FEEDBACK, (5) INTERLOCKS MUST BE ESTABLISHED BETWEEN SELECTED PUBLIC SCHOOL SYSTEMS AND THE SPONSORING COLLEGE OR UNIVERSITY, AND (6) EXPERIMENTATION AND EVALUATION SHOULD BE ENCOURAGED. Document Type: COLLECTION (020); REVIEW LITERATURE (070)

Geographic Source: U.S.

Journal Announcement: RIEAUG80

This monograph contains (1) five papers on issues raised in a study by Ron Corwin on the Teachers Corps program as an instrument of educational change, (2) a summary of educators' and sociologists' responses to the papers, and (3) an essay by the editor on possibilities for educational change and institutional reform. The first paper is by Melvin Tumin and deals with the issue of organizational survival in the wake of educational reform. In the second paper, author Minnie W. Koblitz discusses the implications of the Corwin report for the classroom teacher. The third paper, by Mario D. Fantini, relates Corwin's analyses to the problems of achieving educational reform in urban communities. In the fourth paper on minority groups and educational reform, Carl and Gloria Grant review the history, purpose, administration, and effectiveness of two Federal reform efforts, Title I of the Elementary and Secondary Education Act and Project Head Start. The fifth paper is by Martin Haberman and focuses on the issue of teacher education as an instrument for change in the public elementary and secondary schools. (GC)

educational personnel, and the teacher corps as a viable model. Benefits accrued, enhanced educational opportunities for children, significant changes in schools, administrators' and teachers' attitudes toward ARTTC, in-service training, and graduating corpsmen are discussed in relation to the school system. The final section presents the school-community-program relationship. (MUM)

Journal Announcement: RIEMAR79

Government: Local

The major goal of the inservice program described in this document was to develop, implement, and evaluate a training program designed to maximize the professional growth of inservice personnel, including all participants in each phase of planning. The services of a clinical instructor and a consultant were used. In the planning phase of the program, teachers specified individual needs and objectives, and the program adhered closely to these stated goals. The consultant identified ways in which the clinical instructor could assist the teacher in mastering and applying new skills. The program was conducted, in part, in the classroom with the clinical instructor actively participating with the teacher providing feedback with regard to the teacher's mastery of new skills and knowledge. Alternative learning activities for teachers with differing interests and abilities were offered in workshops, and opportunities to practice new skills were provided in a protected setting away from the classroom. Emphasis was placed on the individual teacher's professional goals, and financial incentives were offered to participants. (JD)

The follow-up assessments contained in this document represent four conferences that were sponsored by the Southeastern Teacher Corps Network in 1977. The conferences are entitled: 1) The Parent Education Program; 2) The Learning/Listening Conference; 3) The Multicultural Education Conference; and, 4) The Inservice Education Conference and Staff Development Seminar. The surveys used to collect the data for this report were sent to participants after sixteen months and twenty-three months. To determine the impact of these events, the questionnaires explored the participants' application, development, and sharing of skills gained at the conferences. Copies of the questionnaires used are appended. (LH)

This is a flowcharting unit developed by teachers. There is a listing of the unit's objectives, the terminal one being that the student be able to draw and follow a flowchart describing a simple task involving a decision. A copy of the pretest is included. The first set of materials consists of four lessons and is a contract the student makes with the teacher. It is to be accomplished in one week. The second set has twelve activities, some mathematical and some nonmathematical in nature. The third set consists of four lessons. These lessons are nonmathematical in nature. The fourth set employs discovery lessons. There are both mathematical and nonmathematical examples. Evaluation

Journal Announcement: RIEFEB73

The second year of effort in the development of a process evaluation system for the programs of the National Center for the Improvement of Educational Systems (NCIES) is reported.

The activity involved the full-scale implementation of the system in 438 projects in 12 NCIES programs. Programs included are: Bilingual Education, Early Childhood, Educational Leadership, Pupil Personnel Services, School Personnel Utilization, Special Education, Teacher Corps, Teacher Development for Desegregating Schools, Training of Teacher Trainers, Urban/Rural School Development, Vocational Education 552, and Vocational Education 553. For the second year, the system was refined and a new questionnaire developed. The main output of this study was six volumes. This volume presents the analysis of the data collected, conclusions, and recommendations for the programs and for the Center as a whole. Also included is an Appendix, containing a description of the methodology used in the project. (Author/CK)

Document Type: CLASSROOM MATERIAL (050)

Journal Announcement: RIEAUG77

This document is a collection of component module descriptions forming generic teaching competencies developed during the Sixth or Eighth Cycle Teacher Corps Program of the University of Houston and Houston Independent School District, Houston, Texas. The program is a two-year graduate internship for persons holding baccalaureate degrees in fields other than education, leading to a Master of Education degree and provisional certification. The program focuses on elementary school education, urban education, and the education of Black and Chicano children. The document presents eleven generic competencies: (1) Teacher-Made Teaching Aids; (2) Student-Centric Teaching Methods; (3) Teacher-Centric Teaching Methods; (4) Individualized Instruction; (5) Learning Centers; (6) Team Teaching; (7) Differentiated Staffing; (8) Open Concept Classroom Organization; (9) Parent-Teacher Conferences; (10) Teacher Recordkeeping Responsibilities; and (11) Models of Teaching. Format for the presentation of each competency includes: Reference System Designation, Program Description, Component Name, Module Cluster Name, Developer, Date and State of Development, Developer Comments, User Comments, Modules Within Cluster, Module Cluster Rationale, Module Cluster Objectives, Module Cluster Prerequisites, Pre-Assessment Procedures, Learning Alternatives, Post-Assessment Procedures, and Remediation. Language: ENGLISH

Journal Announcement: RIEAPR69

The central purpose of this study was to examine the relationship between distribution of teaching talent and geographic location of local school districts of California. School districts were assigned to one of four geographic categories (urban, suburban, rural, or small urban centers). Each category's teaching talent was assessed on six measures of experience and training. The most striking finding was that rural schools possess a disproportionately low number of the State's most highly qualified teachers. It was suggested that the study's findings needed elaboration to determine if differences in teacher quality reflect themselves in differences in pupil performance. It was recommended that rural districts' ability to compete for talented teachers be improved by (1) instituting a statewide minimum salary schedule, and (2) increasing the attractiveness of rural teaching by offering benefits such as home building loans and added opportunities for professional contacts. Short range improvement efforts should be directed at stimulating rural school recruitment activities and forming a statewide volunteer teacher corps. Statistical data are included. (SW)

Document Type: PROJECT DESCRIPTION (141)

Geographic Source: U.S.; New Jersey

Journal Announcement: RIEAUG79

A program adapting precision teaching in an urban elementary school is described. This program, initiated by the Teacher Corps, was used as an inservice project operating in the classroom. Four major procedural steps are described: (1) the teacher must describe an educational objective in exact terms; (2) pupil performance must be recorded daily in terms of rate per minute for tasks; (3) if pupil data indicates the pupil is not learning, some aspect of the teaching process must be changed; and (4) if the teaching change does not improve

performance, another change must be made. One aspect of this teaching method is maintaining a performance chart for each pupil that indicates individual growth and allows any needed teaching process changes to be made within a few days. An evaluation of the program is included in this report, as well as a description of the development of the program, the personnel, and budget. (JD)

Geographic Source: U.S.; New Hampshire

Journal Announcement: RIEAUG80

Examples of effective parent and citizen involvement in schools throughout the United States are cited. Actions include a ruling in Boston that parent groups have a right to monitor classrooms in that city; a new collective bargaining law which provides open access to information about the agenda and content of collective bargaining; and the creation of an Office of Parent Involvement in the new Department of Education. Also, several research studies indicate that parent and citizen involvement have beneficial effects. Several states have taken initiatives to foster citizen participation through mandating local advisory councils at the school building level. Community development programs have enlisted strong grass roots support to work on local problems. Many schools have initiated collaborative decision-making sessions which bring together educators, administrators, teachers, and parents. Citizens have also organized to reverse public policy they find damaging to their interest. Finally, community education programs have moved beyond adult education and recreation to becoming actively involved in community problems. (KC)

papers prepared by individuals with differing points of view relative to the shared management of teacher education. This monograph begins with a general discussion of governance, consortiums, and decision making. The remainder of the monograph is divided into two sections. The first section presents position papers by individuals who occupy positions in four of the role groups most commonly included in consortial governance arrangements. These are university professors, public school teachers, school district administrators, and state department of education personnel. In the second section, three teacher education centers that are managed through consortial arrangements are described by the directors of those centers. These three centers were selected to represent consortiums between (1) an institution and several participating public agencies; (2) several institutions, several school districts, and an intermediate agency in a nonurban setting; and (3) a large urban school district and several institutions of higher education. A Teacher Corps-sponsored survey of a rural town in northern Maine is described. The survey was intended to investigate the feelings of town citizens regarding their own lives, the town in which they live, and their school. It was intended to disclose the need for day or foster care centers, to find out about the levels of educational attainment in the town, and to investigate recreational interests and the need for human services in the town. Other objectives of the survey included the establishment of dialogue between community and school and the determination of precise age groupings and income levels of townspeople. A map of the town is included. (Author/LH)

Journal Announcement: RIEMAY81

A small residential center for boys with learning disabilities and/or emotional problems was the setting for an intensive six-week inservice program designed to provide the staff with a combination of tutorial and direct training. The training was subsequently integrated into a more formalized, comprehensive, and on-going program through a local university. The focus of the program was on the productive use of the boys' leisure time and on the use of small groups in the solving of problems in peer and adult relationships. The schedule of training included the following activities: staff seminars, youth activity groups, youth discussion groups, center-wide weekly meetings, individual staff consultations, and individual supervision. Progress was evaluated by observation and feedback, and small group discussions between the trainer and the staff. Pretests and posttests of staff perceptions of the group home climate, and of their attitudes toward residential work revealed both positive and negative feelings about the training. A slide tape presentation about the program was prepared and shown to teachers, secondary school students, and college students, and their responses are included. (FG)

This document is the third of a series of four reports developed to provide a comprehensive overview of parent involvement, encompassing the family, parenting needs, and existing resources. In addition to current parent education

approaches and practices. This Parent Participation Profile (PPR) is intended for use in needs assessment and program evaluation based on participant perceptions. Designed to provide useable information for program development and practices, it consists of two parts, the manual and the instrument itself. In the first section of the manual, a complete explanation of the PPP, including its general goals, specific objectives, and its design, along with a description of its pilot use in Texas, is provided. The second section of the manual focuses on how to administer the instrument, while the third section consists of a sample PPP with intermittent explanations of the more complex items. The complete PPP follows the manual. The PPP consists of forty-five items, most following a Likert-scale format. It addresses four areas that have significant bearing on parent education program designs. Those four areas are (1) previous participation, (2) attitudes about parent involvement, (3) handicapping conditions, and (4) participant demographics. It can be administered to parent participants prior to their entry into a program as a needs assessment for planning purposes, or as an evaluation at the completion of a program to determine program effectiveness. Geographic Source: U.S.; District of Columbia

Journal Announcement: RIEJUL81

This document is the second of a series of four reports developed to provide a comprehensive overview of parent involvement, encompassing the family, parenting needs, and existing resources, in addition to current parent education approaches and practices. This "Family Academy Model" provides one interpretation of how the family functions as educator. The report begins by revealing the dramatic changes that have taken place in American families during the past twenty years, based on the impact of lower birth rates, more women in the work force, higher divorce rates, postponement of marriage, and a changing economic climate. Chapter 2 discusses five alternative family forms--single-parent, reconstituted, non-kin, multigenerational, and retirement--and their implications for educators. In chapter 3, the family life cycle is examined through the traditional nuclear family. Contributions to understanding how the family educates are highlighted in chapter 4, which includes some thoughts on the family's curriculum content. In chapter 5, the family academy concept is presented with a description of its four primary learning tasks--role selection, personality acquisition, value formation, and behavioral patterning. The five-step learning sequence of the family academy is the focal point of chapter 6 and is applied to the development of life skills through four critical life events. Chapter 7 concludes with a discussion of the future of the family. (KC)

LITERATURE (070); PROJECT DESCRIPTION (141)

Geographic Source: U.S.; District of Columbia

Journal Announcement: RIEJUL81

This document is the first of a series of four developed to provide a comprehensive overview of parent involvement, encompassing the family, parenting needs, and existing resources, in addition to current parent education approaches and practices. This "Overview" is a panoramic scan of parent involvement programs, including child-rearing practices. Divided into three sections, it addresses the basis for parent involvement, what it consists of, and what can be expected in the future. It includes a discussion of how parents and child-rearing practices have influenced the development of parenting and parent education programs. An analysis of numerous parent program models is presented, evaluating their strengths and weaknesses. In addition, critical issues and needs that parent involvement should address as we move toward the next century are examined. The Overview is intended to serve as an introduction for educators, including parent educators, who are working with parents. Through the information provided, insights into program planning and development are given. Two significant issues are raised: parents are neglected as resources; and neither parents nor educators involved with parents are viewed as adult learners. (KC)

This handbook provides suggestions about quality control procedures that will enable Teacher Corps project personnel to assess the effects and success of educational products, practices, and other outputs prior to dissemination. Two assessment processes are outlined. The first, review, is the collegial ongoing process for Teacher Corps project personnel to assess the effects and potential impact of innovations before dissemination. The second, validation, is the formal post-development process for Teacher Corps projects to assess the evidence of effectiveness for approval by an official panel. Guidelines and checklists for reviewing innovative products and practices are provided. The criteria used for validating an educational program are presented along with descriptions of the responsibilities of project personnel in the validating process. A format for submitting materials to a dissemination review panel is included as well as a description of panel criteria used for judging program effectiveness. (JD)

Open space schools will lead to coordination by teachers in more exciting ventures in education, such as joint teaching, individualized instruction, and crossgrouping of students. "Open space schools," denotes a type or architectural design, and not an instructional program. Many teachers, though, are frustrated by open space and are inadequately prepared to function in the new architectural environment. Teachers successful in open space schools have stressed that their key strategy is coordination. Their suggestions have been

organized into five basic categories to help teachers survive in an open space atmosphere. First, it is easier to enforce a few basic rules rather than numerous detailed ones. Rules and standards are most effective when they are organized into school-wide and individual pod rules. Secondly, careful consideration must be given to the patterns of student movement in the open space school. Again, agreeing on student movement patterns must be done both on a school-wide basis and within each pod. Thirdly, it is essential that teachers working within the same pod take every precaution to minimize distracting noise. Fourthly, teachers in a pod must jointly plan where to locate furniture, equipment and supplies, and should agree on decorations for their open areas. Lastly, it is essential to inform parents about open space as early and thoroughly as possible. Successful coordination in these areas will not only allow teachers to survive in open spaces but will lead to more coordination in implementing new programs. (SK)

This paper describes the organization and implementation of 16 seminars on the subject of developing the potentials inherent in the individuals involved. The stated goals of this group project for teacher corps interns are: (1) identify and use personal strengths and potential in many areas; (2) understand achievement patterns and the way in which they encourage or inhibit the use of personal potential; (3) become aware of individual value systems; (4) establish and achieve immediate and long-range goals; (5) identify areas of latent potential; (6) learn how to resolve conflict; (7) learn self-motivation. An outline of activities for the achievement of stated goals is provided for each of the seminars. (JD)

Journal Announcement: RIENOV81

The trainer's manual offers a sampling of workshop materials to assist the regular classroom teacher in the process of screening, identification, referral, and assessment of handicapped students. Following an introduction are sections with information, sample handouts, forms, and checklists on the following topics (sample subtopics in parentheses): classroom teacher identification of exceptional children (definitions, factors which inhibit learning, referral characteristics); procedures for referral; nondiscriminatory testing; informal assessment techniques (visual learning, auditory learning, perceptual motor learning, number concepts and abilities, reading and language arts abilities, social and behavioral development, learning styles); formal assessment/frequently used tests in various areas of assessment; and interrelation of educational assessment and educational intervention. Additional sections offer lists of references, resources, materials, and audiovisual media. Sample workshop evaluation forms complete the document. (SB)

Journal Announcement: RIEOCT80

A Teacher Corps project intended to develop and implement a program of individualized instruction at a local middle school is described. The program is based on the assumption that each student is, in some way, a gifted student. The project adapts educational research in the area of gifted student instruction

to a middle-school teacher-student learning situation in which low-income and minority students comprise approximately one-third of the student body. The project also demonstrates the type of teacher training and retraining necessary to meet the problems related to students from low-income families. (Authors/LH)

Journal Announcement: RIEAPR71

The Florida Parent Education Follow Through Model (See ED 028 140 and ED 028 139) has fostered institutional change at the University of Florida in two ways: professors and making use of increased knowledge and understanding of the disadvantaged in their instructional content and format and the University has developed and had approved a 2-year innovative program leading to a master's degree in elementary education with a specialty in early childhood education. This program will initially involve 27 Teacher Corpsmen working in Jacksonville Model Schools implementing the home component of the Florida Parent Education Model. The program will emphasize university study toward certification and a degree and service to poverty children and their families in the community. Objectives will be to train teachers who can teach inner-city children effectively, think for themselves in curriculum and instructional development, work with parents and other community agencies to strengthen the learning environment of the child, work with paraprofessionals, and cooperate competently with parents and others in institutional change. Innovative components include emphasis on the disadvantaged, work in the disadvantaged schools, work with paraprofessional parent educators, training in theory and use of systematic classroom observation, academic preparation from a panel of specialists in a non-course format, intensive work in reading and language development, inservice work on a differentiated staff. An overview is presented of a program that utilizes the abilities of a team of university professors to improve curriculum, build a staff development program, and establish diagnostic/prescriptive reading and mathematics programs in a junior high school. The school is in the inner city of Charleston, West Virginia, and its population is comprised of lower income students. Four professors, chairmen of the university's mathematics, English, social studies, and science departments, visited and worked with the staff on a regular basis for two years. A description is given of a model for staff inservice programs developed cooperatively by the university and the school. The staff improvement project is under the direction of the Teacher Corps which serves as a linking agent between the university and the school. (JD)

Journal Announcement: RIEJUL77

This paper was prepared to advise the Teacher Corps/Washington Management Team about the 1976 National Conference. The following questions were used to organize the body of the report: (1) Why a conference? (2) Why certain sessions? (3) Why certain participants? (4) Why certain presentors? and (5) What imperatives should direct planning and design? In answer to the first question, it is suggested that the Conference program be clear in focus, be accountable to a stated purpose, and be supportive of the needs of the persons involved in the Conference. In response to the second question, a conference activity sequence is proposed that allows presentors to have a more precise notion of expectations about what they are asked to do and why, and allows participants to know where they are in a discrete process and have a better idea of where and when to schedule social and recreational activity to enhance learning. Discussion of the third question reports that the relation of audience of the Conference to actual program offerings is not clear to the participants or the presentors and that the basis for inclusion or exclusion of content or persons is also unclear. Who is to be served and in what way is the question individuals, presentors, and projects need clearer signals about. The answer to the fourth question is that the choice of presenter should follow from what Teacher Corps determines participants should learn and what participants are told they will learn. In reply to question five, nine suggestions are presented for planning and design. (MM)

federally funded program, involving Jackson State University, the Jackson Public School System, and the community. It represents efforts to incorporate theories, teaching-learning strategies, and multicultural experiences in teacher education into a single conceptual framework. The academic program is competency based and field centered with many of the courses being team taught. A modular delivery system of learning experiences is used. The modules are being programmed to provide tracking of student through the use of the computer. The instructional activities are facilitated by an instructional team representing the School of Education, the School of Liberal Studies, and the Jackson Public School System. Inservice training is provided for the cooperating teachers through formal courses, minicourses, comprehensive workshops, and seminars. There is an exceptional child component emphasizing the concept of mainstreaming and diagnostic/prescriptive teaching. Community-based educational activities are designed and implemented in keeping with the philosophy of Teacher Corps. The total project is evaluated periodically by interns, members of the staff, the policy committee, National Teacher Corps Officers, and internal and external consultants. Appendixes include objectives for each school and a sample instructional module. (JA)

Document Type: REVIEW LITERATURE (070)

Geographic Source: U.S.; Texas

Journal Announcement: RIENOV81

The focus of the literature in this review is on schools of education and teacher educators. References are included on major works on the topics, and central questions and issues are raised. The factors which make it difficult to arrive at consensus about the quality of teaching in higher education are outlined along with various definitions of quality from several sources. Categories of teachers, their attitudes, teaching strategies, and characteristics are presented. Four different ways to confront the problem of upgrading teaching are explored: (1) discovering the most effective teaching method; (2) selecting and training higher quality teachers; (3) improving individual professor's teaching through inservice education and evaluation; and (4) offering innovative educational programs. Each strategy rises from a particular historical context and focuses on a distinct aspect of the dilemma. Major attempts to conceptualize faculty development are reviewed, and examples of improvement programs in the past decade are offered with summaries of the impact of such programs and current issues affecting them. Literature on the process and techniques of clinical supervision is reviewed, and the problems and issues involved in this kind of supervision are discussed. (JD)

The resource book contains essays and ethnic vignettes to help teachers and teacher educators understand the diverse lifestyles, backgrounds, and attitudes of students and families in American society. The book provides background information for elementary and junior high activity units contained in SD 010 213. Part one contains four chapters which

discuss multiculturalism, dangers of stereotyping, areas of possible conflict, and implications for the schools. The nine ethnic vignettes in part two explore each group's contributions to American culture and problems encountered by each minority group. Lifestyles and children's learning styles in different cultures are also described in order to help teachers work more effectively with minority group students. The nine groups are Black Americans, Chinese Americans, East European Americans, American Indians, Italian Americans, Japanese Americans, Jewish Americans, Mexican Americans, and Puerto Ricans. Part three, a concluding chapter, explains the teacher's role in achieving multicultural understanding. (Author/AV)

Document Type: CLASSROOM MATERIAL (050)

Journal Announcement: RIEFEB78

The teacher's guide contains 51 activity units for implementing multicultural education in areas of social studies, language arts, science, math, and art. Activities, designed for elementary and junior high students, focus on racial and cultural diversity, the elderly, sex-role stereotyping, and the handicapped. Two introductory units suggest strategies for helping students understand personal feelings, relationships with others, and the meanings of voluntary and forced migration and immigration. Many of the units make use of background readings provided for the teacher in the companion document, SD 010 214. Each unit identifies the experiences students should undergo as they perform the suggested activities. Many involve discussion with members of the community such as grandparents, lawyers, and the handicapped. Students are encouraged to create murals and collages depicting leisure and working activities of various racial groups, to write chapters in American history reflecting the roles of ethnic groups, and to read at home with parents in selected books with nonsexist themes and illustrations. Document Type: TEACHING GUIDE (052)

Geographic Source: U.S.; Maine

Journal Announcement: RIEAPR80

The document presents a minicourse exploring multiethnicity in children's books and literature, introducing book selection aids, and emphasizing procedures for incorporating ethnic literature into the regular curriculum. The objective is to familiarize upper elementary and junior high teachers with resources and materials appropriate for making students aware of the multiethnic characteristics of American society. Lesson plans are offered for eight lecture/discussion sessions and a field-based project requiring the design of a two-week literature unit which includes examples of ethnic literature. Topics are entitled "Out of the Melting Pot and Toward Ethnic Diversity," "Definition of Ethnic Literature," "Values of Teaching Ethnic Literature," "How to Judge a Book: Theory," "How to Judge a Book: Practice," "Selected Resources for Teaching Ethnic Studies," and "Selected Models for Including Ethnic Literature in the Curriculum." Appendices include lists of book selection aids, resources for the adolescent, books about the black experience and the American Indian, ways to build appreciation and standards in literature, ways to analyze books for racism and sexism, studies of folk tales, how to judge a book, and two model unit plans for teaching literature. Transparencies and nonreproducible handouts from the appendices may be obtained from Dr. Manna at the University of Maine at Farmington. (CK)

Journal Announcement: RIEJAN81

This book describes the efforts of 10 state projects, funded by the Youth Advocacy Projects of the Teacher Corps, which brought students, teachers, school administrators, community members, youth service agencies, state education officials, and university personnel together to create more effective services for troubled youth. The first two chapters focus on the nature of the projects, their working hypotheses, and the use of community-based education programs for youth. The program design, goals, structure, and skill-building components of each project are presented in detail. The evaluation results across all projects are reviewed in an examination of the governance structure, social organization, emerging role relationships, training modes, and delivery systems. Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; Massachusetts

Journal Announcement: RIEMAY81

This survey of teacher attitudes toward inservice training programs was done to compare reactions of teachers affiliated with a regional Teacher Corps project to those in non-Teacher Corps schools. The rationale was that as faculty turnover in public schools decreases due to fiscal constraints and declining enrollment, the only real vehicle for improving the quality of public education is through inservice programs at all appropriate levels. While local, state, and federal agencies are funding proliferating and perhaps conflicting inservice programs, the local Teacher Corps inservice experiences are based on collaborative decision making by the local community, schools, and university. A questionnaire was devised that provided data on eleven elements of teacher attitudes toward inservice programs, which were rated by agreement categories. The findings are listed in thirteen groups, including: (1) recruitment patterns; (2) motivations for participation; (3) sources of inservice leadership; (4) least helpful functions of leaders; (5) sources of programs; and (6) most helpful participant roles. On the basis of the findings, ten recommendations are made. (FG)

Document Type: REVIEW LITERATURE (070); RESEARCH REPORT (143)

Geographic Source: U.S.; Connecticut

Journal Announcement: RIEMAY81

Researchers have concluded that the continued debate over the heredity-environment issue concerning the nature of intelligence is nonproductive. Recent evidence demonstrates that intellectual abilities can be improved with practice. Heredity may determine upper limits of abilities within individuals, but there is considerable room left for improvement with practice. The Guilford model of intelligence suggests that intelligence is a systematic collection of functions for processing information. The most important intellectual skill that an individual can master is the discovery of the processes surrounding successful problem solving. A research design was implemented to apply the concept of intelligence as a series of teachable skills in a classroom setting. The subjects were 89 ninth grade students selected on the basis of low achievement scores. Pretest posttest results indicate that the adolescents' intellectual skills are capable of improvement in a relatively short period of time. (JN)

Language: ENGLISH

Journal Announcement: RIEJUN69

This preparation of the Temple-Philadelphia-Trenton Teacher Corps Program describes the use of the resources which are available to most colleges, universities, school systems, and communities to achieve the goals of technology in education--individualization and humanization. Strategies, deployment and characteristics (including intensity and diversity of involvement, ability to work as a team, knowledge, ability to communicate, and respect for individuality) are presented. The major portion of the report is a description of training techniques for individualizing learning. The first emphasizes the contract system (in which the student contracts with his teacher to make a study in a field chosen by the student) which involves a chance for students to study relevant problems, relates to democratic interaction, improves self-initiation, emphasizes cooperation, and gives the student stature as a person with rights and feelings. Another technique emphasizes individual experiences in school and community, a program in which the needs and individual skills of interns are diagnosed and structured into a system for involving students in the community. In addition, brief reports of the other techniques used in the program are provided, such as a human relations training laboratory, microteaching, and the use of individual team leader and intern skills. A 13-item bibliography is included. (SM)

 Document Type: PROJECT DESCRIPTION (141)  
 Journal Announcement: RIEMAY75

This initial systematic management design for Teacher Corps, Cycle V, at the University of Southern California's School of Education covers the entire two years of the program. The document contains objectives stated in measurable terms, graphic representations of activities (flow charts and time sequence charts), key decision points to attain the objectives, and a scheduling of who is responsible for each activity. Among the major objectives for the program are the following: (a) to train interns in depth to understand delinquent youth in the educational process; (b) to acquire accreditation for each intern; (c) to award a master's degree to each intern; (d) to establish learning centers as competency based, experimental modules in the schools; (e) to create community related adjunct groups; (f) to develop new relationships between correctional schools and inner-city schools; and (g) to field-train cooperating teachers to work more effectively with delinquent youth. A list of regularized procedures concludes the model. It is stated that the design is constant in its evaluation and revision and is the first

phase of refinement and redevelopment at present. (Author/JA)

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEMAR78

This report describes an inservice teacher education program that had special emphasis on multicultural education, initiated by the Teacher Corps at the University of Southern California. The children in the elementary school involved in the project were mainly Spanish-speaking Mexican-Americans. The objectives for the project were to: (1) retrain teachers-in-practice in bilingual and multi-cultural teaching techniques; (2) provide specialized training for instructional aides; (3) develop a teacher center design for sharing with

Journal Announcement: RIEFEB77

A narrative and documented review of the initial stages of organizing a consortium for inservice teacher education is presented. Functioning as a Teacher Corps project, a model is being developed for collaborative decision-making among teacher associations, local school districts, and institutions of higher education. Under consideration is a model consortium in the state of Washington involving Western Washington State College, the Arlington Education Association, and the Arlington Public School District. The major emphasis of the consortium will be on inservice or continuing education/certification for teachers. In addition to development of the consortium by-laws, another component of this effort is a study that attempts to cost out the development of the model. Nine Appendices detail the following: (A) Teacher Corps - Second Year, 9th Cycle (Outlining Teacher Corps objectives in developing continuing education of school faculties); (B) Guidelines and Standards for the Development and Approval of Programs of Preparation Leading to the Certification of School Professional Personnel; (C) Cost-Benefit Analysis; (D) Miscellaneous Consortia Development Documents; (E) Events Held Directly Related to Consortia Development; (F) Minutes of Consortium Planning Meetings of November 17 and December 1; (G) Letter of Intent; (H) Northwest Professional Development Consortium Policy Procedures and By-Laws; (I) Agency Approval of By-Laws. (JD)

The suggested manner of accomplishing this is to focus on the development of inservice teachers into practicing educational researchers as part of a staff improvement program. Case studies of a New Hampshire junior high school's inservice research program, which has also led to significant staff development, are cited. A bibliography is appended. (LH)

Criteria suggesting standards and characteristics for inservice education programs are described. In an introductory table, the purposes of inservice education are illustrated. They include advanced degrees, school improvement, professional advancement, retraining for new assignments, and personal professional development. The process, setting, authority, responsible agency, reward structure, and motivation for each of these purposes are listed. Inservice program criteria are grouped into five sections: decision making, relationship to the program of the school, resources, commitment to teacher education, and rewards. The criteria may be used in several ways. They may provide basic ideas upon which professionals can plan and operate a program. They may also be used as survey items to obtain perceptions of district or school personnel, to provide information on current circumstances and what might be desirable in an inservice education program, and to examine the priorities of those involved in program development. This publication, part of the Professional Development series, presents an analysis of present and future needs for developing innovative approaches to professional staff development. Forces that have compelled fresh approaches for inservice program designs include: (1) equal education for women and minorities; (2) social and economic forces; (3) the knowledge explosion; and (4) declining enrollments. State and federal governments have an obligation to provide long neglected leadership and financial support for inservice programs. Issues for educational personnel and the community are discussed. This booklet, the fifth in a series of eight describing the University of Nebraska-Lincoln and Lincoln Public School System Tenth-Cycle Teacher Corps program, discusses the basic characteristics of the inservice teacher education component of the program. This inservice effort was developed to complement the ongoing staff development activities of the school in which the Teacher Corps program operated and to supplement a variety of independent activities conducted at the University, which had no organized inservice program. Eight basic principles of the inservice education model are described and illustrated by examples: decision making, needs assessment, voluntary participation, multiple delivery systems, on-site application, formative and summative evaluation, and leadership. Seven basic delivery systems were used to provide activities to teachers, interns and aides: (1) semester courses at school site; (2) individualized modules or mini-courses; (3) curriculum building; (4) team teaching by university personnel; (5) teacher center activities; (6) workshops, symposia, and retreats; and (7) staff development meetings. This publication's theme, "Institutional Change," is broadly examined in fourteen articles that range from research and opinion to allegory and satire. A student teacher, a dean, and a state education director are among the authors. Articles concern: 1) key elements of change; 2) relationships between local, county, state, and federal educational organizations;

3) problems arising from mandated change; 4) institutionalization of processes and products; 5) cultural context of social organizations; 6) the role of the user as the principal change agent; and 7) teachers as change agents. Several programs sponsored by the Teacher Corps are also described. (CJ)

Journal Announcement: RIEJUL81

The process for initiating an inservice program begins with the appointment of an Inservice Education Steering Committee (IESC), composed of teachers, teacher aides, parents, and administrators. In the first phase of the model, the IESC reaches a consensus on what inservice education is, why it is needed, and who plans and conducts it. In the second phase, teaching competencies are identified and classified. A needs assessment is conducted in the third phase. The information gathered from the needs assessment is used to plan workshops and to provide for leadership and the continuation of the program. The fifth and last phase is concerned with personalizing training for each individual and grouping teachers according to stated needs. Each group plans a training program and submits its request to the IESC. After approval, further planning is done by each group, including arranging for consultants, travel, and providing substitutes. Six attachments provide information on Teacher Corps goals and competencies, IESC functions, characteristics of inservice programs, and teaching skills and behaviors. (F8)

This instrument was designed to aid in evaluating the Pittsburgh Teacher Corps Pre-Service Program by assessing whether predetermined behavioral objectives had been attained. Some twenty objectives in the areas of teaching skills, attitudes, and community involvement are rated on a four-point continuum: Never Observed; Sometimes; Most of the Time; Always. The instructional consultant checks the appropriate block on the checklist which adequately describes the behavior on the part of the intern that he has observed during actual classroom teaching over a recent period of one month. Space is also provided for any free comment that the consultant may wish to make. (CK)

Journal Announcement: RIEJUN81

The Interaction Partner System (IPS) was designed and implemented by the Okaloosa County Teacher Corps Project and the University of West Florida. It was an answer to several dilemmas: teacher isolation, irrelevant and inflexible teacher inservice training, and theories and research developed at the graduate level which rarely found their way into the schools. By enabling preservice and inservice teachers to focus together on common concerns within a site school, the IPS attempted to achieve four goals: to create positive change in teacher behavior; to offer a research option for earning inservice credit; to encourage immediate applicability of the developed research designs; and to provide a model for teacher education centers and colleges of education. Each degree program participant was asked to solicit the involvement of another teacher within the school, providing the following incentives: freedom to alter general school and class schedules; use of substitute teachers and materials needed for research; and letters of commendation for their files. Special guidelines were laid out, and each student kept a log of the interaction and the length of each encounter. One inservice credit was awarded to participating teachers for each hour of involvement. (FG)

Journal Announcement: RIENDV72

The purpose of this project was to help implement the change from traditional instructional programs in teacher education at Jackson State College, Mississippi, to programs which are competency-based, starting with the faculty and interns of Jackson State College-Hinds County Teacher Corps Program. From July 1970 through July 1971, 36 interns (black liberal arts graduates), assigned to three school systems in the County, were given eight courses in early childhood education as well

as six hours of internship, which will count toward a master's degree; the eight courses were converted to competency-based instruction to extents varying from 50 to 100 percent. When students were requested to evaluate the program, they reacted positively toward competency-based instruction; the majority felt that they were under less pressure, would achieve more, and would receive higher grades. Faculty members also reacted positively and expressed a willingness to use the method in their own classes; but that the traditional grading system would need to be changed to a pass-fail system. All of the faculty members felt that the end-product of such a system better prepared teachers, was worth the effort to overcome such problems as do exist. The initial recommendation was to involve the total teacher education faculty in an effort to implement further competency-based instruction within the Jackson State College education program. Journal Announcement: RIEDFC74

This paper provides a general description of how Southern University in Baton Rouge, Louisiana is moving towards competency-based instruction. A planning retreat was held and all instructional programs offered by the University were assessed with regard to the overall purposes of the institution and the prospect of developing a competency-based orientation. This assessment included the following: (a) the specification of goals and objectives in relation to the mission of the university, present efficiency of the program, and a competency-based orientation; (b) a description of substantive programs; (c) a description of the faculty model; and (d) a description of the evaluative component. Some considerations related to implementing a competency-based program include: (a) whether competency-based instruction is appropriate for curriculum components other than those at the professional level, (b) whether objectives in the affective domain can be formulated, and (c) which strategy should be used in changing to competency-based instruction (PD)

Document Type: MISCELLANEOUS (999)

Journal Announcement: RIEMAY75

In a memorandum to the Chief of Planning and Program Development, Teacher Corps, the Program Development Specialist for the Pontiac Urban Corps in Oakland examines the role of the program development specialist. Although the program was successful in that 31 beginning teachers were placed and modules were developed in three discipline areas, the fact that the program development specialist served less than

half-time limited the achievements of the program. Within the time limitations, the major facets of the program specialist's role included serving as (a) module coordinator for reading and language arts, (b) demonstrator of desired teaching behaviors, and (c) manager of a feedback system designed to provide significant team members with information for use in strengthening the program. The drawbacks to the program caused by underfunding of the program specialist's position were that (a) close affiliation with the staff was precluded; (b) development of an overall management system was severely hampered; and (c) field testing and evaluation of modules developed during the course of the project were inadequate. Journal Announcement: RIENDV81

The participant's manual contains activity direction for a teacher workshop focusing on the interrelationship between regular and special education, service delivery systems for intervention, and attitude of acceptance toward exceptional children. Activities correspond to the ten workshop objectives: to define the concept of mainstreaming, to write a rationale for mainstream education, to compare and contrast mainstream education with traditional special programs, to describe the various instructional models and the role relationships of personnel within each, to become aware of the way in which differences set people apart, to describe the classifications and characteristics of special students, to compare and contrast academic information versus labels as aids in planning for instruction, to appreciate the sense of being "different" as experienced by special students, to describe the ways in which expectations and stereotypes of others affect responses/learning/relationships, and to identify positive characteristics in labeled special students. The bulk of the document provides definitions, behavioral characteristics, educational treatment, and readings related to specific exceptionalities. (SB)

Journal Announcement: RIENDV81

The facilitator's manual offers guidelines for conducting a workshop for regular educators which focuses on the following objectives--writing a rationale for mainstream education, describing the various instructional models and the role relationships of personnel within each, describing the characteristics and classifications of special students (both handicapped and gifted), and understanding the ways in which expectations and stereotypes of others affect responses/learning/relationships. Sections cover general and specific workshop objectives; materials, space, and equipment; evaluation of the training session; and directions for conducting the workshop. Included among workshop materials are masters for transparencies, articles for service delivery systems, a teacher training program order form, a materials price list, a bibliography, and a list of agencies for the gifted. Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEDEC77

This report presents a summary of exploratory interviews with teachers and educational policy makers conducted to identify issues, problems, and opportunities for constructive change in inservice teacher education (ISTE). Teachers were questioned on (1) feelings toward ISTE in general (relevance, definition, and organization); (2) roles of entities responsible for ISTE; (3) the definition of substance, with emphasis on professionalism, preferences for training objectives, and differences in experience; (4) incentives and convenience of training; (5) issues concerning the training process: who should be trained? When? Who should conduct the training? and Who should evaluate the training; (6) how to develop connections between teacher needs and available programs; (7) the "ownership" of ISTE; (8) issues concerning mainstreaming, and (9) multi-ethnic/bilingual education; (10) emphasis on humanistic education; (11) alternatives to present fiscal support programs; (12) problems in ISTE organization and governance; and (13) problems in creating natural and planned variation experiments in inservice teacher education. Educators concerned with the formation of educational policy at the state and national level perceived many of the same problems with ISTE as did the classroom teachers. A comparison of the answers of teachers and educators on the ISTE question reveals a widespread frustration with the lack of efficacy of inservice teacher education programs which seems to be due to structural reasons. It was concluded that the first step in determining the future of ISTE will be to solve the problem of organizing the various groups who have an interest in inservice teacher education into a single structure allowing for diversity but at the same time maintaining common goals and means for attaining them. Journal Announcement: RIEFEB77

The Inservice Teacher Education (ISTE) Concepts Study gathered information from educational professionals and policy-makers. The resulting mass of information and concepts is presented in this overview of the nature of ISTE and its problems. The general structural problem of ISTE involves the interaction of several dimensions: (1) the governance system, composed of the decision-making structures which legitimize activities and govern them; (2) the substantive system, composed of the content and process of ISTE and that deals with what is learned and how it is learned; (3) the delivery system, including incentives, interfaces between trainees, trainers, and training and staff, which deals with motivation, access, and relevance to the role of the individual professional; and (4) the modal system consisting of the forms of ISTE, ranging from sabbaticals abroad to intensive on-site institutes. These dimensions and their interaction are discussed. (JMF)

The major problem in this study is to determine the effects of remedial methods on basic skills mathematics achievement and student attitude toward mathematics. Attitude prior to treatment was included as a blocking variable in one analysis. Remedial methods included: (1) no intervention or regular; (2) regular plus an intern teacher; (3) regular plus student use of a micro-computer; and (4) regular plus intern and micro-computer. Implementation of this Teacher Corps Project was with four teachers, four interns and all general mathematics high school students during the first nine weeks of the 1979-80 school year. This report is developed from a pilot research study perspective. The methods section includes a rather extensive discussion of techniques designed to support the internal validity of the study. The results are presented by hypothesis. Implications for teachers, project staff and administrators concerning the effects of micro-computer and intern utilization are limited to the application of each in this study. In addition to the discussion of implications, a summary of results and conclusions are presented in the final narrative section of this document. The appendices include documentation of various planning and monitoring procedures as well as instrumentation. (Author/GK)

teacher education institutions; (5) standards for the preparation and certification of professional school personnel; (6) general education component of teacher preparation curriculum standards; (7) preparation and certification of kindergarten, elementary, middle, and high school teachers; (8) provisional certificate for teaching music; (9) extending the validity of elementary and high school certificates; (10) preparation and certification of reading specialists, driver education teachers, school media librarians, and special education teachers; (11) preparation and certification of guidance counselors, school psychometrists, school psychologists, school social workers, school nurses, and rehabilitation counselors; (12) school administration and supervision; (13) business administrator preparation and certification; (14) vocational education preparation and certification; (15) junior reserve officers training corps preparation and certification; and (16) emergency certification. Explanatory notes to a statement on general education are appended. (JD)

This document is a collection of component module descriptions of competencies needed for the instruction of language arts developed during the Sixth or Eighth Cycle Teacher Corps Program of the University of Houston and Houston Independent School District, Houston, Texas. The program is a two-year graduate internship for persons holding baccalaureate degrees in fields other than education, leading to a Master of Education degree and provisional certification. The program focuses on elementary school education, urban education, and the education of Black and Chicano children. The document presents seven component module descriptions: (1) Teaching Handwriting, (2) Teaching Pupils How to Spell, (3) Teaching Speaking and Listening Skills, (4) Teaching Grammar and Composition, (5) Telling Stories to Pupils, (6) Listening, and (7) Handwriting. Format for the presentation of each competency includes: Reference System Designation, Program Description, Component Name, Module Cluster Name, Developer, Date and State of Development, Developer Comments, User Comments, Modules Within Cluster, Module Cluster Rationale, Module Cluster Objectives, Module Cluster Prerequisites, Pre-Assessment Procedures, Learning Alternatives, Post-Assessment Procedures, and Remediation. Several articles dealing with bilingual education and language acquisition among American Indians illustrate problems representative of this ethnic minority. The major article by W. Miller considers the Shoshoni language as an "obsolescing" language, and a bibliography of the Numic languages is included. The information exchange section reports on: (1) a conference on child language, (2) summaries and excerpts from conference papers, (3) population change,

(4) Indian student leadership and inservice training, (5) language instruction, (6) English kindergarten for speakers of Miccosukee, (7) films for classroom use, (8) student publications, (9) American Indian Historical Society periodicals, (10) teacher corps, (11) Title 7 projects for Indian languages, and (12) local resource materials. Books reviewed include "Conceptual Learning," "Early Childhood Bilingual Education," and "Adapting and Writing Language Lessons." Several short stories are also included. (RL)

This learning guide, structured into two sections, was developed to facilitate the learning of cognitive and social skills of individuals working within a group organization. The first section deals exclusively with knowledge about organizational structure, and is oriented towards developing recall and comprehension. This section seeks to highlight and to identify basic facts and concepts, and includes exercises such as crossword puzzles and fill-in-the-blank questions geared towards this goal. The second section offers the reader the opportunity to apply and extend the knowledge gained in the first part of the guide. The activities included in this section are intended to encourage interaction between participants as well as introspection on the part of individual participants. Both independent and group activities are included in the guide. (Author/LH)

To assist project members in understanding the concepts and philosophy of community-based education in Teacher Corps programs, this document presents eight learning guides. The first two guides relate community-based education to regulations and to emerging community-based policy in the Teacher Corps program. They offer background material for the four guides that follow and provide information on and insight into the legislative intent for community involvement in

Teacher Corps. The following guides utilize four case studies of community-based education projects undertaken by the Teacher Corps to explore organizational concepts. Each includes guided activities, a list of behavioral objectives, and a self-test on organizational concepts. The case studies are briefly summarized, but not included. The final two guides treat issues of community council governance, role, and function. The Teacher Corps regulations, a policy paper on community-based education, and information on the functions of the community council are appended. (Author/WD)

Successful strategies used by a research team in establishing collegiality with school staffs so that research results could be successfully implemented are described. During the initiation phase of a five-year project, four basic strategies were used to win over school staffs: paying attention to changing needs in the schools, building trust and credibility, balancing long-term and short-term goals, and establishing personal relationships with teachers and administrators. During the second and third years of the project, when the aim was to implement the changes planned during the initiation year, many of the strategies used in the initiation phase continued to be used. A description is given of a variety of extrinsic and intrinsic incentives designed to motivate school faculty to attend inservice activities. It was considered fundamentally important to establish a relationship with teachers in which researchers regarded them as valued colleagues rather than as clients. (JD)

This booklet is a nontechnical summary of an extensive sociological investigation of the Teacher Corps, which was restricted to 10 universities and 42 schools. Data drawn from observation, questionnaires, and interviews with teachers, professors, and interns are used to present a composite picture of the program. The document includes a history of the Teacher Corps program, gives reasons for the evaluation study, and indicates methodology used. Two different kinds of information are woven together throughout the report: (a) generalized findings from the 10 Teacher Corps sites studied and (b) illustrative material drawn from two different sites--an urban university and a southern university. The summary of findings reports some intern dissatisfaction and friction with teachers. Specific characteristics of interns and teachers in the program and school changes are among the areas covered in the summary of findings. Conclusions drawn from the study are reported at the end of the booklet. (JA)

Document Type: CONFERENCE PAPER (150)

Journal Announcement: RIEMAR77

The legal implications of competency-based teacher education were the subject of a conference sponsored by the Multi-State Consortium on Performance Based Teacher Education. Representatives from state departments of education and their legal advisors met with a panel of consultants to discuss licensing and accrediting of teachers. The issues raised were:

(1) What does the litigation say about new directions in

licensing teachers and accrediting teacher education? (2) What does research say about what can be done to provide competent practitioners for classrooms and school leadership roles? The eight essays in this book evolved from the groundwork laid at this conference. The following subjects are examined: "The Law, the Courts, and Teacher Credentialing Reform," by Michael A. Rebell, a lawyer specializing in education law; "Techniques and Criteria for Designing and Selecting Instruments for Assessing Teachers," by Paul S. Pottinger, a clinical and social psychologist, Senior Associate and Director of Assessment Systems at McBer and Company in Boston, Mass.; "State Interest and Teacher Education Program Approval," "General Description of the Activities Associated with Reviews of Institutions and Programs," "Character and Use of Evidence in Program Approval," and "Due Process for Institutions and Students: Implications for Periodic Reviews," by Dr. Lawrence D. Freeman, Director of Teacher Education Program Approval, Illinois Office of Education; "Research Lags and Institutional Barriers Affecting Competency-Based Teacher Education Implementation" and a summation and report on the work of the conference by Sheila Huff, Research Fellow at the Educational Policy Research Center, Syracuse Research Corporation. Language: ENGLISH

Document Type: CONFERENCE PAPER (150)

Journal Announcement: RIENOV77

Six evaluation studies on Teacher Corps are first described and then analyzed. The two evaluation perspectives used for analysis were: (1) the standard evaluation paradigm as described by Astin and Panos and (2) the evaluation paradigm suggested by Parlett and Hamilton as "illuminative evaluation". The standard evaluation paradigm describes three main components: student inputs, student outputs, and educational operations; and finds causal relationships between these components. In contrast to the standard evaluation paradigm, the Parlett and Hamilton paradigm includes: (1) a study of the entire program: its rationale and evolution, its operations, achievements and difficulties; (2) an examination of the program within the school or educational milieu; and (3) a combination of methodological strategies for describing and analyzing a program in order to help "illuminate" salient program features. Results of this study indicate that, if one agrees with Astin and Panos that "the fundamental purpose of evaluation is to produce information which can be used in educational decision-making", then these evaluation studies have failed. They failed not because they did not follow the standard evaluation techniques reviewed by Astin and Panos, but because they did follow these procedures and used the standard perspective of evaluation. The challenge for evaluations, then, seems not to be apply these same evaluation procedures better, but rather to use alternative perspectives on evaluation. (Author/MV)

A series of check sheets developed for the use of Teacher

Corps Community Councils in their daily work are compiled in a single volume. The check sheets are intended to assist in developing strength from which they can share equally with the school district and the college in planning, implementing, and evaluating their Teacher Corps projects. In addition, check sheets are meant to be used in self-assessment and to suggest new ideas. Check sheets in such areas as community council goals, functions of community council leadership, community council interaction, community council decision making procedures and problem solving approaches are among the many areas of operation described. **Management for Change: Ideologies of Consensus and Conflict in Teacher Corps.**

Pine, Gerald J.

1979 31p.

EDRS Price - MF01/PC02 Plus Postage.

Language: English

Document Type: POSITION PAPER (120)

Geographic Source: U.S.; New Hampshire

Journal Announcement: RIEFEB80

Educational administrators and innovators need to become aware of the ideologies hidden in systematic management and organizational development theory if they wish to provide creative leadership in initiating and implementing educational change. Teacher Corps experience supports the notion that effective change is best implemented through a collaborative working relationship between teachers, administrators, students, and community members. A comparison of the consensus model and the conflict model of governance serves to illustrate the dissimilarities in the various schools of administrative thought. The Teacher Corps attempts to address the dilemma of creating a compromise management system in an educational organization previously structured around either a cold, strictly factual or a lax, personalized approach to management. The Corps suggests that administrators consider a different change model if educational change is not to be merely cosmetic, a possibility revealed by a case study concerning the detrimental effects racial tension exerted on a specific Teacher Corps project. Journal Announcement: RIEAUG79

This document presents the management system developed by  
the University of New Hampshire-Portsmouth Twelfth Cycle  
Teacher Corps Project. This system, although very flexible and  
continually modified, is presented as a model that may be  
useful to other projects. According to the report, project  
goals, training objectives, and expected outcomes are clearly  
stated. A Management by Behavioral Objectives Task Analysis  
(samples of which are contained in the document) is done. The  
project evaluation design has four stages: context, input,  
process, and product evaluations. Documentation of project  
activities and accomplishments is collected in a central  
documentation file, documentation records or journals kept by  
each project member, and a monthly documentation interview of  
each member. The planning period of the project contains needs  
assessment and major decision-making for tailoring and  
beginning each project component. Process evaluation is used  
to determine the extent to which the program has been  
implemented as planned. Product evaluation requires the  
specification of directly measurable objectives. Both an  
internal and external evaluation are conducted. The research  
evaluation design, the evaluation timeline, the statement of  
policy and procedures, and the list of contents of the  
documentation file are also included. (Author/JM)

This book represents the culmination of a twelve-month  
management training and development program conducted by the  
New England Teacher Corps Network for its project directors  
and staff. Wesley Brown and Perry Zirkel trace the

organizational evolution of Teacher Corps projects. William  
Smith presents a theoretical analysis of the management system  
requirements needed to facilitate desired school change.  
Roland Goddu presents a comprehensive analysis of management  
technologies and their uses. Thomas Wolfe defines some of the  
operational and value issues that should be considered in the  
process of evaluating, selecting, and applying management  
technologies. Gerald Pine presents an analysis of the  
ideologies hidden in systematic management and the "soft"  
technology of organizational development. H. W. Mayers  
presents a model for the management of collaboration in the  
governance of Teacher Corps projects. Robert Ho presents an  
analysis of collaboration and discusses its potential for use  
as a central integrating principle for project organizational  
design and direction. Robert Henderson discusses the theory of  
networks and draws on the experience of the New England  
Network to cite learnings regarding the organization of  
effective networks. (Author/MLF)

An overview of the American Association of Colleges for  
Teacher Education March 1979 clinic concerning management  
practices in teacher education inservice program operation is  
presented. Two Teacher Corps projects, one urban and one rural  
in setting, are used as the basis for discussion. Three areas  
of management practice are considered. The establishment of an  
effective communication system, the logistics and  
organizational details pertaining to inservice education  
efforts, and the design of a consistent decision-making policy  
for inservice programs are all major topics of concern and  
discussion. Copies of the description sheets for the Teacher  
Corps case studies and of the key questions and issues  
presented to clinic participants are appended. (LH)

This module is designed to provide the prospective teacher of troubled youth with experience, knowledge, skills, and attitudes necessary for carrying on successful action research. The terminal objective is described as follows: given information relevant to writing a research proposal (outline, proposal format, and the means to conduct research, i.e., gathering and organizing data and research procedures), the participant will write an action research proposal for a master's degree project which will be scientifically developed and relatively refined for teachers in the field of delinquency-prone youth. The module is divided into the following sections: description, steps for completing the module, preassessment, description of enabling activities, postevaluation, remediation, and appendixes. The appendixes contain the following elements through which the student may choose to work: (a) Investigate the Library, (b) Investigate Types of Research, (c) Investigate Collecting and Organizing Data, (d) Investigate Tools of Research, (e) Investigate Statistics, and (f) Learner Options. Terminal objectives and steps for completion are given for each of these elements. (JA)

This report is intended to describe and analyze the present state and future needs of performance-based materials. It is limited to materials presently available for dissemination. The first section outlines the background of the project and describes the procedures for selecting, classifying, and describing the materials. The second section comprises an

alphabetical listing of all materials described. In the third section, the materials are classified and analyzed. A system of 11 categories is used to classify the major competency-type, substantive emphasis or function. The categories are 1) basic interactive teaching skills; 2) instructional planning and design skills; 3) teaching strategies; 4) analysis of classroom activity; interaction systems and guides; 5) instructional decision making; 6) student diagnosis and evaluation; 7) foundations of education; 8) content areas; 9) media and instructional technology; 10) educational staffing and instructional organization; 11) staff development. The materials are also analyzed for their behavioral status, the kinds of behavioral objectives attended to, their activity structure, and administrative features. The last two sections contain descriptions of the materials. One section includes detailed descriptions of materials previewed by the authors; the other contains short descriptions of non-previewed or limited availability materials. (RT)

Journal Announcement: RIEAUG80

This report by a National Task Force of the Teacher Corps provides charts, tables, and analysis of two distinct facets of previous analysis of the work of the Teacher Corps. The first is a detailed consideration of the availability and use of technical resources. Included are considerations of the purposes for providing technical resources; methods of identifying, analyzing, and setting priorities on necessary resources; and recommendations on organizational structure for delivery of resources. The second issue discussed was program evaluation. The components, purposes, and design of program evaluation are set forth, and a framework for effective evaluation is presented. Discussion is offered on governance as well as on collaborative mechanisms, rationale, and characteristics of a proposed evaluation design. (JD)

Language: ENGLISH

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIESEP77

This study investigated mathematical retention of junior high school students over the summer months. Approximately 41 percent of the eighth-grade subjects used in this study were Chicano; the others were Anglo, Black, Oriental, and American Indian. The subjects were divided by ethnic group--Chicano or non-Chicano--and according to whether or not they had received pretraining on the tests. The retention tests, administered in June and again in September, measured (1) mathematical reasoning, (2) computation, (3) comprehension, and (4) the ability to read mathematical prose. It was found that the Chicano students who were pretrained in June scored higher than those not pretrained. In general, no loss of comprehension or mathematical reasoning over the summer months was found, and the ability to read mathematical prose seemed to increase slightly over the summer months. (MM)

Document Type: CLASSROOM MATERIAL (D5D)

Journal Announcement: RIENOV74

This document is one of a series of eight Teacher Education Modules developed by Adams State College Teacher Corps Program. As a result of completion of this module, which is itself a cluster of nine mathematics learning modules, the elementary education student will: a) gain a knowledge and understanding of the concept of elementary school mathematics; b) have a deeper understanding of the specific topics than would be expected of an elementary student; c) realize and appreciate the logical development of material from precise

definitions based on intuitive concepts to facts derived from these concepts; d) increase his confidence in his own mathematical ability; e) see mathematics as a body of interdependent knowledge; and f) realize that mathematics proficiency in the mechanical processes of mathematics is not sufficient for the present-day student. Each module contains a statement of the underlying rationale; a statement of the objectives of the module; enabling activities, which are generally taken from other reference works; and procedures for evaluation. The topics of the modules include a) logic; b) set concepts; c) whole numbers and counting; d) operations on sets; e) binary operations; f) addition, subtraction, and inequalities of whole numbers; g) multiplication and division and the distributive properties of operations on the set of whole numbers; h) fractions; and i) geometric concepts. Journal Announcement: RIESEP80

The need for a multidimensional approach to teacher education is discussed in light of the educational trends of the last decade, and the rationale behind Murray State University's (Kentucky) inservice teacher education program is explained. A short history of the university's involvement with inservice teacher education is given, and an outline for the design of similar programs to be instituted in other universities is offered. A summary of the processes and functions in teacher inservice program development methodology is appended. (LH)

The 24 learning modules contained in this booklet are divided into three module clusters designed to give teacher trainees adequate background and training in music skills that can be adapted to meet the musical needs, interests, capabilities of children in the primary grades. The three clusters are Music Fundamentals, Instruments and Their Use, and Techniques of Music Instruction. Each module and each module cluster include statements of the objectives, lists of prerequisites, learning tasks, and resources. Instruments are included for both pre- and post-assessment. (HMD)

Journal Announcement: RIEAPR81

The first of two papers presented in this publication examines the problems of establishing and maintaining a rapport between colleges of education and local schools for their mutual benefit. In an ideal setting and relationship, colleges would conduct research and controlled demonstrations, with the results of the research being implemented by the schools for the continued improvement of educational practice. Schools would define their major needs and this definition of needs would produce research agendas the colleges would undertake. Ways in which this ideal could be achieved are considered. The second paper describes a program in which collaboration between a consortium of institutions of higher education and local education agencies developed an inservice field-based program for certification in early childhood

This book on a rather widely known but less widely applied technique for teacher education is intended both to inform those people who are unfamiliar with microteaching and to caution those who see it as a final answer to teacher training. The first chapter provides a working definition of microteaching; surveys its importance in supervision, research, and other areas; and evaluates its potentials and problems. The second chapter presents the component-skills approach to a mastery of teaching skills and demonstrates the value of the model-oriented technique. The elements of microteaching (e.g., video tape recordings, patterns of training) and the structuring of a microteaching program are discussed in the third chapter. Chapters four and five take up the specific advantages and drawbacks of microteaching for pre-service and in-service teacher training programs. The importance of microteaching for specialized situations--teaching in the inner city, training elementary teachers, teaching in liberal arts colleges, training Peace Corps and Teacher Corps volunteers, and micro-counseling--is evaluated in chapter six. The conclusion presents ways in which microteaching can be of value in educational research. (A short bibliography and an article on evaluation techniques for master teachers are appended.) (LH)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEMAY78

The Teacher Corps Corrections Program was generated at the University of Oregon in 1970. This program was to recruit an intern group on the junior undergraduate level and train them to be teachers capable of working with alienated and minority populations in either an urban school or a correctional setting. The program had a strong theoretical orientation. The need for accomplishing structural change in established institutions and training a new kind of teacher able to operate as a change agent was emphasized. The major purpose of this study was to evaluate to what extent the program succeeded in generating within the interns the abilities and commitment to act as change agents in educational/correctional environments. Through the use of a tape recorded interview/analysis procedure, this study examines the impact on 19 former interns in terms of their self-perceptions, current activities and present opinions regarding societal change. The study also determines how well the Teacher Corps program was able to prepare interns for involvement in traditional and on going institutions and agencies. An evaluation of how involved former interns currently are in activities designed to make traditional institutions more responsive and less alienating for the clients they serve is presented. Results indicate that 9 of the interns felt that the program did not adequately train them for the role of change agent, while 9 felt that the program had. It was found that former interns have done little to live up to the predicted change agent behavior patterns of the original Teacher Corps proposal. It is suggested that the program's goal of training minority personnel for juvenile corrections careers was not met, and possible explanations for this are suggested. (Author/AM)

Journal Announcement: RIEJUL81

This is the first of three reports geared to educator training and which encompass alternative approaches to collaboration and expert input, as well as a range of diverse topics related to adult learning. This particular document is a collection of papers presenting alternative models for collaboration that relate to various aspects of adult learning and training. Model 1 is based on a meeting of experts in higher education who were brought together to identify critical gaps in our knowledge and understanding of adult learning that need to be addressed by educator trainers. The training connection between the business sector and institutions of higher education is addressed in Model 2, by discussing the need for clarifying the interpretations of training as a discipline and a profession, and presenting a cooperative training model that attempts to capitalize on the interests and expertise of both business and higher education. In Model 3, the mission of schools of education is expanded to encompass the world beyond schooling by presenting an organizational model that brings together various academic units to address the training needs of workers. Using a medium-sized, private institution of higher education as a prototype, Model 4 reveals the extent of university faculty and administrator involvement and interest in adult learning-related endeavors and subsequent collaboration with colleagues. Finally, Model 5 presents another means of collaboration among experts involving the development of a position paper by each participating professional that addresses a common topic. (KC)

Journal Announcement: RIEJUL81

This is the second of a series of three reports geared to educator training and which encompass alternative approaches to collaboration and expert input, as well as a range of diverse topics related to adult learning. This particular document describes a symposium conducted by the Adult Learning Potential Institute in June, 1980. For the symposium, a diverse group of nine selected participants were asked to respond to a number of critical questions concerning adult learning and training in the future. After an orientation by Winifred Warrat, in which she invites participants to be creative and daring, the first part of the report contains selected comments from group discussions. The second part of the report contains short papers given, by the nine participants on the following issues: learning versus information processing; meeting the stressful future; leisure and adult learning; the necessity of changing old patterns to meet adult learning needs; technology, folk heroes, and adult learning; dependency and authority as blocks to adult learning; the future of the education business; adult learning potential; and new models of learning. A short selection of random comments made during the symposium and a list of participants conclude the report. (KC)

Journal Announcement: RIEJUL81

This is the third of a series of three reports geared to educator training and which encompass alternative approaches to collaboration and expert input, as well as a range of diverse topics related to adult learning. This particular document begins with a forecast of what might occur over the next twenty years in adult learning. The remaining five sections present critical issues that have implications for adult learning and training in the future. The first section focuses on the critical issue of unemployment, in which the "humanness factor" is presented as a major void in resolving the dilemmas faced by unemployed workers; next it provides a model that begins to address the dilemmas through the humanness factor. The next section acknowledges aging as a critical issue that needs to be addressed through training practices, demonstrating a method by using the family as a model of training. Leisure is the critical issue focused upon in the third section, which discusses the importance of educators needing to understand the profound impact that increased leisure will have on society in the future; four training models are presented. The fourth critical issue identified is women, with special emphasis placed on the potential and emerging power of middle-aged women in molding our culture; this discussion is followed by a comprehensive training agenda. Finally, a leadership training model is set forth for addressing the fifth critical issue, community education.

with an overview of the purposes, methods, and techniques for testing English as a Second Language (ESL) and practical classroom applications. Given the series of learning alternatives on testing that are presented in this module, the participant should be able to: (a) demonstrate knowledge of basic testing principles and concern, and (b) apply knowledge of principles to test evaluation and construction. Exercises are provided to serve as both pre- and post-assessments of the participant's mastery of the terminal objectives of the module. Learning alternatives are presented in outline form. The alternatives include various readings and the evaluation of 29 specific tests in terms of the needs of a particular group of second-language learners. (JA)

This module provides the participant with an overview of the structure of the Puerto Rican family and the forces which have affected it. It is believed that the learning alternatives in this module will provide the reader with greater insight into the family lives of Puerto Rican children. Upon completion of this module, the participant will be able to: (a) describe the traditional structure of the Puerto Rican family and the roles of its members, (b) explain the effect of the Americanization of Puerto Rico on the Puerto Rican family, and (c) discuss the effect of mainland migration on the structure of migrating families. The participant completes a preassessment test, chooses tasks from a list of alternatives, reads the attached narrative, and concludes the module with a postassessment test. (A bibliography is included.) (PB)

This instructor's guide for a modular sequence in English as a second language is itself in modular format. It presents the rationale for, and the objectives and organization of, the sequence modules as well as management guidelines for the instructor, including checklist forms for each module in sequence. The objective of the entire sequence is to provide teachers with a theoretical background and with practical training in the methodology of teaching English as a second language, which can be adapted to meet the needs, interests, and capabilities of the linguistically different student. (HMD)

The purpose of this modular sequence is to provide teachers with a comprehensive awareness and concrete applications of Puerto Rican culture with respect to public school classrooms. It focuses on the teacher's individual needs and specified competencies to be attained. The sequence is divided into 12 modules (see SP 008 975-987), each of which include a preassessment test, a postassessment test, and learning tasks. Competency is assessed through successful completion of the learning activities and postassessments of each module. (This document is a description of the entire modular sequence and contains a bibliography.) (PB)

The dialect of English as spoken by native Puerto Rican Spanish speakers is extensively influenced by interference from the speakers' native language. Since exposure to a language affects one's ability to use it, the speaker's position might affect his access to English and/or his willingness to speak it, and, therefore, his proficiency in it. It is important for a teacher to be aware of the conflicting linguistic features of Spanish and English which cause difficulty for a Puerto Rican child learning standard English as his second language. (This module provides an overview of interference in morphological, syntactic, and lexical areas. A pretest and posttest are included, along with a list of learning strategies and a four-item bibliography.) (Author/MJM)

Of the multitude of dialects which exemplify the Spanish language, Puerto Rican Spanish has suffered the most severe rejection by language purists and pseudolinguists. The need to take a clear and open look at Spanish spoken in Puerto Rico is preeminent. It is the purpose of this module to clarify some major points of controversy regarding Puerto Rican Spanish by presenting an extensive discussion concerning the background and intent of the language. A preassessment and a postassessment test are included. (Author/MJM)

Document Type: CLASSROOM MATERIAL (050)

Journal Announcement: RIESEP75

The introduction to this teaching module states that  
 mounting research evidence supports the linguistic and  
 academic benefits of early instruction through the vernacular,  
 based on the premise that non-English speaking students who  
 learn to read in the vernacular (and accelerate their  
 conceptual development in their mother tongue as they learn  
 English) will not become academically retarded; they will in  
 fact learn English more efficiently and their feeling of  
 "belonging" to the majority culture might be established. The  
 purpose of this module is to enable participants to do the  
 following: (a) identify their feelings about nonstandard  
 dialects and discuss how teacher attitudes affect teaching in

the vernacular; (b) define an English as a Second Language  
 (ESL) approach, a transitional bilingual approach, and a  
 balanced bilingual/bicultural approach; and (c) write a  
 vernacular reading lesson including an affective, a cognitive,  
 and a psychomotor objective. Participants complete a  
 preassessment test, choose tasks from a list of instructional  
 alternatives, and conclude the module with a postassessment  
 test. (PB)

Journal Announcement: RIESEP75

The introduction of this teaching module states that successful construction and implementation of a reading curriculum which meets and satisfies the growth potential of individual students depends on the teacher's ability to assess individual needs. The Individual Reading Inventory (IRI) provides a diagnostic framework for integrating and synthesizing previous modules into cohesive reading programs. The purpose of this module is to enable participants to (a) define the four reading levels that the IRI measures; and (b) analyze the reading behavior of students based on the informational yield of an IRI, and determine at what level the students function. Participants complete a preassessment test, choose tasks from a list of alternatives, and conclude the module with a postassessment test. (PB)

Document Type: CLASSROOM MATERIAL (050)

Journal Announcement: RIESEP75

The purpose of this teaching module is to enable participants to demonstrate and apply their knowledge of comprehension and critical thinking skills, using the Watson-Glaser Test of Critical Thinking Ability. Critical thinking is defined as an attitude of thoughtful consideration of the problems and subjects that come within one's experience, knowledge of the methods of logical inquiry and reasoning used to deal with such problems and subjects, and skill in applying such methods. Skill in making evaluative and critical decisions becomes especially important because of mass media influence on public opinion. Participants take the Watson-Glaser Test as a preassessment, choose activities from a list of alternatives, and retake the test as a postassessment. (PB)

The intent of this teaching module is to present structural word analysis information to participants so they can be effective teachers of reading. The module attempts to prepare participants to develop and utilize teacher-prepared materials dealing with structural analysis. Upon completion of this module, participants should be able to (a) syllabicate a given list of words, (b) properly accent a given list of words, (c) identify the prefixes and suffixes in a given list of words, (d) state and apply a syllabic generalization, and (e) state and apply an accent generalization. Participants complete a preassessment test, choose tasks from a list of alternatives, and conclude the module with a postassessment test. (PB)

Journal Announcement: RIEAUG74

Several module clusters were developed at Glassboro State College as the result of involvement in the Camden Teacher Corps project. The clusters are the primary mode of instruction in this competency-based teacher education program. Many of these modules are based on a list of teacher competencies developed by members of the Elementary Education Department at Glassboro State. The list represents the core competencies and is intended to be representative of a behavioral approach to teaching. All of the modules specify competencies and describe a scenario for self-paced learning in a field-oriented setting. The purpose of the module cluster which comprises this document is to develop knowledge and teaching strengths in several reading instructional areas: reading readiness, beginning reading experiences, word recognition, comprehension, and general elementary reading instructional practices. For each of these instructional areas the student is required to define the reading skill area, analyze the reading skills which characterize the mastery of the reading instructional area, examine materials related to the area, observe an experienced teacher developing skill in a specified area, and teach skills which are part of each reading instructional area. (DD0)

Examining Materials for Developing Word Recognition Skills, g) Observation of Word Recognition Instruction, h) Teaching Word Recognition Skills, i) Examining Comprehension Materials, j) Observation of Comprehension Instruction, and k) Teaching Comprehension Skills. For each module, the objective, prerequisite, preassessment, instructional activities, postassessment, and remediation are specified. (JA)

This module cluster enables (a) students to operationally define various classroom behaviors; (b) define and utilize behavioral principles; and (c) correctly employ measurement methods which facilitate information gathering, monitoring, and management of academic and/or "problem" classroom behaviors. It contains modules in the following ten areas: (a) operationally defining behavior, (b) defining operant terms, (c) basic operant principles, (d) analysis of behavior in operant terms, (e) operant measurement techniques, (f) specifying the situation in which measurement takes place, (g) measurement of a discrete response, (h) measurement of a continuous behavior, (i) examples of operant studies, and (j) modification of social behavior (or inappropriate behavior). Each module is broken down into (a) objective, (b) prerequisite, (c) pre-assessment, (d) uniform instructional activities, (e) supplementary instructional activities, (f) post-assessment, and (g) remediation. Many of the modules include behavioral examples which have been carefully selected to reflect the kinds of problems teachers frequently report as warranting "modification." (MK)

Journal Announcement: RIEAUG74

This is one of several module clusters developed for the Camden Teacher Corps project. This module cluster is designed to introduce students to urban studies through the application of a geographic approach. Although geography shares with other social sciences many concepts and methods, it has contributed a distinctive set of viewpoints and a unique spatial focus. Understanding these approaches, achieving a competence in several techniques of urban analysis, and gaining some experience in applying the principles learned comprise the general objectives of this cluster. There are eight modules in

this cluster: a) Rise of Urbanism and the Nature and Growth of Cities; b) Urban Problems in a Geographic Context; c) External Relations and Internal Structure of Cities; d) Techniques of Urban Analysis; e) Comparative Study of American and Foreign Cities; f) Instituting Change in the Urban Environment; g) New Towns and Future Regional Development; and h) Application of Principles of Urban Geography: Planning an Urban Environment. For each module objectives, prerequisites, preassessment, instructional activities, postassessment, and remediation activities are stated. (JA)

Journal Announcement: RIEAUG69

Big-city administrators face a multitude of problems falling under three general headings--finance, discontent, and educational programs. Factors contributing to the financial problems in big cities include (1) the decline in the proportion of manufacturing employment compared to that of suburban areas, (2) decreases in taxable assessed valuation, and (3) the failure of State and Federal aid to equalize the maldistribution of local available resources. Discontent is evidenced by teacher militancy, parent alienation from the power structure of the system, and student activists rebelling against authority. One writer argues that the trouble with much of the education of disadvantaged children is that it is not quality education. Compensatory education has been an attempt to correct this situation, but with only marginal success. There has been an abundance of programs, projects, and processes introduced to improve urban education, including Head Start, Upward Bound, the Teachers Corps, Central Cities Projects (CCP), and many others. Under the auspices of CCP both old and new programs are being used to improve inner-city education in such cities as Syracuse, Seattle, Los Angeles, Milwaukee, San Diego, Memphis, and New Orleans. Journal Announcement: RIEMAR75

This publication is the result of a Multicultural Education/Competency Based Teacher Education (M/CBTE) project which, among other objectives, sought to bring together the findings of separate studies, projects, and research efforts. The project proposed to take a broader approach to the overall problem of quality education by seeking to identify generic concerns and needs common to all ethnic groups and diverse cultural situations. The project at the same time sought to identify those needs felt to be unique or more relevant to certain cultural circumstances and situations than others. Part 1 of this document is in the form of a prologue; it is entitled "Antecedents to Developments of and Emphasis on Multicultural Education." Parts 2-5 were written by four educators and/or teams from the black American, Spanish-speaking American, and native American academic communities who were invited to contribute. Part 2 treats teacher competencies from the perspective of the black American educator. Part 3 treats teacher competencies from the Spanish-speaking educator's perspective (including views of Puerto Rican Americans, Chicano Americans, and Cuban Americans). Part 4 treats teacher competencies from the perspective of the native American, recognizing the divergencies of views among the nearly 300 tribal groups. Part 5 seeks to identify teacher competencies common to all groups as well as those recognized in the general society as evidence of accepted requirements and standards. (Editor/JA)

Document Type: BIBLIOGRAPHY (131)

Journal Announcement: RIEJAN78

The selective annotated bibliography lists over 200 materials for teaching ethnic and multicultural studies in grades K through 12. The materials were published after the mid 1960s. Special consideration was given to materials that emphasize group values, social institutions such as the family and child rearing, and other topics such as community and work. The materials are arranged in 12 categories. Ten of these are organized around specific ethnic groups: Black Americans, Chinese and other Asian Americans, Eastern European Americans, Italian Americans, Japanese Americans, Jewish Americans, Mexican Americans, Native Americans, North European Americans, and Puerto Rican Americans. The other two categories are more general. These materials relate to prejudice and discrimination, and to explicit multiethnic, multicultural themes. Each entry is coded to reflect type of material and appropriate audience. Student resources are defined by reading and conceptual levels; teacher resources are defined by intent of the material; and curriculum materials are defined by grade level. The entries also provide information on author, title, publisher, date, and a critical annotation of paragraph length. (Author/AV)

This self-help guide for the music teacher is one of a series of eight Teacher Education Modules developed by Adams State College Teacher Corps Program. The guide itself consists of 11 modules, the first five of which focus on the mathematical and scientific aspects of music--pitch, tempo, duration, time, and key. These five modules are accompanied by simple exercises for the teacher to practice. The remaining modules are devoted to teaching music to children of primary school age. They are entitled a) "Teaching Rote Songs," b) "Teaching Listening Lessons," c) "Rhythm Instruments," d) "Tone Bells," e) "The Autoharp," and f) "The Realities of the Arts to Primary Children." The entire guide is aimed at the primary teacher whether or not she or he has "musical talent." (HMD)

This is one of a series of eight Teacher Education Modules developed by Adams State College Teacher Corps Program. The goals of this module package are listed as follows: a) to introduce the intern to music for elementary school children; b) to enable interns to develop knowledge and skills of an

elementary level in music; c) to enable interns to translate written music notation of elementary difficulty into song; d) to acquaint interns with methods and materials utilized in elementary music instruction; and e) to enable interns to use many of the traditional instruments in elementary music education, i.e., autoharp, tone bells, and rhythm instruments. Listed are competency goal statements, prerequisites, and resources. The package is divided into the following modules: Pitch; Tempo and Duration; Sharps--Flats--Key Signatures; Pitch and Duration Simultaneously; Dots After Notes; Teaching Rote Songs; Use of Rhythm Instruments; Tone Bells; Autoharp; and the Realities of the Arts to Primary Children. Each module lists time, objectives, and enabling activities and describes evaluation. There is a criteria checklist after each module for the cooperating teacher, team leader, and on-site instructor. Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIESEP74

This paper describes the Mutual Involvement Review Activity (MIRA) procedure for helping teacher education institutions to restructure their programs in the competency mode. This procedure is a device for organizing the use of a consultant team to cover all areas involved in the introduction, development, and operation of a new mode of teacher training. Designed to reflect a competency-based teacher education (CBTE) project as seen by others experienced in the field, the format consists of questions on the following topics: a) structure for CBTE, b) project governance, c) financial resources, d) program development, and e) management plan. The questions are used as a guide for discussion with people from various role groups, such as college administrators, college professors of education, school district administrators, and teacher representatives. Within three weeks following the discussions, the MIRA consulting team will write a report for the professional use of MIRA and project members. (PD)

Journal/Announcement: RIEDEC70

This document reports the second cycle Teacher Corps program in Chicago, which was designed to prepare elementary teachers for the inner-city schools. An introductory section lists program objectives, which emphasized improvement of education of the disadvantaged and school-community involvement of corpsmen. Formal and informal evaluation and research related to the program and innovations introduced into the second cycle are described. The Teacher Corps program's impact on educational programs of the consortium institutions is discussed. Community involvement activities of team leaders and interns in the various neighborhoods where their schools were located are summarized. The role of the intern in the school is traced including his involvement in an inservice program of observation, individual and small group instruction, and gradual progression to full teaching responsibility--as an extern in the second year. Recommendations for change in the program are listed. Appended are interns' reactions to the program, as voiced at the terminal conference; a list of courses and instructors; team plans for community activities; and two papers on the consortium course, Teaching the Language Arts in the Elementary School, which emphasize a systems approach and the use of the videotape recorder in teacher education. Not available in hardcopy due to marginal legibility of the original document. (JS)

Journal Announcement: RIEJUN71

The highlights of the Navajo Area education program and activities are described in this progress report for the 1969-70 school year. Brief descriptions of programs, activities, and events are classified by 4 goals set by the Tribal Education Committee in 1966: (1) to attack the unique problems of Indian students by the provision of unique programs suited to the needs of these students, such as the English-as-a-Second-Language program; (2) to seek maximum feasible involvement of parents and tribal leaders in the education program; (3) to develop a public information program which reflects progress made on a continuing basis; and (4) to endeavor to assist in any way possible so that full utilization can be made of resources, including the Economic Opportunity Act, Public Law 89-10, and other programs which can benefit the Indian people. Significant accomplishments discussed in the report include completion of social studies and language arts guidelines for Navajo students, establishment of bilingual-bicultural kindergartens, initiation of a model dormitory program emphasizing guidance services, and inservice training workshops held during the year. Programs listed as supported by Government and private funds include teacher corps, student teachers, community school development, and work-study. Increased involvement of the Navajo people in the education of their children is cited as the major factor in the continuing success of the Navajo Area education program. (JH)

Language: English.

Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; Maine

Journal Announcement: R1ENOV81

A Teacher Corps project to deliver staff development services focused on five educational settings: a correctional youth center, a high school, a junior high school, a youth group home consortium, and a college of education. It was felt that comparing the results of needs assessments conducted at each facility would enable useful analyses of common assessment factors and perceived priorities. Staff awareness and acceptance of the program was enhanced by involving school administrators and by presenting staff orientations. The process of developing the needs assessment varied for each

site. Methods included individual interviews, group discussions, and questionnaires. The results showed both common and unique concerns among the diverse groups. Staff at all five sites expressed the need to redesign existing courses and create new curriculum materials and for students to become more responsible and better decision makers. It was concluded that a needs assessment must provide flexibility to deal effectively with both staff and administration in any given location. (FG)

Document Type: EVALUATIVE REPORT (142)

Geographic Source: U.S.; New Hampshire

Journal Announcement: R1EAG79

The basic problems faced by those implementing a project of assessing school needs and initiating change are discussed. An example of a teacher corps project funded for such an endeavor is summarized. How the initial problems of assessing needs to determine project goals and establishing a credible change relationship with school personnel were handled is described. Emphasis was placed on giving teachers the power and training to determine the focus methods for the two larger parts of the assessment program: needs of teachers and students. To this end, members of the staff received training in needs assessment and design. The importance of resolving conflict between staff and administration, of establishing trusting relationships between the agents of change, and of sharing the decision making process is emphasized throughout this report. Journal Announcement: RIEMAY80

The progress of groups of junior high school students working together was measured by the developmental theories of Bloom, Piaget, and Kohlberg. Each group was assigned the task of designing a coat-of-arms representing their neighborhood. This project involved not only physically producing a shield (designing, drawing, choosing colors) but also comprehending their community and creating symbols for it. This study traces the thought processes and group dynamics that eventually produced each coat-of-arms, using as reference points Bloom's taxonomy of sequential and progressive educational objectives, as well as Piaget's theories on cognitive development and Kohlberg's stages of moral development. Journal Announcement: RIEDEC74

This training package in nonverbal communication and the affective domain rests on the rationale that nonverbal communication is a support system for the verbal message that we convey and that it can be divided into two channels--the vocal and the kinetic. The vocal channel consists of the pitch of the voice, and the kinetic consists of postures, gestures, and other body movements. The package is divided into four units or learning modules, which are preceded by a general overview. The purposes of the four units are to: (a) give prospective teachers an overview of nonverbal communication and provide a cognitive base from which to operate, (b) provide the participant with an opportunity to learn how he relates his feelings and attitudes to others without words and to improve his perceptions of the feelings of others, (c) provide participants with information about nonverbal communication to enable them to determine its value in the learning situation, and (d) prepare the student to discriminate between messages given on the kinetic and vocal channels and to discuss the critical interdependence of the channels on each other. Enabling activities for the modules include readings, discussion in large and small groups, role playing activities, individual exercises, and the design of mini-lessons. A pre- and post-measurement instrument is included in the package. (HMD)

Document Type: CONFERENCE PAPER (150)

Journal Announcement: RIEJUN75

This paper focuses on the theory of organizational change and development as presented by Ronald G. Corwin in his book, "Reform and Organizational Survival: The Teacher Corps As an Instrument of Educational Change," and the implications this theory has for efforts at institutional change which are being made by the Teacher Corps. Corwin identifies two models of organizations: (a) a rational model which presumes that organizations are goal-directed entities, and (b) a political model which presumes that direction is determined by external constraints on the organization and by commitments made by the members in the course of bargaining for resources. In his analysis, Corwin integrates political and rational aspects of organizations. The author, in an attempt to expand or modify Corwin's theory, suggests a model called "muddling through" and recommends that organizations be viewed on a continuum rather than at either end of the continuum. Applying Corwin's theory to his experience with Teacher Corps projects, the author suggests that the difference between successful and unsuccessful projects seemed to lie in: (a) how adroit the staff were in dealing with political constraints, and (b) how the staff were able to deal with political crises in one aspect of the project while keeping other aspects on a rational basis. Journal Announcement: RIEMAY74

The Atlanta public schools, Federal and state assistance, and community services provided the following resources for Walden School's instructional program: The Instructional Assistance Program provided a team comprising a lead teacher, a language arts teacher, a social studies teacher, a foreign language teacher, a mathematics teacher, a science teacher, a media specialist, a Spanish speaking assistant teacher and a typist working under the leadership of the Coordinator of Foreign Languages to develop a perfect multi-media learning activity packets designed around a core curriculum. A Dynamics and Influences of Culture and Environment Program was funded by the Instructional Assistance Program for the second year. The Spanish speaking assistant teacher was a participant in the Career Opportunities Program. Through the Title I Program, funded under the 1965 Elementary Secondary Education Act, a lead teacher, a reading teacher, and six instructional aides worked with first through third year pupils to improve the instructional program with emphasis on reading and English. The Teacher Corps Program provided two teams, each consisting of two lead teachers, eight senior teachers, and 18 paraprofessionals to work with the first and second year pupils. The Program for Education and Career Exploration was a guidance program that provided experiences for second and/or third year pupils that would enable them to make realistic educational and career choices at future major decision points. Journal Announcement: RIENOV81

The trainer's manual presents information to be covered in a workshop for regular educators on characteristics of all handicapping conditions. Strategies in the workshop acquaint trainees with techniques and methods for identifying, referring, and assessing the handicapped child, with emphasis on the awareness and understanding of the characteristics of the mildly and moderately impaired student in the classroom. Individual sections cover the following conditions: physical handicap, significant limited intellectual capacity, significant identifiable emotional or behavioral disorder, hearing handicap, visual handicap, speech handicap, and perceptual-communicative disorder. Usually outlined are definition, characteristics, behavior characteristics, methods for teaching, equipment needed, and resources for information on each condition. A list of parent and professional reading resources completes the document. (SB)

Journal Announcement: RIEJUL81

This document on inservice training and staff development is one in a series of four developed to provide a comprehensive overview of the scope of training practices relating to adult learning. Directed toward educators designing and conducting training programs and toward trainers of trainers, these contributions by adult educators and developmental theorists present interpretations of existing knowledge and new concepts in adult learning. Chapter 1 briefly addresses some adult educator perspectives and implications of adult development in providing an appropriate definition. Chapter 2 discusses the inservice educator as an adult learner and highlights the affective dimensions of adult learning. Chapter 3 focuses on what contributes to the effective educator-trainer. In chapter 4 the current status of adult learning theory is discussed. Chapter 5 presents essential concepts of adult learning potential as they relate to training. Chapter 6 focuses on the dilemma facing higher education and public school systems as they both attempt to address inservice education. Chapter 7 emphasizes how stressful life events influence the educator-trainer. Existing approaches to stress and strategies for adaptation are provided. Chapter 8 focuses on development of a total person model of adult learning theory. (YLB)

This document--a survey identifying federal legislation and programs that in some way address the adult learner--is one in a series of four developed to provide a comprehensive overview of the scope of training practices relating to adult learning. It provides a panoramic view of adult learning in response to national priorities based upon patterns of legislation beginning with the Sixty-sixth Congress, 1919-1921, and the resultant federal programs emanating out of the specific acts of Congress since then. Section 1 contains these summary tables: overview of eight federal departments (and twenty-six agencies within them) and seven independent agencies offering programs relating to adult learning; frequency of types of assistance; index of federal programs relating to adult learning by types of assistance; and patterns of congressional activity in enacting legislation relating to adult learning, for which is presented the following information: Congress that enacted the legislation, title of legislation, title of existing federal program, and Office of Management and Budget (OMB) catalog number. In section 2, The Survey, is found the table of results regarding the 195 programs surveyed. Information provided includes (1) title and/or number of legislation, (2) administering federal agency, (3) OMB Catalog number, (4) existing program, (5) type of assistance offered by the program, (6) dollar allocation for fiscal years 1977, 1978, 1979, and (7) program description. Journal Announcement: RIEJUL81

This document on involvement by states and higher education in adult learning is one in a series of four developed to provide a comprehensive overview of the scope of training practices relating to adult learning. It consists of two sections, each summarizing the results of extensive surveys pertaining to training programs for special adult learner populations. Part 1 provides profiles on the involvement of seven specially-selected states in adult educational policies, priorities, and programs. Programs offered in adult, bilingual, vocational, and continuing education are encompassed, with special attention given to related inservice training practices. These states are profiled: California, Florida, Massachusetts, Michigan, Montana, New York, and Texas. Information provided includes synopsis of state-operated services to target groups, participation trends, contact personnel, listings of institutions of higher education and delivery of services, community programs and projects, and allocation of federal funds. Part 2 gives a nation-wide overview of adult learning programs offered by 807 institutions of higher education in five selected areas of training: Adult and Continuing Education, Recreation and Leisure, Gerontology and Aging, Human Resources/Services, and Community Studies. This part includes sixteen pages of summary diagrams and the twenty-eight page survey. (YLB)

The manual is designed for a three hour training session to help participants become aware of P.L. 94-142 (the Education for All Handicapped Children Act) and its implications, be presented with frameworks to be utilized when planning for and implementing P.L. 94-142, and practice generating strategies and procedures which help to facilitate implementation of P.L. 94-142. The document contains the following: a list of workshop objectives; a pretest answer sheet; an outline of full services for handicapped children; statements regarding responsibilities for agencies/personnel in special education; a case study; basic concepts for P.L. 94-142; due process flow charts; local education agency (LEA) requirements regarding student evaluation, the planning conference, parent participation, the individualized program, due process/hearings, surrogate parents, and confidentiality; LEA personnel development plan; a paper titled "How to Look at Your State's Plans for Educating Handicapped Children;" a state compliance plan; questions about P.L. 94-142; and sample forms from North Dakota. This booklet describes some recent participant planned staff development activities in Massachusetts. To varying degrees, programs are initiated, governed, and designed by participants. In the first section, profiles are presented of six programs which represent a cross-section of models serving small, medium, and large school systems. Included in this section are programs which highlight self-help groups, curriculum development, coordination of inservice activities, and peer training. Program abstracts in the second section provide information on other programs including purpose, training structure, number of participants, and funding source. The final section lists teacher center and Teacher Corps programs in Massachusetts as well as educational collaboratives and locally-based organizations with extensive experience in staff development. Journal Announcement: RIEAPR78

This issue of the Multi-State Consortium for Performance-Based Teacher Education (PBTE) newsletter discusses (1) the evolutionary approach adopted by the state of Minnesota toward the implementation of PBTE, which includes discussion of what is known about PBTE, whether Minnesota ought (or wishes) to adopt the program, and state participation in PBTE information exchange; (2) the PBTE program of the College of St. Scholastica (Duluth, Minnesota);

(3) the multicultural emphasis of the competency-based Cycle Seven Teacher Corps Project at Texas Southern University; (4) efforts of the Consortium of Southern Colleges for Teacher Education in developing PBTE programs; (5) the various models of teaching which arise from different orientations toward man and his universe (excerpted from "Models of Teaching," by Joyce and Weil); (6) questions that must be answered in determining the nature of individualization in teacher education programs, in particular PBTE programs; and (7) assumptions underlying teacher education programs and characteristics of implemented programs which tend to fulfill these competencies. A description is given of a parent education program and a student extended-day program in a multiethnic elementary school. Most of the teachers in the adult program are regular teachers at the school; however, some parents are recruited for teaching courses in areas where they are competent--e.g., a Spanish-speaking parent conducting a course in Spanish conversation to teachers in the school. The extended-day program for the children is largely recreational and tailored to fit in with the hours parents are in class. (JD)

This study of the interaction between school and social context is divided into two parts. The first section examined some environmental factors external to the school that directly influence school policies and practices. Citizen participation in school activities and the relationship of the school to the state are two of the topics examined. The second section is a series of activities designed to be used in an instructional setting, which explore the complex relationships among schools and their local, state, or federal sociopolitical environments. This volume is the third in a series examining the nature of the school as an organization. (Author/LH)

This document provides ideas and information for those responsible for preparation of education personnel. It includes papers and other materials expressing several views on organizational problems in schools. The problems that teachers encounter in coping with the social hierarchy within the school are discussed as well as their responsibilities to the organization itself. School systems are examined from a sociological point of view. The nature and status of teaching is explored within the framework of the school as a social system operating in the wider arena of the community. (JD)

Journal Announcement: RIENDV76

This publication is the first volume in a series of training publications. "Perspectives on Organizations," designed to develop among future and practicing teachers an awareness of what organizations are, how organizations affect them, and how they can deal with organizations. The materials in this series were developed when Teacher Corps decided to include the study of organizations in its 1975 Corps Member Training Institute for preservice and inservice teachers. The preface underscores the significant contribution the study of organizations can make to the field of teacher education. Part I, "Teaching and Learning About Organizations," contains an overview, rationale for the study, and instructional objectives. Part II, "Life in Organizations," is an introduction to organization theory and basic related concepts. Divided into two sections, it deals with the questions, "Why study organization?" and "What are organizations like?" The subject of Part III, "Organizations in Action," tells how the instructors and learners might go about exploring organizational concepts. Activities in Part III can be used to enrich the examination of key concepts and to draw on the experience of participants as a critical element of learning. An appendix includes abstracts of selected readings and a suggested film list along with a bibliography. (SK)

This publication, part of the Professional Development series, focuses on teacher development programs. An overview of present programs indicates the need for educational innovations, a continuous link between preservice and inservice programs, a renewed concern for performance skills, and field experiences that reflect the reality of teaching. Ways that state agencies can help to develop programs that reflect these needs without trespassing on local autonomy are discussed. The components of an effective inservice program (administrative priorities, organizational designs, and grouping options) are discussed in detail. (CJ)

Journal Announcement: RIEDCT71

This collection of 10 position papers represents one phase of an effort to design behavioral objectives for training programs for Teacher Corps team leaders. Floyd T. Waterman identifies tasks and needed competencies for the complete range of team leader activities. Richard W. Saxe notes the several meanings of systems approach as they apply to the various aspects of designing a training program. Charles C. Jung describes three kinds of problem-solving processes and identifies the prerequisites for using change processes. Jack Spiess reviews the different approaches to leadership, and suggests the applicability of concepts of leadership to the specific situation of Teacher Corps team leaders. Robert Chin and Herschel N. Hadley consider that the teaching team has two objectives: to accomplish its assigned task and to maintain itself as a group. Jerry J. Bellon deals with the task of the team leader functioning as a professional manager to develop and maintain a work environment which facilitates the attainment of organizational objectives. Wilford A. Weber defines some concepts of competency based teacher education and suggests appropriate roles for team leaders. Kenneth R. Howey maintains that there is a logical and necessary relationship between the roles of the team leader as a teacher of teachers and a teacher of pupils. Russell C. Doll suggests the type of training needed for the team leader. Louis J. Rubin defends the position that the teacher is the curriculum. (MBM)

Journal Announcement: RIEJUN72

The project was initiated in fall 1968 to conduct a pilot program to prepare returning veterans for careers in education. Eight large city school systems and eight institutions of higher learning took part. Specific objectives were 1) to launch an educational career development program for veterans to be employed in urban schools; 2) to utilize their experience and talents and provide model for ghetto youth; 3) to attract more males into urban education; 4) to expand the successful model of the Teacher Corps into the paraprofessional field; 5) to encourage differentiated staffing in urban schools; 6) to encourage developmental

programs utilizing federal, state, and local resources; and 7) to utilize in school assignments the occupational specialties developed by the veterans through military training. Participants attended local colleges on a part-time basis and were also employed by the cooperating school districts as assistants or aides to teachers and other school personnel. Program attrition rates were low, the main reasons given for leaving being financial need, family or home problems, and personal change of goals. The success of the pilot program was evident in its holding power and in the number of completions. It also tested and accomplished two additional objectives: the effecting of multi-agency cooperation and successful application of multiple funding efforts. (MBM)

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEJUN75

The Pittsburgh Middle School Teacher Corps Project (PMSTCP) is a competency-based, field oriented master's program developed and implemented jointly by the Pittsburgh Board of Education and the University of Pittsburgh. The PMSTCP has developed a model which focuses on competencies needed to train teachers to work with urban middle school students using a diagnostic/prescriptive approach to individualized instruction. The program encompasses both the use of modules as instructional vehicles and the design of a comprehensive delivery system which delineates program structure and provides for flexibility within the structure as needed. The delivery system includes the field based, community oriented setting, on-site instruction, a clinical/resource supervisory support system, and a mechanism for continual evaluation. Efforts are being directed to examine closely the relationships between learning theory and classroom practice, between societal sensitivity and individual values, and between the roles of the teacher in the teaching/learning setting and the learning behaviors of students. Formative evaluation of the program is being conducted on a continual basis. The most important question is, What type of teacher training program will make the most difference for learners? Journal Announcement: RIEAUG78

This volume, from a set of documents on planning for inservice teacher education, provides an overview of the process and a set of tasks in program planning. The primary function of the tasks is to assist staff in the articulation of fundamental principles and guidelines for site-specific inservice programs. The initial step is the establishment of a planning committee, charged with the task of determining the present state of inservice education in the target school. Its major activity is to conduct a series of workshops for target teachers to give them a sense of participation and to elicit ideas on what the inservice program should be like. From this input, and from the agendas, mandates, and constraints of participating agencies, the committee can then propose principles and guidelines for an inservice plan. A fourteen-step process for plan development is presented. Appendices present eight tasks to be completed in the workshop, a bibliography of literature on inservice education, and transparency masters and script for a slide show presentation. (MJB)

parent and community participation in schools. The goals of the conference were to provide descriptions of proven parent/community participation models, consider the decisions teachers must make and the institutional arrangements needed when implementing such models, and delineate the significant research questions concerning further refinement of existing models. Participants whose presentations are included in this volume looked at the characteristics of current models of parent/community involvement in teaching and learning, the settings in which models have been implemented, constraints to be considered by users, future of the models, and the interface of the school-oriented dimensions of the model with other community efforts. Overviews are offered of the Home Education Learning Program (HELP), Home School Institute (HSI), Parent Education Follow Through Program, Parents Are Teachers Too Program, Parent Education Program, and the Preparing Educators for Parent/Community Involvement Workshops (Author/JM)

Journal Announcement: RIEJUL76

The central purpose of this project was to provide an information base that the Law Enforcement Assistance Administration (LEAA) can use in planning programs to help school personnel cope more effectively with the problem of violence in their schools. The efforts to provide an information base were organized into four tasks: to determine the nature and extent of the problem of school violence, to determine what efforts are being undertaken in schools to reduce school violence, to determine what kinds of help schools need, and to determine how other federal programs help schools solve specific problems. The federal programs examined are Right to Read, Drug Abuse Education program, the Civil Rights Training and Technical Assistance program, the Dropout Prevention program under the Elementary and Secondary Education Act (ESEA) Title VIII, Teacher Corps, and ESEA Title III. The recommended program emphasizes the provision of technical assistance to local agencies by regional staffs of experts. The program would be given overall direction and support at the national level. An extensive bibliography is included in the appendices. (Author/IRT)

pilot studies developed by the Teacher Corps. The major activities described are group problem solving, establishment of guidelines for development of an inservice program, and development of a comprehensive plan for program implementation. An exemplary governance structure for an inservice program is outlined, and constraints imposed by agencies involved in the planning process of such programs are discussed. Sample forms which may be used to conduct a needs assessment study and an individualized program are included, as a well as working example of a management plan for an inservice teacher education program. Document Type: PROJECT DESCRIPTION (141); RESEARCH REPORT (143)

Geographic Source: U.S.; Illinois

Journal Announcement: RIEAPR81

Federal policies and local practices pertaining to inservice teacher education were analyzed from four perspectives. A content analysis was made of current inservice literature. The relationship between assumptions about effective inservice education in the literature and in federal government statements was analyzed. A team of researchers compared six Teacher Corps programs in their contexts and demonstrated how uniqueness emerges among programs based on the same federal rules and regulations. An analysis was made of the content of articles written by central staff in Teacher Corps programs to ascertain the importance of certain factors in the transition from policy statements to inservice practice. The relationship between Teacher Corps policy statements and resulting inservice programs was examined. The findings suggest that: (1) There are specific assumptions about effective inservice teacher education, some of which are reflected both in the literature and in federal policy statements; (2) Federal programs based on the same rules and regulations are similar in terms of certain basic processes and different in terms of context-related variables such as content, strategies, and unanticipated critical events; and (3) There is a need for more systematic forecasting related to inservice teacher education because there are discrepancies among literature, federal policies, and local practice. Journal Announcement: RIE MAY81

With the passage of the Schools of Education Assistance Act as part of the reauthorized Higher Education Act, institutions of teacher education have a long awaited federal mandate for their own redesign and redirection. This legislation provides a principle: that schools, colleges, and departments of education represent a valuable resource for the preparation of educational personnel--not only for the public schools, but also for social services in general. The papers presented in this volume offer a framework for future policies regarding the education of educators, and are organized into four topics: policy development, traditional roles and strengths, emerging needs, and collaborative models. The papers specifically discuss: (1) the need for policy development; (2) the implications of the demographics of teacher education on policy making; (3) the research and dissemination capacity of schools of education; (4) preparing educators for nonschool settings; (5) challenges for schools of education in the 1980's; (6) the educational needs of business and industry; (7) urban education; (8) federal involvement in educational personnel development; (9) intercollegiate collaboration; (10) collaboration between schools of education and other agencies; and (11) perspectives on policy development for teacher education. This document discusses the theory and philosophy of the Portal School strategy. According to the author, that strategy is a process for making an environment responsive to change; a way of providing a setting in which site, specific and locally determined programs, and theories can be adapted, implemented, and diffused; and a method for closing the credibility gap among representatives of universities, school systems, communities, and professional associations. The author argues that the strategy prescribes the development of improved resources for educating children both at the human (administrators, teachers, university faculty, and paraprofessionals) and material (curriculum) levels in certain schools designated as "Portal." In addition, the report contains material about current activities in the dissemination of information concerning Portal Schools, resource centers and recommendations, a bibliography, and a directory of resource people. (A related document is EA 004 085.) (Author/MLF)

Portal schools, designed to bridge the gap between pre- and in-service education, introduce new curriculums into schools by concentrating the resources of and by encouraging shared responsibilities among universities, public school systems, and communities. As a public school that facilitates change, dependent on each school's needs and resources, it functions as a process for (1) training new personnel and providing a field context for assessing teaching competencies; (2) retraining experienced personnel; (3) adapting researched and

tested new curriculums and new teaching patterns and techniques; (4) providing feedback for modifying and evaluating the preservice phases of teacher education and inservice programs; (5) involving the community and parents on voluntary and on professional levels; and (6) diffusing personnel and resources throughout the public school network. Portal schools operated by the University of Georgia, by the city of Philadelphia, and by Florida State University are described briefly. (Author/MLF)

Journal Announcement: RIEFEB74

The Portal School concept envisions a group of schools established in school systems that work closely with a university and that desire to participate in teacher education. This monograph represents a collection of experiences shared by initial developers of the Portal School strategy -- Florida State University, the University of Georgia, and Temple University -- and Teacher Corps projects in Buffalo, New York; Pueblo, Colorado; and Atlanta, Georgia that have utilized the Portal School strategy. The Portal School strategy brings separate educational institutions together into a working relationship to provide reality-based and field-centered teacher education and improved learning opportunities for children. The strategy has emerged from two different conceptual sources--the competency-based teacher education models projects and the Temple-University-Philadelphia plan. The monograph serves as a final project report and is intended to provide alternative interpretations of how the Portal School strategy can be used to meet local needs. The purpose of this document is to assist the educational community in the development of positive school learning climates through the use of inservice teacher training programs and supportive classroom activities. The five exemplary, short-term seminars designed for school personnel by the Youth Advocacy Loop of the Teacher Corps are described in detail, specifically: (1) the "Administrative University" to help school principals develop individual discipline action plans; (2) the "I-Care" seminar to enhance the counseling skills of teachers; (3) the "Human Interaction Training" program to provide alternatives for dealing with disruptive behavior; (4) the "Alternative Learning Program," an in-school suspension program; and (5) the "Discussion Skills" project to acquaint students with the courtesies required of speakers and listeners. Additionally, an overview of the National Institute of Education's Safe School Study and the report of the California Commission for Reform of Intermediate and Secondary Education and a bibliography on classroom management are provided. Journal Announcement: RIEAUG70

This sequential teacher preparation program is designed to increase the effectiveness of the actual student teaching experience by increasing school-university cooperation and coordination through an organization called the Cooperative Teacher Corps, and by offering a variety of practicum-based experiences prior to student teaching. Governed by a board of directors composed of five elected classroom teachers with the chairman of the department and the coordinator of student teaching as ex-officio board members, the Teacher Corps is open to any teacher interested in the student teaching process, although membership does not assure

his participation as supervisor of student teachers. In addition to holding regular inservice conferences, the Corps takes an active role in developing and implementing the variety of practicum-based experiences which begin in the teacher candidate's sophomore year and culminate in student teaching. While enrolled in introductory educational courses, sophomores begin classroom laboratory experiences that range from observation to participation as aides. Following the sophomore year, students enroll in methods courses in which they work directly with teachers and children in designing and conducting teaching-learning situations. Preliminary evaluations of the program indicate increased student enthusiasm and confidence as a result of their experiences, better communication between school and university personnel, and improved feedback and supervisory practices. Journal Announcement: RIEDEC81

Continuous recent Teacher Corps involvement with community-based education has led to a conceptual framework for implementing programs. This framework results in better delivery of services to the community through grass roots community development and the use of school facilities for providing programs. The major role of the community coordinator is to make community residents aware of their needs and to stimulate and coordinate the existing community resources. The coordinator should develop a strong and effective process model and establish school-community and interagency councils. As they develop confidence and experience, these councils gradually become responsible for maintaining an effective community education program. The school-community council can use task forces, a site coordinator, interns, aides, volunteers, institutions of higher learning, state agencies, and the business community to promote program development. A sequential system consisting of needs assessment, goal setting, establishing objectives, designing the program, and monitoring, assessing, and evaluating should be followed. Examples of successful community education activities carried out in Far West Network projects include: community education workshops, involvement in community affairs, bilingual and multicultural education, and interagency coordination. This publication contains nine papers that speak to problems related to the design and implementation of inservice education programs. These problems were ones that the authors discovered and faced as they operated their respective Teacher Corps projects. Each paper identifies a problem related to inservice education, presents solutions that were attempted in the projects, and describes the inservice activities related to solving the problem. While these problems, solutions, and activities were set within Teacher Corps projects, they are generic in the sense that virtually all inservice programs face the same kinds of problems. The problems dealt with include cooperation between colleges, school districts, and individual schools; teacher involvement; the formulation of collaborative objectives; community involvement; release-time for teachers; the use of volunteer substitutes to provide release-time; and the relationship between pupil achievement and teacher performance. Journal Announcement: RIENOV76

Activities of the Teacher Corps' "Corps Member Training Institute" (CMTI) were studied to illustrate methods of inquiry which can be adapted to the study of teacher training events to capture some of the reality of these events. For the CMTI, a Study Team was mandated to demonstrate the impact of the Institute (identify, document, judge, and communicate features). The Study Team interpreted this mandate to mean demonstrate the salient features in an evolving, interactive, teacher training event so that the features could be adapted for use in other teacher training situations. By identifying procedures that captured the patterns of interactions, the reality of the event being examined was reflected. The team rejected standard methodologies as not useful because they fail to provide adequate information about the dynamics of the event and because too little useful information is uncovered that could be used in replicating features of the event. They found that a useful collaborative technique for identifying the important characteristics of teacher training events is a combination of a multilevel data gathering approach, a time-series design, field study procedures involving observation, interviews, and photography. The Omaha Teacher Corps Project has developed a comprehensive evaluation plan involving not only concrete data but individual behavior as well. Its evaluation program consists of seven levels of evaluation: inputs, activities, participation, reaction, learning, practice change, and end result. (Six exhibits illustrate the logistical matters concerned with data collection and documentation of each level.) One component of the evaluation process is the Concerns-Based Adoption Model (CBAM), a model that uses the individual as its frame of reference. It views the change process within formal organizations as entailing the individual's moving through several identifiable Stages of Concern about the Innovation and eight Levels of Use of the Innovation. Levels of Use are assessed using a validated, focused-interview process. A 35-item questionnaire and an open-ended concerns statement have been developed to measure Stages of Concern. This concerns-based approach is a diagnostic-prescriptive one that takes place within the context of the school/college where the change is occurring. The Stages of Concern questionnaire can be used to evaluate learning; the Levels of Use of the Innovation can be used to determine extent of adoption of the innovation. (Instruments are appended.) As an aid to local project staffs and constituent groups, the Teacher Corps' four Recruitment and Community Technical Resource (RCTR) Centers compiled these guidelines and resource materials for the recruitment, selection, and support of project interns. The manual's first section discusses inclusion of intern recruitment and selection in local projects' overall planning, and also gives the text of federal regulations governing Corps interns. The following three sections describe the technical assistance in recruitment, selection, and support available to local projects from the RCTR Centers, including such aids as national recruitment, local publicity advice, identification of applicants with special credentials, and help with interns' state certification. They also present guidelines for local recruitment and selection procedures, involving use of the mass media, special materials, timelines, interviewing, recruitment and selection committees, and other activities. The final section, plus three additional appendices, provide sample recruitment and selection materials from local projects and the RCTR Centers. (Author/RW)

objective of the project is to train/retrain urban teachers, interns, and paraprofessionals to more effectively meet the individual needs of multiethnic pupils and parents of low income families. An important component of the program is parental involvement and adult education courses provided by the participating school and university personnel. (JP)

Journal Announcement: RIEFEB82

A cooperative effort by the Teacher Corps, the University of West Florida, the Okaloosa School District Teacher Center and community members resulted in a graduate program for 34 elementary and secondary teachers at a rural school. This program was created after a self-study of a local school and the surrounding community indicated that school community cooperation, student motivation, student performance, and discipline policies could be improved. The two-year academic program was designed to provide experiences and activities through three major avenues: (1) core courses in such areas as multicultural education and classroom management; (2) seminars or independent study geared to individual needs; and (3) action research projects conducted around an individual's chosen area of specialization. The core courses were completed during the first year, after which participants identified specific areas of community, school, classroom, and personal needs to be studied. University advisors provided group instruction and assistance in action research skills. A research seminar was held during the first year to refine the participants' organization and strategy skills through group discussion. Forty completed projects were presented by the researchers at a colloquium, an event that will occur annually in an effort to motivate and institutionalize classroom research. (FG)

Geographic Source: U.S.; New York

Journal Announcement: RIEAPR81

Six papers on the current and future state of inservice teacher education are presented in this monograph. In the first paper, a futuristic approach to what will comprise an educated person in the years to come envisions holistic education with an emphasis upon service to humankind and realization of world peace. An examination of the fundamental needs of teachers in the second paper indicates that teachers need inservice programs that will provide an awakening interest in learning for its own sake; and encouragement for individual creativity. The third paper points out that the quality of the learning climate stems basically from the teacher's educational values. The fourth and fifth papers provide thoughts on positive images for schools of education. The final paper offers considerations on the continuous learning aspect of inservice education and the importance of federal commitment to staff development. (JD)

developmental theory of learning stages. Dr. C. Backman considers three topics: the view of intelligence as a gradually accumulated fund of skills interacting with social experience, the effects of social climate on student performance, and the idea of the classroom as a work group with group as well as individual goals. Dr. D. Lindsley advocates the role of teacher adviser for school psychologists and discusses how the role becomes feasible through behavioral management procedures incorporating charts and curriculum rewards. Current brain behavior research is related to educational problems by Dr. K. Pribram who also advances the idea of teaching subject matter as languages, or systems of codes, by which internal communication is facilitated. Dr. D. Blocher emphasizes the importance of the affective dimension in education. Dr. S. Sarason notes problems in teacher preparation caused by the lack of a productive theory of the change process. (GW)

Journal Announcement: RIEAUG81

Financing of higher education in New York and the public policies which impinge on, influence, and are reflected in the process are explored in this preliminary probe. Chapters include: The Need for the Study (N. J. King); Implications of Tax Policy (Mark Segal); Institutional Tax Exemptions and Tax Benefits (Steven A. Cohen); State Institutional Assistance (Philip Hanfling); Conditional Institutional Funding (Philip M. Iovino); Student Assistance: The Basic Education Opportunity Grant (Alphonse Mekalainas); Student Assistance: Teacher Corps; Upward Bound; TAP; Fellowships (Donald Ferranti); Student Assistance--NDEA and Other Loans: Regents Scholarships (Carol Bernard); Planning, Cooperation, and Resource Allocation (Felix Lettieri); Regulation Compliance Costs Cooperative Savings (Eugene DeClue); Indirect Institutional Funding: The G.I. Bill (Roger R. Ehrler); Institutional Regulation Under Public Policy, with Financial Consequences: Accreditation (Richard Nelson); and Institutional Regulation Under Public Policy, with Financial Consequences: Collective Bargaining in Higher Education (Richard Nelson). Several omissions are noted in the study, namely: (1) the impact of student consumerism, (2) the role played by "auxiliary enterprises," (3) unionization, (4) direct funding, and (5) certain imputed influences, not amenable to traditional research analysis. References and bibliographies are provided for each section. (LC)

The materials listed in this bibliography are intended as a resource for teachers and other persons concerned with improving the educational opportunities of Puerto Rican pupils on the mainland as well as those on the island. The listing has breadth and variety, but is not exhaustive. Materials included for each category, moreover, are not only about but

also for Puerto Rican students. The first category, "Books," lists those in English and those in Spanish separately, and has a section on children's literature. The second category, "Audiovisual Materials," lists films, filmstrips, recordings, and "others." The next two categories are "Self-Contained Research Studies" and "Periodical Articles," respectively. The last category lists bibliographies for and about Puerto Rican students. (RJ)

Nine of the 11 elementary schools had supportive programs funded under Title I of the 1965 Elementary Secondary Education. Title I programs typically entailed the employment of additional teachers and paraprofessional school personnel. One school participated in the Education Professions Development Act project, a cooperative effort between the Atlanta Public School System and Atlanta University. One school employed two college students to work with teachers of the second and third grades to provide reading activities for educationally deprived pupils; this was funded as a part of Project Concern. Ten schools participated in the Comprehensive Instructional Program, a locally funded program focusing on the area of reading in grades one through three and on math in grades four through six. Two schools participated in the Emergency School Assistance Program, which focused on the improvement of educational opportunities in mathematics in the lower one-third in achievement and in improving community relationship. One school participated in the Instructional Assistance Program. Seven schools participated in the Career Opportunities Program, a training program for selected paraprofessionals. Six schools participated in the Model Cities Educational Component. One school participated in the Teacher Corps program. (JM)

Part one of this two-part report focuses on the supplementary programs, partially funded under Titles I and IV of the 1965 Elementary Secondary Education Act, at Mary McLeod Bethune Elementary School. The faculty at Bethune chose to focus on the primary clusters--kindergarten, first, second, and third grades--for evaluation. Special emphasis was placed on instructional methods. The purpose of supplementary programs are to enhance and expand existing school services; to provide a vital link between school, parent, and community; and to help achieve the stated goals and objectives of the school. Bethune had four special programs: Title I, Title IV-A, Teacher Corps, and the Comprehensive Instructional Program. Part two of this report focuses on the supplementary programs, partially funded under Title I of the 1965 Elementary Secondary Education Act, at Thomasville Heights Elementary School. Four projects were utilized as resources in support of the instructional program: Comprehensive Instructional Program; E.S.E.A., Title I; Career Opportunities Program; and Instructional Assistance Program. Each of these projects contributed services designed to meet certain needs of the pupil population. At both schools, variables measured during the evaluation process included pupils' self-concept, academic achievement in reading, and openness of organizational climate. (Author/JM)

Journal Announcement: RIEPCT81

In seeking to provide Teacher Corps personnel with resource materials that can be utilized in establishing school volunteer programs, this booklet offers a brief history of volunteerism in American schools, reasons for establishing volunteer programs, and information about where and how to recruit volunteers. Volunteerism was an early tradition in the American educational system, but has declined as schools have become more institutionalized and subject to the control of professional educators. As retrenchment becomes a byword in school finance, volunteers can help to compensate for inequality of educational opportunities resulting from inadequate resources and to provide services to children with unique and special needs. Successful recruitment of volunteers depends on the clear communication of the positive impact such a program can have on student learning. Recruitment strategies must consider changing social conditions, such as the growing number of working mothers. If a volunteer program is presented as an opportunity to gain skills and experience, or to obtain or upgrade a job, participation will be more widespread. (Author/WO)

 DESCRIPTION (141)

Geographic Source: U.S.; Georgia

Journal Announcement: RIENDV81

To strengthen community involvement through leadership development, the Teacher Corps' four regional Recruitment and Community Technical Resource (RCTR) Centers in 1979 each presented a "Community Based Education Training Conference" for their local project staffs and community council leaders and members. This report summarizes conference planning, structure, and results in order to share findings and information with Corps project participants and to help them design local training sessions. The first of five chapters gives an overview of conference design and documentation and of the RCTR Centers' technical assistance roles. Chapter 2 describes the national and regional planning process that generated the sessions common to all four conferences as well as those unique to each conference. Both the common and unique sessions are examined in detail in chapter 3, along with data on conference participants. Chapter 4 analyzes eight aspects of each conference's "culture" and the shared beliefs and behaviors that were developed as a result. Chapter 5 assesses both successful and unsuccessful aspects of the conferences and suggests improvements. (Author/RW)

Document Type: BIBLIOGRAPHY (131)

Journal Announcement: RIEFEB78

The guide will help elementary and secondary school teachers to identify resources for multicultural education in the San Francisco Bay Area. Over 250 entries are included about American Indians, Mexican Americans, Chinese and Japanese

Americans, Greek Americans, Jews, and Afro Americans, the groups most thoroughly represented. Almost every entry includes a paragraph-length description of its educational value, specific ethnic group focus, grade level applicability, and unique features. Among the 18 places to go are tours, museums, and cultural centers providing artifacts, publications, exhibits, and food. Publishers whose materials stress ethnic identity and whose publications are bilingual are included in the next section, as well as books, bibliographies, readers, journals, calendars of local events, and bookstores. Over 30 newspapers, radio and television stations are described in the media section. Among the 73 educational facilities are college-sponsored ethnic studies groups and curriculum programs. Over 100 organizations and resource people include chambers of commerce and teachers of ethnic dances. An appendix explains what teachers should look for in evaluating multicultural education materials. (AV)

The teacher interns participating in the Pittsburgh Teacher Corps Pre-Service Program are divided into groups for training. This questionnaire was designed to elicit responses from their trainers regarding group atmosphere, relationships, interactions, activities, and progress during each separate session attended by each group. Trainers also indicate any changes noted in the group, and the direction of such changes (from Hostility to Friendliness, for example) during a session. After each question, the trainer is asked to comment on his perception of the factors causing the change (or the lack of change). (CK)

This instructional module is designed for Teacher Corps interns who need to know how to effectively teach reading development skills to inner-city elementary school children. The first part of the document is a brief overview of reading in the elementary school and includes a flow-chart and the rationale and objectives of the Teacher Corps Program. The following four fields of a total reading program are described: basic developmental reading, reading in the content fields, recreational reading, and remedial reading. The second part of the document is a module for skill development in reading. The third part of the document is a module for diagnosis of reading abilities. The final section of the document covers miscellaneous topics and skills, such as spelling, writing, choric speaking, questioning, psychological foundations of reading, and readability. (TS)

Transcripts of hearings before the House Subcommittee on Postsecondary Education concerning the reauthorization of Title V of the Higher Education Act, the Teacher Corps and Teacher Training Programs, are presented. The Teacher Corps program is intended to act as a supplement to Title I of the Elementary and Secondary Education Act by broadening teacher preparation programs through cooperative arrangements with local school districts, colleges, and universities. It also involves programs to assist local school districts and institutions of higher education in operating teacher centers designed to improve school curricula and the inservice development of teachers. The hearings, held in the State of Michigan, focus on Teacher Corps and Teacher Center programs in that state. Testimony is presented from representatives of Michigan colleges and universities, school districts, and state programs, as well as by representatives of national programs and the federal government. EDRS Price - MF01/PC03 Plus Postage.

Language: ENGLISH

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIESEP77

An alternative evaluation procedure is critiqued that utilizes both a time-series design and a time-series data analytic procedure. The bases for this critique are the authors' experiences and reflections upon their involvement in a recently completed evaluation project that used a time-series approach. The study was a sixteen month evaluation of a one month training event and its impact on teacher

trainees during the following school year. The study was sponsored by Teacher Corps, Washington. The one month training session was the Teacher Corps Member Training Institute (CMTI) held in July, 1975. The critique of the time-series design and the supporting data analytic procedure focuses upon their application to program evaluation. Three questions are posed and answered in this critique: (1) What is time-series description and time-series analysis? (2) What can time-series design and analysis tell the evaluator? (i.e., Are there certain kinds of evaluation questions that are especially applicable to a time-series design and analysis?), and (3) How can one make time-series design and time-series analysis work in an evaluative setting? (i.e., some practical considerations and limitations when applying the time-series examples are used from the CMTI evaluation study. Time-series is suggested to be an alternative evaluation design and data analytic procedure that can be especially applicable to evaluators who wish to illuminate the process and the impact of an educational program as well as measure its effect in terms of intended outcomes. Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEFEB75

This paper discusses aspects of competency-based teacher education in order to provide useful information for developers. Some essential elements of a competency-based program are described, and three approaches for bringing about programmatic and organizational changes necessary for competency-based program development are defined. Advantages and disadvantages are listed for each of these approaches. Problems that reflect a variety of strategies employed in programs at the State University College in Buffalo, New York are identified and discussed: (a) the identification and verification of competencies, (b) the development of a delivery system, (c) the initial involvement of faculty, (d) the degree of field-centeredness, (e) the dilemma of assessment and record keeping, and (f) scheduling for individualized and self-pacing instruction. A five-item bibliography is included, and "Handbook for the Development of Instructional Modules in Competency-Based Teacher Education Program" is appended. (PD)

Journal Announcement: RIEAUG80

The impact of Teacher Corps inservice training on classroom management and instruction is outlined. Various indexes and measures of presage and process variables are described and their probable influence on student achievement in reading and mathematics is specified in a series of hypotheses. The relationships of presage variables to process variables were examined by zero-order correlations. The possible generalization of training to the natural teaching styles of the teachers was tested with a correlated t-test. The influence of teaching models and classroom management procedures, as taught in the Teacher Corps inservice training activities, on the achievement of pupils was examined by multiple regression analysis. Results of the study are presented in both narrative and tabular form and the instruments used in the research are appended. (Author/JD)

Language: ENGLISH

Journal Announcement: RIEJUN74.

The Fifth Cycle Teacher Corps Project was undertaken by the University of Illinois at Chicago Circle to a) fulfill a stated mission of a university especially created to help resolve urban problems, b) find effective ways to help an inner-city community utilize its own resources, and c) conduct research on the effective uses of evaluation in education reform projects. The project was set in the Pilsen, Heart of Chicago, and South Lawndale communities in the center of Chicago. This area contains the central cluster of the second largest urban group of Mexican-Americans in the United States. Many school-aged children speak little or no English. The schools, however, are still staffed mostly by "Anglo" personnel who do not speak Spanish and who know very little about the Mexican culture. By Board of Education edict, the public schools were off-limits to parents until 1968. Even after the schools were "opened," community residents continued to feel unwelcome on school premises and insecure in school affairs. This document recounts the efforts to develop a bilingual, bicultural urban teacher education program in which the community played an active role. It deals with the origin of the project, operational problems encountered, solutions attempted, and the critical functions of systematic evaluation. Also included are statements of conclusion by the development coordinator. (A related document is SP 007 730.) (Author/DDD)

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEJUL77

This is the final in a series of evaluative documentations on the 1976 Teacher Corps Conference. It is based on an extensive review of the information submitted on pre- and post-conference assessment forms, on individual session forms, on project team forms, and on extensive and numerous written comments. The focus of the critique was to analyze the utility of the conference for project teams in learning about (a) Teacher Corps, (b) expectations about roles, (c) improved or additional content for projects, (d) products that could be used only by the project, and (e) procedures that should be

used by individuals and projects. Ten recommendations summarize the findings: (1) The National Conference should last no more than four days; (2) Specific learning and consolidation activities must be provided for all; (3) Projects and individuals should be told that they are expected to arrange their own time to allow for planning, thinking, talking, and reflecting; (4) The National Conference should provide sessions to assist projects in designing follow-up activities that are beyond typical discussion and meeting modes; (5) The parity of the Community in project planning, implementation, curriculum development, evaluation, and documentation needs to be made more visible, even at the risk of decrease in professional content; (6) The Conference should continue to invite controversial and trend-setting presentors; (7) The purposes and design of the conference should be reiterated often; (8) The conference should continue its extensive documentation and evaluation processes; (9) Presentors should be aware of the intent of the conferences; and (10) the conference should exist. Journal Announcement: RIENDV80

Government: State

In recognition of the critical need for bilingual teachers and in the belief that bilingual teachers can be most efficiently recruited and trained in the community college, the Chancellor's Office of the California Community Colleges has developed several recommendations for a career ladder transfer program in bilingual education. The first of these recommendations calls for merging the two State-supported bilingual training programs--the Bilingual Teacher Corps and the Bilingual Crosscultural Teacher Development Grant Program--to form a single Bilingual Teacher Grant (BTG) Program. The community colleges were selected as the most appropriate institutions to implement the program because of their accessibility to potential bilingual teachers, closeness to the local community, and experience in working effectively with local districts and community leaders. The Chancellor's Office recommends that in selecting recipients for the Bilingual Teacher Grants, factors such as bilinguality, teacher aide and community experience, and financial need be taken into account. Additional recommendations relate to: (1) strong central program direction housed in the Office of the Chancellor; (2) the expansion of current efforts in recruiting and training until the need for bilingual teachers is met; and (3) not using Extended Opportunity Programs and Services funds. Teacher Corps experience in meeting Corps objectives in rural sites provides a rich source of information about rural

education. Collaboration exists between university faculty and rural school staff despite distances involved and sharp increases in transportation costs, but development of on-site facilitators is critical to making collaboration work. College scholarships and low-interest loans offered to young local people who agree to return as teachers in local schools can alleviate the problem of attracting and keeping quality staff. Weekly conference call sessions and use of videotape are possible solutions to problems which distance creates for the delivery of supportive inservice training. Utilization of on-site facilitators, combined with an orientation toward more individualized and staff-based inservice, can greatly improve a small district's staff development efforts. A consistent finding, relevant to the improved school climate objective, is that morale of staff, students, and community residents is generally high in rural areas. Progress has been mixed with regard to Teacher Corps objectives focusing on multicultural education and needs of exceptional students. Establishment of an office or center for rural education seems essential to meeting objectives of institutionalization, demonstration, and dissemination. A land grant university would be an ideal location for this. (CM)

Geographic Source: U.S.; Nebraska

Journal Announcement: RIEJUL80

A shift in the priorities set down in the Teacher Corps' rules increases the amount of time and attention paid to local projects rather than to large programs. Three Teacher Corps task forces convened to study the implications of the new rules and the realities of local project operation. The reports of the task forces are contained in this document. The groups' discussions and recommendations concerning the areas of program/project demonstration, program evaluation and evaluation methods, and technical resource use and availability are presented. An introductory chapter examines the interactive elements in all three subject areas, and presents general recommendations concerning the organizational structures supported in the work of the three task forces. The text also suggests the need for further analysis prior to implementing additional Teacher Corps programs. (Author/LH)

Journal Announcement: RIENDV75

This is a collection of papers presented at a 1974 conference on research and evaluation in operational competency-based teacher education (CBTE) programs. Two conceptual models for research and evaluation of CBTE activities were presented at the conference and the presentations of these models are the first two chapters of this collection: "A Comprehensive Medley-Soar Toledo Model for Research in Teacher Education" and "The Oregon College of Education--Teaching Research Division Paradigm for Research on Teacher Preparation." Four papers on support systems which must be involved in research and evaluation in CBTE follow: "A Computer Management System for Performance Based Curriculum (Comspec);" "Field-Based Support Systems for Research and Evaluation;" "From Rock Through Melon to Mush: The Place of the Teaching Center in Research and Evaluation;" and "Support Systems to In-Service CBTE Personnel, On Campus and Off Campus." The next paper is a discussion of the comprehensive research and evaluation model developed at the University of Toledo which is being used to evaluate the university CBTE program at both elementary and secondary teacher education levels. The final paper is a "Proposal for a Consortium of States to Develop a National Program to Improve Teaching Effectiveness." (Author/JA)

Journal Announcement: RIEAUG78

The sharply drawn distinction between research and evaluation, and the equally sharp distinction between the carefully controlled laboratory-type experiment and the study

occurring in the field, are seen as arbitrary and not very helpful. In illustrating this thesis, the author develops a design generally regarded as a "research" design and shows the evaluative purposes for which the design may be used. A Teacher Corps/Trenton (New Jersey) State College/Trenton Public School inservice program for the improvement of reading instruction skills was chosen as the subject of the study. Observational data on teacher change due to training, effectiveness of varying training programs, and the relationship between change/level of teacher skills and pupil gains in reading are presented. The data, essentially of an evaluative nature, is extensively interpreted to illustrate the contention that researchers are also learning about the nature of teaching and the structure of teaching performances. The evaluative data also yield information on the relationship between kinds of teacher performances and pupil learning. Through this interpretation, the author illustrates that by carefully designing a study, one can achieve two goals: first, one can develop an understanding about teaching performances related to pupil learning; and two, the effectiveness of ideas about what constitutes the appropriate substance of training and whether or not the chosen methods are effective can be evaluated. This booklet is the final volume in a series of eight that describe the Tenth-Cycle Teacher Corps Program of the Lincoln, Nebraska, Public School System and the University of Nebraska-Lincoln, and reports research data documenting the achievement of the Program's three goals. The first goal was to improve the delivery of educational opportunities and services to project learners by using diagnostic-prescriptive teaching approaches to individualize/personalize instruction. Goal two mandated the development, implementation, evaluation, and refinement of a comprehensive model for competency based teacher education. Goal three was to involve school, university, and community in active collaboration aimed at program development. Charts, tables, and attitude survey results are presented to document the assertion that all three goals were met with a high degree of success. (MJB)

Research adaptation is an endeavor that implies solid collaboration among school practitioners and university and college researchers. This volume addresses the broad issues of research as an educational endeavor, adaptation as a necessary function associated with applying research findings to school situations, and change as an inevitable phenomenon as well as a positive consequence of research adaptation, and practical application. Articles develop the concepts inherent in the collaborative effort and provide some practical insights based on experience in efforts to merge research adaptation and educational change. Sections concerning the credibility and collaboration of research, adaptation and educational change, concepts and ideology of change, and planning and assisting change include articles on: (1) the quest for scientific and practical credibility of educational research; (2) collaborative action research; (3) the social and political context in which some research projects operate; (4) research adaptation as a change process; (5) the aura of change; (6) analyses of change ideologies; (7) change models as a framework for project evaluation; and (8) technical assistance. This collection of nine essays and reports which deal with issues of importance in the progression of Native American education was published by members of the Dine Teacher Corps Project '78 in an effort to stimulate the thinking of

curriculum practitioners; content is aimed at affecting administrative styles and the construction and implementation of curriculum. An introduction relates a brief history of Indian Education and reports that the most fundamental need presently is for a change in point of view. Chapters one and two are devoted to the administrative leadership styles necessary for programming; the third and fourth discuss the administrator's role in the development of instructional programs; the fifth and sixth use specific bilingual programming to show the relationship a curriculum must have to particular Indian values, experiences, and needs; and the seventh, eighth and ninth chapters report studies on inservice, financial planning, and leadership programs which are designed to assist the administrator to successfully facilitate effective changes in Native American education. This report is the result of investigations into the residual or long-term impact of the 1975 Corp Member Training Institute (CMTI) of the Teacher Corps on Institute participants. Singled out for investigation were the trainers, the trainees, and the evaluators of the program. The impact of the CMTI on the Teacher Corps projects and schools where the trained interns were placed is also examined. The methodology of the study of each of these investigations is discussed, and detailed reports of each are given. A working hypothesis based on findings is presented and recommendations to Teacher Corps for future training events are made. (JD)

This guide for inservice teacher education is designed for use by teacher groups in planning inservice. Short substantive narratives are followed by practical exercises to help teachers plans and develop inservice education, find resources, use outside assistance, and understand the potential functions of inservice education. The model presented is essentially an approach to planning, beginning with needs assessment and continuing through delivery of inservice. Emphasis is placed on the special conditions of rural schools and rural teachers, although the materials are generally useful to others. Topics covered include the following: (1) types of teacher inservice education; (2) needs assessment; (3) meeting and workshop format; (4) parent/community awareness of inservice teacher education; (5) release time models; (6) institutions of higher education and local education agency collaboration; (7) funding for inservice education; (8) school board awareness; (9) governance; (10) administrative support; (11) negotiations and inservice; (12) the role of the state department of education; (13) rural teacher centers. A bibliography for further reading follows each of the twelve sections of the manual. (J0)

Journal Announcement: RIEFEB75

Prepared for elementary teachers by teachers of the San Diego City Schools and participants of the San Diego State University Teacher Corps Program, this publication presents basic materials for teaching the Mexican/Chicano culture to

pupils in grades K-6. Its purposes are to: (1) "foster understanding of the culture and (2) engender a positive self-image and pride of cultural background within Mexican/Chicano pupils. The materials are divided into nine sections: (1) Calendar of Cultural Events; (2) Mexican/Chicano Classroom Activities; (3) Mexican/Chicano Arts and Crafts; (4) Mexican Dances; (5) Mexican/Chicano Songs; (6) Mexican/Chicano Proverbs, Poems, Rhymes, Limericks, Tongue Twisters, and Riddles; (7) Mexican/Chicano Games; (8) Mexican Holidays and Celebrations; and (9) Historical and Contemporary Mexican/Chicano Personalities. Much of the material should be utilized as background information by the teacher. The activities may be presented as schoolwide, classroom, small-group, or free-choice projects. Some of the materials are presented in both English and Spanish, some only in Spanish, and some only in English. An index is provided for easy reference. This publication is intended to be used along with the recording "Estudiantina 'El Cid' de Calexico". (N0)

Journal Announcement: RIEJUL79

This document identifies some government agencies and the programs they administer that address minority group needs and is the first section of "Resources in Bilingual Education," a publication designed to address the information needs of the bilingual community. The format is designed to provide easy identification of available funding, contact person, authorizing legislation and regulation or guideline location. The overall agencies that are included are: the National Institute of Education, the U.S. Office of Education, the U.S. Department of the Interior, and the U.S. Department of Labor. A number of programs are described within the bureaus of the agencies. Among the listings are: (1) Civil Rights Technical Assistance and Training, Educationally Deprived Children, and Follow Through Programs under the Bureau of Elementary and Secondary Education; (2) Adult Education and Bilingual Vocational Training under the Bureau of Occupational and Adult Education; (3) Bilingual Education under the Office of Bilingual Education; (4) Indian Education under the Office of Indian Education; (5) Vocational Education under the Office of Research and Planning; and (6) Teacher Corps and Ethnic Heritage Studies Program under the Office of Education. Information on Federal Government publications and other publications are included, and Congressional committees and subcommittees and Congressmen are listed. (SW)

Document Type: BOOK (010)

Journal Announcement: RIESEP75

The purpose of this nine-chapter book is to (a) ferret out ideas and recommendations for revitalizing and reconceptualizing inservice education, and (b) replicate or adapt the Workshop on Reconceptualizing Inservice Education for which the first seven chapters were written. Chapter 1 examines the historical forces which have developed and how characterize inservice education, and examines future prospects. Chapter 2 describes Washington State's experience with process standards adopted in 1971 for the preparation of school professional personnel. Chapters 3-5 discuss concrete experiences with collaboration in Washington State and abstract considerations of inservice education. Chapter 6 questions traditional practices, functions, and terminology regarding certification and inservice education, and considers new roles for teacher organizations in a changing political context. Chapter 7 presents a discussion based on a preworkshop reading of chapters 5 and 6. Chapter 8 reports on the discussions of 87 selected people who read the first seven chapters, examined the purposes and assumptions stated earlier, and developed recommendations for rethinking inservice education. Chapter 9 is one person's reflections on prior chapters, observations from listening to the 87 people as they deliberated, and perceptions of necessary next steps. (Author/PB)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIESEP77

This document is a collection of abstracts of research studies on team teaching in mathematics. The research reviewed for this paper revealed little difference between team teaching and traditional instruction. Some trends suggested by the literature review are summarized according to grade level--elementary, junior high, or post-junior high. The majority of available research dealt with elementary school students. When studies indicated significant differences in pupil achievement, the traditional classroom was favored. In studies that investigated attitudes, teachers were found to prefer team-teaching. In the junior high setting, it was found that traditionally taught pupils performed significantly better than team-taught pupils in one study, and no significant differences were found in other studies. It was discovered that students preferred the traditional classroom. Although evidence also suggested that team-teaching improved the self-concept of some pupils. Only one study involved education beyond the junior high level--in a college algebra course, no significant difference was found between traditional and team teaching. (MM)

The role of team leaders in leadership and management of instruction for children in portal learning centers is discussed. These centers are designed to meet needs and interests of highly mobile, nonconfronting youths unable to accept traditional classroom routine. The current project is working with the development of open environments for learning through learning centers that allow students to begin at their own level, create from their own experiences, learn at their own pace, and allow for immediate success patterns. Program objectives are stated and criteria and characteristics for assessment of the portal learning centers are discussed. Characteristics are listed that define the role of team leaders in relation to interns and other adults. The team leader's role is also discussed in terms of performance and in terms of a plan for institutional change, which includes career opportunities and an instructional program. (PD)

A satellite assisted, interactive teleconference titled "Networking for Interagency Collaboration" was evaluated to determine the effectiveness of the telecommunications mode in contrast to a central site mode. The conference background, goals, and content are described and two specific telecommunications goals are formally presented: 1) to demonstrate the need for and benefit of social service networks to increase the efficiency of service delivery, and 2) to have an impact on networking at the sites participating in the conference. A survey of participants indicated that teleconferencing, as an instructional format, helped them to learn new information and make new contacts, become aware of deficiencies in the current social service system, and take the first organizational steps in establishing formal, interagency networks. Participant views on the shortcomings of the telecommunication mode and observations on the mode's cost

The papers presented in this monograph describe some of the experiences of nine Teacher Corps projects in the planning, implementation, and evaluation of programs to foster community involvement in the schools. Community representation is reflected in groups of individuals which may be called the Community Council, Advisory Committee, or Steering Committee, and these groups form the nucleus for the governance structure of Teacher Corps projects. The councils may be made up of people from business and industry, community agencies, institutions, and parents of school children. These individuals, in collaboration with school officials, Teacher Corps personnel, and persons representing the institution of higher education, make decisions about how the program can best meet the needs of pupils in that particular school-community and what community resources are available to address the varying needs of school-community in solving critical problems. Journal Announcement: RIEJAN71

The introductory section of this report contains a brief narrative description of Oregon State University's Cycle II Teacher Corps program in which 29 intern teachers were prepared to work with disadvantaged children in both rural and urban areas. The 2-year Master's Degree program which is outlined includes two summers of orientation and coursework and two years of inservice internship in which trainees were involved 60 percent of the time with school activities (observation, small group tutoring, and large group instruction) will all age groups in a variety of subject areas) and 40 percent of the time in college courses and community involvement. Other sections of the report describe 1) Teacher Corps innovations in the university teacher training program, 2) institutional changes resulting from the Teacher Corps program, 3) program evaluation, 4) recommendations for future cycles, and 5) reports from each of the cooperating local school districts (Portland, Coos Bay, Hood River, and Lincoln County) describing organization of intern teams and school district, intern role in schools, community involvement, and recommendations. Document Type: CONFERENCE PAPER (150)

Journal Announcement: RIEJAN77

The MINK (Missouri, Iowa, Nebraska, and Kansas) Network Educational Resources Center is a regional, collaborative effort among Teacher Corps Projects and a model of shared governance to improve learning environments and understanding among teacher educators. The governance of this group comes from a Board of Directors comprised of project directors from each of the active Teacher Corps Projects within the four-state area. These project directors are in a position to receive continual input from a variety of sources including colleagues at colleges and universities and practitioners at the project sites. This type of multi-faceted input enables the formulation of policy that reflects the functioning of the entire Network. The objectives of the MINK Network are: (1) to act as an educational resource center for materials developed by MINK Teacher Corps Projects as well as other educational

materials relevant to the thrust of Teacher Corps; (2) to serve as a communication center among constituent projects for mutual sharing of information, product development, and evaluative analysis of educational materials; (3) to assist new projects through developmental stages by recommending resources, techniques, and materials; (4) to assist those associated or affected by Teacher Corps by sharing techniques, problems, and solutions at meetings; and (5) to coordinate liaisons with other resources outside the Network. This sharing of responsibilities and resources among institutions of higher education, local education agencies, and state education departments is reflected by a high degree of collectivity in the policies and purposes of participating Teacher Corps Projects. Document Type: BOOK (010)

Journal Announcement: RIEFEB76

This book contains 17 articles, each by a different author, and addressed to those who wish to become informed about the relationship between multicultural education and competency-based teacher education (CBTE). In order to study the relationship between multicultural education and CBTE, a number of individuals actively engaged in either the study and/or implementation of multicultural education and CBTE were invited to respond to the following two questions: (1) What should be the role of the administrator, teacher, or university faculty member in assuring that competency-based teacher education includes multicultural education in its content?; and (2) From a(n) administrator's, teacher's, or university faculty member's point of view, what problems are you experiencing or do you foresee experiencing in regard to relating the concepts of multicultural education and competency-based teacher education? The first question provided the writers the opportunity to respond to the state of the art concerning the relationship of multicultural education and CBTE--especially at their local sites. The second question provided the writers the opportunity to discuss how they would envision the relationship of multicultural education and CBTE. The articles in this book are the responses to these questions. (RC)

Document Type: PROJECT DESCRIPTION (141); EVALUATIVE REPORT (142)

Geographic Source: U.S.; Maine

Journal Announcement: RIEDEC80

Psychodrama is the acting out of difficult situations one has experienced. It gives the actors and spectators the chance to try out alternative solutions to problem situations. When these problems are acted out, the actors become better acquainted with themselves and their peers. This awareness becomes a dominant determinant of future behavior. This booklet outlines a teacher workshop that focuses on the use of psychodrama in the elementary school classroom. The effects of this technique on the teachers and students are depicted through the interpretation of several sessions. (CJ)

Journal Announcement: CUMREPT

THIS ARTICLE DISCUSSES THE NATIONAL TEACHING CORPS TRAINING PROGRAM IN ARKANSAS; WHICH CONSISTS OF 24 INTERNS AND 9 MASTER TEACHERS, SEVERAL ECONOMISTS, PSYCHOLOGISTS, SOCIOLOGISTS, ELEMENTARY EDUCATION SPECIALISTS, COUNSELING SPECIALISTS, AND AN AUDIOVISUAL EXPERT. FOR 10 WEEKS THE GROUP HELD A SEMINAR ON THE EDUCATION OF THE DISADVANTAGED, CONCENTRATING ON THE EDUCATIONAL, ECONOMIC, SOCIOLOGICAL, AND PSYCHOLOGICAL CHARACTERISTICS AND PROBLEMS OF STUDENTS FROM POOR FAMILIES. IN THE FIELD, TWO TEAM LEADERS OPERATED AS "CIRCUIT RIDERS," SUPERVISING INTERNS IN MORE THAN ONE SCHOOL. THE CORPSMEN WORKED AS COUNSELORS AND TUTORS OF INDIVIDUAL CHILDREN RATHER THAN AS CLASSROOM TEACHERS. THE NEED TO ESTABLISH ONE-TO-ONE RELATIONSHIPS WAS CONSIDERED PARAMOUNT. CORPSMEN NOT PREVIOUSLY ELIGIBLE WERE GRANTED EMERGENCY TEACHING CERTIFICATES. NEW PRACTICES AND IDEALISM WERE BROUGHT BY THE CORPSMEN TO OUTLYING SCHOOL DISTRICTS WHOSE EDUCATIONAL PROBLEMS ARE MANIFOLD. THIS ARTICLE WAS PUBLISHED IN "SOUTHERN EDUCATION REPORT," VOLUME 2, NUMBER 5, DECEMBER 1966. (OK)

Geographic Source: U.S.; Massachusetts

Journal Announcement: RIEMAY80

This sourcebook contains a collection of articles on educational topics and is designed to be used as a resource for inservice teacher programs at the secondary level. The first section is devoted to curriculum theory and contains writings on the theoretical underpinnings and relevant background for practical work with students. Inservice is the subject of the second section and the writers expand on the idea that inservice should be understood as a process whereby teachers come together to pursue personal and professional growth needs as competent individuals. The third section presents programs that teachers have developed to better meet the needs of their students. The fourth section is comprised of teachers' essays about ways in which they have developed innovative classroom practices. (JD)

Document Type: REVIEW LITERATURE (070); NON-CLASSROOM MATERIAL (055)

Geographic Source: U.S.; Pennsylvania

Journal Announcement: RIEFEB81

The text examines issues related to Hispanic children in special education. Chapter 1 discusses four court cases brought against schools for inappropriate placement of Hispanic and other minority students in classes for the educable mentally retarded. Testing is the focus of Chapter 2, which includes analysis of linguistic and cultural bias, factors involved in intelligence testing of Spanish speaking children, and a review of seven tests recommended for diagnosing exceptionalities in this population. Chapter 3 views learning in a dual cultural context; touches on the effects of such cultural factors as dependency, personalism, and humanism; considers the effects of culture on communication; and describes interference factors originating in the majority culture. Related national and state legislation is reviewed in Chapter 4, and Chapter 5 discusses the current status of special education with Hispanics and makes suggestions regarding testing, overall service delivery, inservice training, and teaching competencies. The chapter also provides prescriptions for teaching Spanish speaking children with specific handicaps (emotional disturbance, mental retardation, learning disabilities, and speech and communication handicaps). Document Type: PROJECT DESCRIPTION (141)

Geographic Source: U.S.

Journal Announcement: RIEFEB81

The contents of this volume are directed to designers and managers of staff development programs. It is designed to provide a systemic consideration of all factors involved, including the long-range goals of staff development, the behaviors of the people involved, the interface of existing organizational structures, and the mechanisms for program planning and development. The potential for systemic educational programs is described, models of programs are presented, and implications for teacher education are discussed. The dimensions of educational systems and change are outlined in the first two chapters. Chapters 3 and 4 focus on changing people. The attitudes, aptitudes, perspectives, and values of the professional staff to be trained, the trainers of the staff, and the community as a composite of individuals, are considered as interacting elements in the change process. The fifth and sixth chapters examine inservice education from the communication/organizational perspective. The structures for staff development programs are described in rural and urban settings. The last section considers programs and their development. Emphasis is placed on the importance of needs assessment in developing an inservice program. An approach to planning that has proved effective in a number of workshops is provided. (JD)

Document Type: PROJECT DESCRIPTION (141)

Geographic Source: U.S.; Massachusetts

Journal Announcement: RIEMAR82

Four examples are given of Teacher Corps school-based staff development projects in Massachusetts. An introductory chapter identifies characteristics of successful staff development efforts, based on participatory decision making, the needs of teachers, students, and the community, and cooperation between the university and the school. The first article describes the planning of school-community resource centers in a high school and in two middle schools. Each resource center is "owned" by its creators because of the collaboration between parents and teachers in planning, staffing, and policy making. Another focus was adopted in a Lowell high school, where a Teacher Corps needs assessment pinpointed several problem areas, but found that the teachers did not want to accept responsibility for complex curricular issues. With the approval of the principal, a committee of six department heads was empowered to address not only curricular and instructional improvement, but also teacher evaluation, thereby broadening their leadership role and improving their relations with each other. The third article describes the development and effects of a credit-bearing administrative practicum offered through Boston State College to faculty at three high schools. A case study of the actions taken by teachers participating in the practicum illustrates the positive steps involving parents and students in school events. A concluding commentary points out the distinguishing characteristics of staff development, comparing it to continuing education, professional development, and personal development. It is suggested that, through effective planning and goal orientation, staff development success stories will be common. (FG)

Journal Announcement: RIEMAR80

The described inservice program was designed to bring together teachers to collectively address overall school problems. The project was based upon the belief that school improvements could be best effected by providing teachers the opportunity to actively participate in the design and implementation of changes in school functioning. Emphasis was placed on helping the staff acquire skills in problem solving, goal setting, decision making, planning, information gathering, problem analysis, and resource identification. An example is given of a team of teachers who identified specific problems encountered by regular class teachers in dealing with mainstreamed students. Their recommendations are outlined, and subsequent improvement of the situation is described. (JD)

Journal Announcement: RIEAPR81

The purpose of this study was to use the standards recently developed by the Joint Committee on Standards for Teacher Evaluation as a framework, to review current state-level teacher evaluation policies. The evaluation program must meet four criteria: accuracy, utility, propriety, and feasibility. Questionnaires requesting specific information about teacher evaluation practices were sent to departments of education in all 50 states and the District of Columbia. Twenty-one states sent copies of either state-level legislation or policies. Six states indicated that state-level policies on teacher evaluation existed, but did not enclose copies of the legislation for review. Twenty-three states reported no state-level mandates for teacher evaluation. This paper presents an analysis of how policies in the twenty-one states that responded fully to the questionnaire reflect the identified evaluation criteria. (JD)

This training product was developed for the Teacher Corps and designed for use by the intern to help him or her learn ways of quickly establishing rapport with troubled youth. Specific objectives are: (a) that the intern will be sensitized to the affective nature of the commitment to teaching troubled youth; (b) that the intern will be able to identify and define recidivism, high mobility, confrontation with authority, and self concepts as they relate to the teaching of troubled youth; and (c) that the intern will use behaviors that indicate awareness of the four dimensions of establishing rapport with troubled youth. After a preassessment is completed, the intern carries out enabling activities for each of the objectives. These activities include attendance at lectures and demonstrations, viewing of audiovisual presentations, readings, and sensitivity exercises. A bibliography is included. (HMD)

This document is divided into five parts. In Part 1, the reader is introduced to the discussions that follow by an account of the effect of school crime on school climate, and the response of the Teacher Corps and the Office of Juvenile Justice and Delinquency Prevention in creating a joint program in youth advocacy to improve conditions in the schools. The second part is a discussion of the history and present status of student initiated activities in the joint program. Part 3 is coverage of the Youth Participation Conference on Student Initiated Activities, held at Oakland University in November

of 1977. The topics of the conference included coverage of both youth and adult training. The fourth section presents brief accounts of both regular Job Corps projects (Activity I) and the special youth advocacy program (Activity II). The last section is made up of various responses to and perspectives on the program. (IRT)

EDRS Price - MF01/PC04 Plus Postage.

Language: ENGLISH

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEFEB78

This study investigated students' perceptions of the open-space environment. It focused on their likes and dislikes concerning open space, perceptions of instructional practices and suggestions for improving and utilization of open space in their schools. The study was conducted as part of a Teacher Corps project sponsored jointly by the School of Education at Stanford University and Herbert Hoover Junior High School, San Jose Unified School District, San Jose, California. Besides the type of information collected, this study differs from previous studies in another respect. Open-ended interviews were used rather than forced-choice survey questionnaires which would have limited students in their responses. This method also avoided problems associated with the low academic achievement levels of some of the students in the sample. The relatively free interchange between the interviewer and the respondents permitted the interviewer to discover whether or not each student understood each question. (Author)

The recruitment booklet is the result of team efforts of a committee to develop working materials which may be utilized for an adult education recruitment program in the local school systems. Each team member individually developed recruitment concepts, which were combined to form a guide. The report is divided into five parts: (1) a statement of the problem and rationale; (2) the effective use of recruitment personnel; (3) the recruitment of adults in low-income areas; (4) the effective use of State, Federal, city, and private agencies in the recruitment of adults for adult education programs; and (5) the recruitment of illiterate adults through the use of volunteers, civic organizations, teacher corps, etc. Specific objectives and activities are given for each in order that the reader may select those appropriate to program needs. Appended are sample forms and specific information related to Louisiana parishes. (Author/AJ)

This document is primarily intended as a companion piece to Volume I, which is entitled Description of CMTI. The first volume is, essentially, a description of the 1977 Teacher Corpsmember Training Institute, while the second volume is an analysis of the data contained in the first document. Volume Two is divided into four parts. Chapter One is a description of the data collection instruments and procedures. Chapter Two describes the participants in the institute in terms of personal characteristics and educational attitudes. Chapter Three is concerned with the organization of the CMTI, and Chapter Four focuses on the impact of CMTI on participants'

other professional educational activities. (LH)

Journal Announcement: RIEMAY80

A method of establishing a successful inservice teacher education program is described. This method involves organizational change as well as individual change based on the assumption that teacher growth and school change are interdependent. The following set of constructs for a responsive inservice teacher education program are identified: (1) all inservice efforts should include required work that focuses the teacher's concentration on the classroom; (2) all inservice work should attempt to combine theory and practice; (3) all inservice work should assist the teacher to develop, integrate, or alter the concepts and techniques learning through classroom implementation and practice with the assistance of an instructor; and (4) inservice instructors should tailor concepts and techniques to the particular school organization for successful continuation and incorporation. Journal Announcement: RIEJAN69

The problem of the effective development of educational programs for the educationally disadvantaged is discussed. Salient points for the revitalization of American education are presented, including the major thesis that all American children are educationally disadvantaged. To improve the education of disadvantaged children, the educational process is examined. Major suggestions include parent-teacher participation in curriculum planning, a total educational program encompassing early childhood through college, the development of curricula relevant to the learner's environment, and school oriented diagnostic procedures to determine individual program requirements. Implications for the use of computers in future educational systems are presented. (JM)

A program designed to adapt educational research findings to practical classroom use is described. A variety of options for adapting research through inservice education are described. They include formal university courses after school, released time programs, one to one and small group consultations, independent study, graduate research theses, visitations, professional conferences, team planning meetings, and support for teacher action research and pilot program proposals. Proposals for action research and pilot programs are supported by the project for materials, consultative services, and publication and dissemination. The program is designed to accommodate different styles and paces of teachers. (JD)

Journal Announcement: RIEJAN71

Goals for the 2-year program were 1) to provide immediate assistance to disadvantaged youth at an early age from teacher-interns specially equipped to diagnose their student needs and provide appropriate learning experiences; 2) to provide sufficiently strong preparation for teaching so that interns will achieve enough success to desire to continue teaching disadvantaged youth; 3) to try new approaches leading to progressive development of more effective and efficient teacher education programs. Preservice began with 28 cornmen in laboratory and seminar classes which emphasized exploring the world of the public school classroom. Inservice combined internship in the elementary schools with campus classes, the two running in parallel sequences of subject matter: reading, math, social studies, science, and physical education. More theoretical courses were reserved for summer to give interns a chance to synthesize their learnings. Program effects on the university include three new courses in the curriculum and greater use of interdepartmental team teaching and video tape equipment. The impact on the schools was also strong particularly in areas of teacher knowledge of new methods and materials, and practice of team teaching. Corpsmen participated in diversified and individualized community activity. Evaluation methods included oral exams, National Teacher Exams, and teaching effectiveness ratings. The program was clearly successful. (JS)

Document Type: CONFERENCE PAPER (170)

Journal Announcement: RIEAPR76

This report comes out of the 1974 Teacher Corps Conference, which was held to acquaint Teacher Corps personnel with new ideas to enhance their abilities to train interns to work with children with special needs. The first part of the report is composed of 18 speeches on topics such as: community involvement in education, ethnic diversity, discrimination, performance-based teacher education, handicapped children, and the past and future of Teacher Corps. The next part consists of seven reports based on small, informal skill sessions held to give participants opportunities to learn about competency-based teacher education and diagnostic-prescriptive teaching. The majority of the presentations stress the problems and issues which have contributed to the imperfect functioning of the public schools, and represent a commitment on the part of speakers to try to show how the Teacher Corps can be a tool in improving the public school system through creating effective models of what can be done. The papers selected to provide this resource deal specifically with evaluations of the Teacher Corps as opposed to evaluation of issues and problems generally. The first paper does address concisely the current dialogue in the educational evaluation community, but its role in this publication is secondary to discussion of evaluation activities in the Teacher Corps today. The second paper offers a critique of ten years of evaluation of the Teacher Corps and also address the alternatives available to federal programs. It also discusses choices made by the Office of Education and Teacher Corps among those alternatives. The final paper is a statement of the work accomplished by the Evaluation of Teacher Corps Program 78 and Program 79. (Author/JD)

Language: ENGLISH

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEAPR78

This document describes the East Caroline Islands lying in the Ponape District and the development of a Teacher Corps inservice program to aid public school teachers in professional development. Program objectives were to: (1) upgrade basic and professional skills of Micronesian interns; (2) implement a University Without Walls baccalaureate program in the Trust Territory for Micronesians; (3) demonstrate a model for teacher training which could be implemented in other parts of Micronesia; (4) utilize and support the teacher education programs at the Community College of Micronesia; and (5) develop culturally relevant teacher training curriculum materials. The project also sought to combine three elements into its degree process: academic, inservice, and community. The program dealt with instruction in Generic Teaching Skills, Interactional Analysis, English Improvement, Mathematics Improvement, Social Studies Methods, Lesson Planning, Evaluation, and Community Education. This instruction, in

conjunction with course work at the Community College of Micronesia, previous course work at other colleges, and documentation of previous work and life experiences, comprise the total degree plan of each intern. Upon completion the intern receives a Bachelor of Science Degree with special emphasis on teacher training. (MJB)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIESEP75

This document further analyzes a two-year Teacher Corps study which was conducted by Pacific Training and Technical Assistance Corporation for the U.S. Office of Education. The results of the first and second years of study have been reported elsewhere. This volume presents the results of a further analysis of data collected in the first year of the study dealing with the relationship between intern background characteristics and Teacher Corps program characteristics, and the teaching skills and attitudes of interns at the end of their two years of training. The goals of this study are: (a) to provide information that could serve as a basis for redirecting efforts to recruit interns, selecting new Teacher Corps projects, or providing technical assistance to projects; (b) to provide information that could be used to identify special strengths or weaknesses at any one project site and, consequently, to suggest the need for special recruiting procedures for interns or for technical assistance efforts; (c) to further explore the relationship between teacher background, Teacher Corps program characteristics as related to the teaching skills, and attitudes of interns at the end of their two years of training; and (d) to answer management-oriented questions regarding the development of effective Teacher Corps projects and the assessment of the quality and effectiveness of the projects. (A large section of the document is devoted to tables illustrating the interns' background and Teacher Corps program characteristics.) (JS)

This handbook for team leaders contains five chapters. The first deals with the team leader as liaison between all other persons and institutions connected with a particular program. The second discusses changes required of interns in assuming the role of team leader after having been a teacher. The third chapter describes the team leader's activities and responsibilities as a trainer of teachers. Chapter four deals with intern conferences and visitations, and chapter five outlines evaluative activities of team leaders. Appendixes include advice to a beginning teacher, guidelines for getting acquainted with a community, evaluative devices, team leader schedules, and a selection of interns' views of team leaders. Language: ENGLISH

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEMAY75

Growing from an intense interest in community control of education in the mid-1960s, the National Teacher Corps indicated that its programs must reflect shared decision making at the local level. More specifically, guidelines for programs stipulated that parents, representatives of the local community, state educational personnel, higher education personnel, professional association representatives, teachers, and administrators be involved in collaborative decision making. The suggested vehicle for involvement was identified as the "school-community council." Unfortunately, guidelines were vague with respect to the nature of the involvement at the local level. Time limitations, bureaucratic "red tape," and the composition of the local steering committee to include individuals whose needs are often at odds with each other have compounded the problem. What can be done to make these groups more effective? Collaboration seems to depend a great deal on the clarity with which each of the collaborators understands his or her own goals to program design. In addition, a firm resolution by communities and colleges not to sell their own opportunity to design effective programs for a few dollars will carry a message that real collaboration begins with

people. (JA)

Document Type: PROJECT DESCRIPTION (141)

Geographic Source: U.S.: Washington

Journal Announcement: RIEAPR81

An overview is presented of the objectives of the Far West Teacher Corps Network. A description is given of the development of the network and achievements in the areas of community involvement, inservice teacher education, exceptional child programs, management information systems, and project management and evaluation. Chapters are included on the role of the executive secretary and the network theory from a Teacher Corps perspective. Generalizations are offered for those who are interested in establishing a network. It is suggested that even though network members do not have identical objectives, it is possible for them to help each other if they share a common goal. Network governance as well as program policy and implementation should rest equally among the membership, and decision making should be shared. Flexibility and responsiveness to the changing needs of members' projects characterizes a successful network. (JD)

Document Type: CONFERENCE PROCEEDINGS (D21)

Journal Announcement: RIESEP77

Participants at this four-day meeting of the Teacher Corps Planning Conference discussed the past function of the Corps and possible future courses. The general outline of the agenda was to look into the substantive fields for Teacher Corps focus and the priority needs in teacher education to which the Teacher Corps should address itself. Project design and support were also under consideration. The financing of the Corps and its relations with Congress were described and discussed at length. The consensus of opinion in regard to the position of the Corps within the structure of the government was that the Teacher Corps should perform as a special world somewhere between that of the Office of Education and the National Institute of Education, since much of the original work of the Corps was to carry government-developed educational plans into field development. It was recommended that: (a) some restructuring is required in the training of teachers for the project, in evaluating the trainees, and in obtaining better community and parental support; (b) a program should be provided for placing and supporting trainees and following them up; (c) a comprehensive support service plan should be worked out by the administration; and (d) each proposal should contain a full report on needs assessment. This document is a verbatim account of the discussions of the group. The documents they worked from are not included. (JD)

locales are described. The sites chosen for these case studies were a Native American reservation, an inner-city school, a school located in a small town in mid-America, and a Mexican-American barrio. (JD)

Journal Announcement: RIESEP75

This three-part report presents the results of an analysis of data collected in the first year of a two-year Teacher Corps study. The study attempts to answer management-oriented questions regarding the development of effective Teacher Corps projects and the assessment of quality and effectiveness of the projects. The report (a) provides an expanded description of program characteristics of the 20 Teacher Corps projects; and (b) reanalyzes the relationship between teacher background, Teacher Corps program, and intern teaching skills using different statistical procedures and variable groupings. The first part of the report presents an overview of the study. The second part describes the (a) Teacher Corps programs, (b) characteristics of Teacher Corps staff, (c) use of competencies in the project, (d) personalization of the program for interns, (e) school-based program for interns, (f) community component, and (g) collaborative decision-making. The third part analyzes data elicited from the study and includes the following: (a) discriminant function analysis, (b) factor analysis of Teacher Corps program characteristics, (c) factor analysis of intern teacher performance characteristics, (d) canonical correlations relating Teacher Corps programs to intern teacher performance, and (e) conclusions. An appendix of tables illustrating the analyzed data is included. (JS)

Document Type: BIBLIOGRAPHY (13:)

Journal Announcement: RIENOV75

This bibliography is comprised of materials gathered for the resource center at the 8th and 9th Cycle National Teacher Corps Conference, 1974. Materials were gathered from the

following sources: (a) The Teacher Education Development Service Resource Center on Competency-Based Teacher Education (CBTE), School of Education, State University of New York at Albany; (b) The Bambi Collection; and (c) the Division of Teacher Education and Certification, New York State Department of Education. The materials have been categorized under four headings: (a) special education teacher training materials, (b) elementary teacher training materials, (c) middle school and secondary teacher training materials, and (d) other source materials for teacher education. Extensive systems of modules have been included under the first three headings, and listed under the university or laboratory responsible for development. Materials referenced in this collection are housed in the Teacher Corps Resource Center at Emporia Kansas State College, and are available for general use. (Author/JS)

Geographic Source: U.S.; Texas

Journal Announcement: RIEJAN79

The University of Houston/Houston Independent School District Teacher Corps project is designed to demonstrate the operation of an alternative school program intended to promote desegregation and to train educational personnel to function effectively in alternative schools in an urban setting. The project demonstrates how coordination of the resources and needs of collaborating agencies--the district, the university, the profession, and the community--can promote success of the individual within an alternative school. The project has seven major goals: to develop and field test a program that puts students and instruction at the center of the decision-making process; involve parents and the community in decision-making; provide multi-cultural, bilingual instructional materials; develop a coordinated preservice/in-service staff development program for personnel at all levels; establish a center for the development of human potential; provide a comprehensive strategy to facilitate operations of alternative schools; and provide a model for disseminating products and processes produced. Language: ENGLISH

Journal Announcement: RIEJAN71

This document reports the Cycle II Teacher Corps Urban Program at the University of Southern California, a 2-year effort to prepare teachers to work effectively in disadvantaged communities of such diverse racial and ethnic groups as Negroes, Mexican Americans, poor whites, Japanese, Koreans, and Samoans. There is brief description of the two phases of the program: 1) academic course work, community field activities, special workshops, demonstrations, and meetings in the preservice phase, and 2) the combination of gradually increasing responsibilities in the local schools with course work in the inservice phase. Program evaluation and the research projects growing out of the program are briefly described. Innovations introduced into the teaching strategies and curriculum at USC to facilitate corpsmen training are described: corpsmen treated as an intact group, block scheduling, structure and sequence of courses, and interrelationship of course work. Also included are lists of institutional changes at USC brought about by the Teacher Corps program including introduction of courses and content new to teacher education. Involvement of corpsmen in developmental trends within the seven participating school districts is discussed in outline form with innovative approaches, institutional changes, and community involvement described on a district-by-district basis. Journal Announcement: RIEMAY74

The Teacher Corps/Peace Corps project in elementary school physical education at Washington State University provided a graduate program which was competency based, field based, and partially individualized. The program attempted to fulfill the organizational goals of the two sponsoring federal agencies (Teacher Corps and Peace Corps). Teacher interns, who had previously earned baccalaureate degrees, completed a 12-month program of three phases: preservice, which stressed preparation for teaching, subject matter, and community needs; in-service, which included teaching in the school districts and graduate course work in teaching, curriculum, learning, development, and methods of research; and postservice, which included thesis proposal approval, additional course work in administration and supervision, and training in how to conduct in-service programs for classroom teachers. Twenty-four of 25 interns completed the program in 1973 and were recommended to the Superintendent of Public Instruction as qualified provisional (initial) teachers of elementary school physical education. Journal Announcement: RIEFEB77

The Youth Advocacy Projects of the Teacher Corps are those that deal with the educational needs and ways of responding to the needs of criminal offenders. The program involves two-year programs for teacher training and utilization. The number and scope of these projects, originally called Corrections Projects, is outlined and illustrated. The six operating projects are presented and analyzed in a comparative fashion that highlights critical areas of the programs: shared goals and objectives, governance and administration, staffing patterns, educational and curricular emphasis. There are changes needed in all facets of education, particularly as it relates to troubled youth. Some critical elements of these changes are examined including: educational content/curriculum; learning and teaching techniques; interdisciplinary curricula and collaborative decision-making; and local

education agencies. The unique concept of the community in the Youth Advocacy Projects is discussed as a support system and in its relationship with the criminal justice system. The final section of the report describes a number of issues related to education and troubled youth and cites some examples where the issues are being dealt with. The issues are: curriculum, teacher training, alternative school structures, integration of human services, and interorganizational cooperation. (JMF)

Several inadequacies exist in the training of those teachers who teach in reservation schools. These teachers often know nothing of the special characteristics of reservation life, of the language and culture of their pupils, or of the best ways to teach children of non-Anglo backgrounds. This absence of knowledge then causes adjustment frustrations for both the teacher and the students. Some suggestions for recruiting and producing better teachers of non-Anglos include (1) retraining existing staff; (2) cooperating with colleges of education to help prospective teachers learn enough of an American Indian culture and language to deal effectively with children of that culture and language; and (3) taking as candidates people who are native to the area, familiar with the language and culture, and accustomed to the isolation and distances involved in living and teaching on a reservation. Additionally, the origin, administration, and organization of the Navajo-Hopi Teacher Corps Program are discussed. A competency based teacher education program is noted as one of the outstanding features of the Teacher Corps Program. It is concluded that with the proper professional preparation of Indian people, they should eventually be controlling their own educational destiny and have full self-determination. (HBC)

This collection of 46 journal articles, compiled to provide readers with a description of all facets of the National Teacher Corps program, is intended to represent the diverse points of view of many recognized leaders in the fields of compensatory, public school, and higher education. The book is designed especially for Teacher Corps interns and team leaders and for public school administrators interested in establishing a Teacher Corps program in their schools. The editors provide brief introductions to each section. Articles in part 1 deal with the authorization, administrative structure, and objectives of the program, which was designed to recruit and train teachers who would work in areas having large concentrations of low-income families or minority groups. Part 2 on the Corp's contribution to change in the structure and content of teacher education programs includes descriptions of some of the innovations introduced into programs to train corpsmen. Articles in part 3 deal with the Corps' impact on classroom instruction procedures; included are representative local program descriptions and discussion of specific innovations designed to provide instruction that is more relevant, more individualized, and more effective with disadvantaged children. Part 4 contains articles on patterns and perspectives for the future. Articles in the appendix provide a sample of editorial comment about the Teacher Corps from trade journals and commercial magazines. (JS)

This evaluation report on the Teacher Corps is divided into three parts. The first part describes the past and present status of the organization, looking at a) origin and history, b) the 1974 amendments, c) current operations, d) staffing and

financial data, e) scope, f) minority recruitment, and g) analysis of past evaluations. The second part assesses Teacher Corps in terms of the following: a) progress toward goals and objectives, b) comparison with other teacher education programs, c) cost effectiveness, d) program flexibility, e) efficient management, and f) comprehensiveness. The third part comprises a list of recommendations. Five appendixes are included which contain a) a legislative history, b) a synopsis of the tenth cycle, c) a listing of evaluations, d) responses to a questionnaire, and e) a listing of special development projects. Journal Announcement: RIEOCT69

This interim report presents operational and evaluational concepts and results and plans of the Teacher Corps from 1966 to 1968 in five sections. Section 1 capsules the objectives of the program: to broaden programs of teacher preparation and to strengthen educational opportunities for disadvantaged youth. The Teacher Corps program is overviewed in the second section with information on the inception and funding of the program; the program's first interns and their problems; the structure of the training programs, including their setting, their involvement in the community, their participants' roles, and their curriculum relevance; and the future role of the Teacher Corps. Section 3 presents results of an evaluation of the first two-year cycle: an examination of the reasons for the high attrition rate of both interns and their instructors, and the results of an evaluative questionnaire (which dealt with characteristics of the respondents, professional relationships, and satisfaction with the program and its design) completed by both interns and their instructors. Conclusions and recommendations for the future which were suggested by the results of the evaluations are presented in section 4, and the problems involved in setting up an overall program evaluation system are presented in section 5, including the development of a detailed Teacher Corps systems model designed to provide a conceptual model for the evaluation system. Document Type: PROJECT DESCRIPTION (141)  
Journal Announcement: RIEMAY75

A Joint Teacher Corps/Career Opportunities Program/State of Alaska project in its fifth year. Cross-Cultural Education Development/Alaska Rural Teacher Training Corps (X-CED/ARTTC) focuses on exploration of the ends desirable to meet the educational needs of the culturally different and development of the processes necessary to achieve them. A microcosm of the broader society, it provides a cohesive environment dealing not only with the delivery of instruction but with cross-cultural dynamics and the politics of educational change. X-CED/ARTTC departs from the historical teacher education program in that: (1) the students are field-based; (2) "team leaders" are university instructors with full faculty status, salaried exclusively from State funds and located permanently in the field; and (3) a new and alternative curriculum (in content, process, means, and locale of delivery) is being created by the faculty who combine their knowledge and talents with their experience from living and working in the clientele's cultural environments. This paper presents an overview of the: (1) program's efforts and (2) plan to develop a curriculum which has unique features and will co-exist with the more conventional university offering. The proposed undergraduate and graduate programs are outlined by areas of study and degree emphasis. (NQ)

Document Type: RESEARCH REPORT (143)  
Journal Announcement: RIENDV77

During the school year 1973-1974 the Division of Elementary Education at the University of Georgia had undergraduate programs involving field work in 13 schools. The schools were divided into three categories: centers for competency based teacher education, field experience centers, and teacher corps centers. These programs required the assignment of teams of professors and students to local elementary schools for work with classroom teachers and pupils. A survey was conducted on the classroom teachers' perceptions of and reactions to the field based programs. This report presents an analysis of the survey results. Response to the survey indicated the following reactions: (1) teachers perceived the field-centered programs to be beneficial and well operated; (2) teachers felt the programs benefited pupils in that greater individualization of learning was possible and that teachers themselves were frequently stimulated by the presence of college personnel; (3) students enjoyed their field-based contacts and experiences; (4) on the whole, classroom teachers felt that student teachers frequently taught well and related well to pupils. Four appendixes included in this report contain sample questionnaires given to teachers for evaluation and tables giving responses to individually observed student teacher behaviors. (JD)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEDEC76

This paper is a summative review of responses received from teachers who participated in Teacher Corps projects during 1975-1976. The survey sought to determine involvement by teachers in Teacher Corps training, planning, evaluation, work-related activities, network, activities, and in decision-making about training events. In addition, teachers were asked to rate individual training events they attended during the year and indicate three things that should be modified to make Teacher Corps projects more effective. The survey elicited 54 responses, most of them indicating that: (1) teachers did not feel parity in decision-making; (2) they did not feel training programs were planned, implemented, or evaluated by them or for them; (3) they confused network and university support; (4) they sought improvement of skills to work with interns and other teachers towards improving teaching skills, curriculum, and use of the school plant; (5) they felt projects were not planned, implemented, or evaluated with them; (6) they reported increased expertise in use of special education, reading, math, and other specific curriculum materials, and techniques in classrooms; (7) some expressed concern about community and parental involvement; and (8) a few were aware of the new demonstration focus in Teacher Corps projects. The stated goals for the nine modules in this elementary math cluster, which is part of a series developed for the Adams State College Teacher Corps program, are that the intern will: (a) understand the scope and sequence of topics in elementary mathematics, (b) be familiar with a wide variety of activities and materials for use in a mathematics laboratory approach, (c) know various alternative approaches to teaching given mathematics topics, (d) utilize methods which convey understanding of concept rather than rote memorization, (e) realize that pupil attitudes toward a subject are as important as aptitude, (f) understand the relationship between mathematics and other elementary school curricula, and (g) know the relevance of prevalent learning theories to the specific area of mathematics. Each module contains a statement of the underlying rationale, the objectives for the module, enabling activities, and evaluation procedures. Module topics include set theory and operations, numbers, numeration systems, addition and subtraction, multiplication and division, geometric concepts, fractions and decimals, measurement, problem solving, and evaluation of mathematics learning. This is one of a series of eight Teacher Education Modules developed by Adams State College Teacher Corps Program. The 11 modules in this social studies sequence for the elementary education student have five goals: a) to enable interns to participate in inductive learning situations, b) to introduce interns to some basic concepts of each of the social science disciplines, c) to survey and analyze a variety of social studies resources, d) to enable interns to participate in discussions of elementary social studies teaching plans and learning activities, and e) to enable interns to select and develop social science activities for students of various interests and abilities. Each module consists of a statement of the objective, enabling activities, and evaluation procedures. The module titles are: a) Basic Social Science Concepts, b) Basic Social Studies Concepts and Sequences of Learning Activities for Children, c) Basic Social Studies Concepts and Materials in the Social Studies Resource Center, d) Social Studies Concept Attainment, e) Field Use of Social Studies Concept Attainment Exercises, f) Planning and Inductive Teaching Episode on Concept Formation, g) Field Use of an Inductive Teaching Episode on Concept Formation, h) Analysis, Use and Adaptation of Resources from the Social Studies Resource Center, i) Field Use of Two Resources from the Social Studies Resource Center, j) Investigation of Two Teaching Strategies, and k) Field Use of a Teaching Strategy and Development of Student Evaluation. Geographic Source: U.S.; District of Columbia

Journal Announcement: RIENOV79

The result of a research conference, the document contains a collection of short studies and implementation experiences of leaders in the field of multiple talent teaching. Contributors represent 12 states: Alabama, Florida, Idaho, Illinois, Iowa, Kentucky, Minnesota, New Hampshire, Texas, Utah, Wisconsin, and Wyoming. Each presentation generally touches on six points: (1) how their program was started and when and how financed; (2) coverage of teachers, schools, districts, etc.; (3) evaluation measures and findings--assessment of success and failures; (4) contributions made to Multiple Talent Teaching; (5) recommendations to those interested in adopting teaching for multiple talents; and (6) prospects and issues ahead. Among the programs considered are Project Impact, Project Implode, Talents Unlimited Project, Project Reach, and Teacher Corps Project. Entries include the following: "New Measures Relevant to Talent-Focused Education" (R. Ellison); "Talents Unlimited in Pre-Service Education" (C. Schlichter); "Eleven Multiple Talent Elementary Schools" (B. Thomas); "A Teacher Corps Project on Multiple Talents" (J. Hainsworth); "Idaho's Awakening to Multiple Talent Teaching" (W. Freeman); "Underlying Bases of Multiple Talent Teaching" (C. Taylor); and "A Theoretical Model for Training of Multiple Talent Teachers" (J. Juntune and L. Worthley). (SBH)

Journal Announcement: RIEMAY75

The role of the Teacher Corps team leader involves not only the training and supervision of corpsmen, but also the facilitation of community involvement and intrateam relations. During the preservice program, the team leader helps to plan the program, initiate the corpsmen, lay the groundwork in the community and local school district, and provide assistance in the self-discovery process of interns. Growth and development of the team is the responsibility of the leader and includes

aspects such as morale, teamwork, and productivity. The leader must facilitate a positive relationship between the team and the neighborhood by helping to establish organizations for cooperative effort. In the supervision of student teachers, the team leader acts as a stabilizing influence, interprets district policy, selects cooperating teachers, and evaluates interns. (HMD)

The first half of this detailed guide on Teacher Corps recruiting, designed for the use of school administrators, presents all procedures necessary for an effective college campus recruiting program. Included are sections on planning the approach; forming a recruiting team of teacher interns; laying out an interesting schedule (with time planning); implementing public relations (such as securing the support of community leaders, making protocol calls on the college placement director and the public relations officer, ordering posters from Teacher Corps Washington, and enlisting the aid of radio, television, and the press); and the final followup. A chronological checklist summarizing these activities is also presented. Appended as the second half of the guide is a detailed description of a Teacher Corps recruitment program which took place in Chicago in 1967. (SM)

Journal Announcement: RIEFES76

This Teacher Corps program at Michigan State University is attempting to improve the quality of preservice teacher education within a competency based framework. The program emphasizes consistent use of instructional design and the instructional processes of assessment, goal setting, determining objectives, developing teaching strategies, and evaluating. During this two-year program, students spend 50 percent of their time in an internship at a Lansing elementary school and 50 percent of their time in completing degree requirements. Additionally, the interns receive field-based bilingual training and are involved in a variety of community based activities. In the spring of 1973, 30 interns were selected for this program from populations which included Mexican-Americans and/or Spanish-speaking, blacks, American Indians, and economically disadvantaged whites. On examining the academic achievement of these interns, it was found that the mean grade point average for these Teacher Corps interns was the same as for the seniors in the College of Education at Michigan State University. Fifty percent of the minority interns had grade point averages equal to or better than the average for the seniors in the College of Education. The

nonminority interns had the highest grade point averages of any of the groups in this comparison. When the interns were grouped by sex, the male interns appeared very similar to the minority interns, while the females closely resembled the nonminority interns. (80)

The field-based masters degree program at Emporia State University was designed to meet the needs of fully employed teachers and supervisors. The curriculum materials and delivery system sought to address the following research-based needs: (1) create an ongoing organizational policy making structure; (2) develop a method of shared decision making at an individualized teacher level. (3) relate the majority of the inservice program to the university graduate credit system; (4) extend preexisting university graduate degree programs into a field-based mode for curriculum development; and (5) engage all participants in an ongoing cyclic process of learning-innovating-implementing-evaluating. Research and development products were adapted and packaged for the inservice instruction as substitutes for the requirements of the regular degree program. Courses focused on needs assessment, developing instructional plans, supervision of instruction, and interpersonal communication. The delivery system was supported by both the university and the local education agency, and a Teacher Corps group helped in bringing about the needed institutional change. (DS)

The major portion of this issue of the Bulletin consists of reports of various aspects of the National Association of Secondary School Principals (NASSP) Project on the Induction of Beginning Teachers, a three-year demonstration program (involving 188 beginning teachers and 37 cooperating teachers in 33 schools in Michigan, Virginia, Missouri, Ohio, and Florida) designed to discover means by which the critical first years can be made better ones in order to reduce the teacher dropout rate. Other papers relating to the professional development of new teachers are also included. Section 1, "That First Year The Way It Is," includes articles describing the first year as seen from the viewpoint of a

teacher educator, a beginning teacher, and school administrators. Section 2 consists of three articles describing new patterns of induction used in a New York State project, in a Hawaii project, and in the Teacher Corps. Section 3, devoted entirely to reports of the NASSP project, includes articles by the director, the assistant director, two beginning teachers, a cooperating teacher, a school-based inservice leader, and two principals. Both articles in Section 4, "Preparation and Beginning," focus on the effects of preservice preparation on the experiences of beginning teachers. (J5)

Journal Announcement: RIEDEC70

This document is a prospectus for a pilot project being developed by Teacher Corps Rural-Migrant, University of Southern California, in cooperation with the Cutler-Drost Unified School District in Tulare County, California. The project aims to "utilize visual literacy to teach English as a second language and to develop other communication skills in educationally handicapped Spanish-speaking Mexican American children of migrant and seasonal farm workers, using the camera as the 'eye of the mind' to bring out self-perception, environmental awareness, and the ability to interact in and relate to, read and write about (in both English and Spanish) the 'world we live in.'" One of the specific objectives is to "show that learner-centered curriculum created by the child with a camera, which allows that child to 'invent' himself and conceptualize about the world he lives in, is a more effective teaching tool than teacher-generated, cognitively devised material which must be taught in a rigidly structured and controlled sequence." A discussion of the author's rationale, the type of activities to be incorporated into this "Visual Literacy" program, evaluation and dissemination, and the hardware to be used, are presented. (See AL 002 444 for a description of the pilot program carried out at the Yettum, California school.) (AMM)

Journal Announcement: RIEJUL81

A change strategy, known as "systematic ad hocism," is based on three assumptions: (1) A concentration on individual teacher concerns as a first step in the change process is justifiable; (2) Encouragement of dialogue among teachers who have taken individual actions leads to collaborative actions and provides bases for organizational change; and (3) Inservice education must be responsive to stated needs, involve both theory and practice, and allow multiple entry and exit points for the teaching staff through multiple delivery

systems. A description is given of adapting this change strategy in a Teacher Corps project and of the project's successes and failures in achieving change. An analysis is given of ideologies of change as they inform theory and practice. It is concluded that fundamental macro educational change has been difficult to achieve because change theory and technology have been historically weak. (J0)

Journal Announcement: CUMREPT

THE PROBLEM OF POVERTY IN THE CITY GHETTO FORMS A COMPLICATED CHAIN OF DISCRIMINATION AND LOST OPPORTUNITIES FOR WHICH ALL AMERICANS PAY. COSTS ARE INCURRED FROM POOR EDUCATION, UNEMPLOYMENT, WASTE OF INDIVIDUAL TALENT, RISING CRIME RATES, MILITARY SERVICE REJECTION RATES, AND OTHER SOCIAL PROBLEMS. THE EDUCATION LINK IN THIS CHAIN IS THE SEGREGATED, INFERIOR SCHOOL. RECENT EFFORTS AIMED AT IMPROVING GHETTO SCHOOLS INCLUDE TITLE I OF THE ELEMENTARY AND SECONDARY EDUCATION ACT AND THE NATIONAL TEACHER CORPS. AT THE NATIONAL LEVEL, THE U.S. OFFICE OF EDUCATION HAS BEEN RESPONSIBLE FOR ABOUT 100 PROGRAMS. MEASURES FOR IMPROVING THE GHETTO SCHOOL AT THE LOCAL LEVEL SHOULD INCLUDE INCREASED FINANCIAL SUPPORT AND SPECIAL SERVICES SUCH AS COUNSELING AND GUIDANCE, SMALL CLASSES, REMEDIAL INSTRUCTION, AND MEDICAL AID. THE OPPORTUNITY FOR AND EXPECTATION OF PERFORMANCE BY DISADVANTAGED CHILDREN MUST BE CREATED TO FACILITATE THIS GOAL, AND CITY SCHOOL SYSTEMS MUST ADOPT POLICIES THAT WILL GUARANTEE THE ASSIGNMENT OF EXPERIENCED AND SPECIALLY TRAINED TEACHERS TO GHETTO SCHOOLS. A MORE DRASTIC MEASURE WHICH WILL BE NEEDED IS THE ALTERATION OF POLITICAL AND SOCIAL BOUNDARIES. RACIAL AND SOCIOECONOMIC SEGREGATION COULD THEN BE BROKEN BY THE CHOICE OF NEW SCHOOL SITES AND BY THE DEVELOPMENT OF CENTRALIZED SCHOOL COMPLEXES. THIS PAPER WAS DELIVERED BEFORE THE ANNUAL CIVIL ASSEMBLY OF THE CITY CLUB OF CHICAGO, CHICAGO BAR ASSOCIATION, CHICAGO, ILLINOIS, MAY 13, 1966. (MM)

Journal Announcement: RIEJUN72

The purposes of the project were to facilitate, coordinate, describe, and evaluate the activities of seven fifth-cycle Teacher Corps programs as they developed and implemented--to the extent possible--competency-based teacher education programs utilizing the ten National Center for Educational Research and Development teacher education models as a resource. Consequently, the activities carried out by the project were intended to facilitate the goals of each of the seven programs by providing for greater communication among them, by coordinating resource utilization so as to maximize productivity, by relieving programs of certain evaluation responsibilities so that their resources might be directed toward instructional aspects, and by providing certain resources which otherwise might not have been available. An examination of program development efforts suggests that the processes involved were both complex and difficult. Lack of time and money appear to be chief among the many problems encountered. Despite those problems, progress seems to be rather substantial when viewed in the light of realistic expectations. Evidence suggests that interns felt much more positively toward competency-based teacher education, the competency-based aspects of their program, and their total program than they did toward more traditional approaches to teacher education. Journal Announcement: RIEMAY79

This document describes a program designed to strengthen the educational opportunities of juvenile delinquents and/or youth offenders in the Dallas Independent School District (DISD) and the Dallas County Juvenile Department Detention Center. The project's goals, expected outcomes and activities are outlined. Major project components outlined include: (1) staff

development programs, (2) community based programs, (3) interagency-interaction model, (4) exceptional child component, (5) multicultural component, (6) teacher-intern component, (7) leadership training program, (8) adoption and institutionalization, (9) graduate credit for training activities, and (10) the Teacher Corps Project Center. Major processes described include aspects of the organizational structure, the recruitment, selection and organization of the Teacher Corp Team, and plans of action for the instructional program. Also presented are proposed strategies for the management, evaluation, dissemination, and institutional adoption of such a program. A list of references is provided. (Author/EB)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEJUL76

The purpose of this project was to produce materials that would foster favorable teacher attitudes toward the philosophy behind mastery learning. One other purpose was to help teachers acquire the skills needed to use mastery learning in their classrooms and to determine the effects on pupils when mastery learning techniques were used. Forty-four teachers and interns from four Indianapolis schools were equally divided into groups according to race and sex. The material developed was a Mastery Teaching module which included an introduction and six sections. A slide/tape accompanied each of the seven parts. An accompanying manual contained objectives, practice exercises, and feedback. The manual also included self-tests with answers for each section, a pre-test on prerequisites, and a project section. Pre- and post-treatment measures were administered to the teachers and interns on both cognitive and affective variables. The results indicated that teachers and interns acquired the mastery teaching skills and used them to the degree that pupils perceived differences in their teaching. Teacher attitudes toward the mastery teaching philosophy were generally positive, and students' attitudes and achievement were favorably altered because of their teachers' use of mastery teaching. This handbook, which represents the thinking of cooperating teachers on a number of issues important to all Teacher Corps programs, provides an overview of the area of concern of cooperating teachers in working with interns. Part 1 describes the role of the cooperating teacher and provides guidelines for a smooth induction of interns into the classroom and for the evaluation of the teaching experience. Part 2 presents some guidelines for cooperating teachers and team leaders, including some for practical application and some that point out to the interns areas to observe in the classroom. Part 3, "Nuggets of Wisdom" offers some suggestions concerning the physical organization of the class and negative versus positive comments in the classroom. Part 4 defines the team leader's role in relation to Teacher Corps and presents some specific duties of the team leader. Some hypothetical situations, presented for consideration, and a list of reminders conclude this handbook. (PD)

Document Type: EVALUATIVE REPORT (142); RESEARCH REPORT (143)

Geographic Source: U.S.; Illinois

Journal Announcement: RIEOCT79

This report documents the successful coordination of two agencies, the Teacher Corps of the Office of Education (Department of Health, Education, and Welfare) and the Office of Juvenile Justice and Delinquency Prevention of the Law Enforcement Assistance Administration (Department of Justice), in the establishment of a joint program, the School Crime Intervention Component (Activity II) of the Teacher Corps Youth Advocacy Program. The report traces the historical

development of the agreement and examines the program in order to make recommendations for future interagency collaboration. The methodology includes comparisons of the needs of the two parent agencies, use of a transactional model for analyzing the program's functioning, and examination of the organizational subculture of the program through the use of interviews, observations, and other information gathering methods. Document Type: RESEARCH REPORT (143); CONFERENCE PAPER (150)

Geographic Source: U.S.; Illinois

Journal Announcement: RIEOCT79

The purpose of this investigation was to document the development, operation, and impact of an interagency agreement between two federal departments cooperating to create the School Crime Intervention Program, Activity I. The agencies involved were the U.S. Office of Education and the Law Enforcement Assistance Administration. Data were collected through interviews with key informants in the agencies and project directors, examinations of files, and nonparticipant observation of program-related events. Organizational theories and anthropological models were used to analyze the largely ethnographic data. Findings indicate that both agencies had common broad social goals in working with troubled youth. Necessary elements in collaboration referred to as the "transactional model" facilitated the program design and operation of the agreement. These included field-based readiness for the program, power and authority of the chief administrators, a transactional style of organizational management, frequent contacts between the key actors, and power and viability of the Student Initiated Activities Model. A number of other specific findings and recommendations resulted from the study. Recommendations included the formation of an interagency committee, encouragement of replications of the program, and clearer definition of the project director's role. Researchers concluded that the success of the interagency agreement was documented. (Author/JM)

Journal Announcement: RIEAUG79

This report describes the planning processes used to develop a five-year teacher corps project for inservice teacher improvement. The planning model was designed to provide collaboration with all persons who would be involved in the project. The input from district, university, and community consultants was used as well as from teachers representing all elementary and secondary grade levels. A discussion of the philosophy and rationale of the program is presented, and the goals and objectives are outlined. A planning matrix is outlined that provides for collaborative input on the following areas of the program: (1) teacher corps guidelines, (2) needs assessment; (3) goals and objectives; (4) delivery system; (5) governance (policy); (6) management; (7) evaluation; (8) demonstration; and (9) institutional adoption. A copy of the questionnaire used to determine teachers' concerns and perceived needs is appended. An over-all evaluation of the planning process is included. (JD)

Journal Announcement: RIEMAY75

This competency-based teacher education component emphasizes a systematic process that starts with the identification of a behavior unique to a learner and that ends with the identification of the cultural factors that cause the behavior. A sample module, diagnosing cultural behaviors related to the concept of family, is presented with an outline of two enabling activities, dealing with authority and authority figures and with compliments and reprimands. Four basic steps are suggested to complete the module: (a) identify the behavior; (b) identify all possible sources of information; (c) select the means of gathering information; then complete the investigation; and (d) make a decision based

on the information. Background information concerning the historical and intellectual presence of Mexican Americans is presented. (MJM)

The Corpsmember Training Institute (CMTI) is a three-week living and learning experience for all new Teacher Corps Interns and Team Leaders. The first CMTI planning process is documented in this report. The first chapter serves as an overview of the planning process. It provides a brief description of the sequence of planning events, and discusses the concerns and issues which were at the heart of the CMTI planning effort. The second chapter describes the initial steps in planning the CMTI. Chapters Three and Four, respectively, describe the intermediate and the final planning stages. Chapter Five reports on the final Institute Review and Advisory Panel meeting, and Chapter Six provides a conclusion and recommendations for the planning of future institutes. (Author/JD)

NATIONAL TEACHER CORPS INTERNS ENROLLED IN A PROGRAM FOR TEACHING THE DISADVANTAGED (TYPICAL NUMBER OF 35 TO 40 PERSONS) WERE RATED BY FACULTY MEMBERS AT EIGHT UNIVERSITIES ON (1) ACADEMIC PERFORMANCE, (2) TEACHING AND FIELD PERFORMANCE, (3) RELATIONSHIP WITH THE DISADVANTAGED, (4) PERSONAL STABILITY AND STRENGTH, (5) INTERPERSONAL EFFECTIVENESS, AND (6) COMMITMENT AND GENERAL PROMISE. DIFFERENCES IN RATINGS WERE EXAMINED AMONG INTERNS WHO VARIED IN DURATION AND TYPE OF PREVIOUS POVERTY EXPERIENCE. THAT IS, (1) NO POVERTY AREA EXPERIENCE, (2) LESS THAN 1 YEAR OF

EXPERIENCE IN A POVERTY AREA, (3) AT LEAST 1 YEAR OF HAVING WORKED IN A POVERTY AREA OR LIVED IN A POVERTY AREA, OR BOTH LIVED AND WORKED IN POVERTY AREAS. ALL RAW SCORES WERE CONVERTED TO STANDARD SCORES WITHIN EACH PROGRAM. THE GROUP WITH LESS THAN 1 YEAR OF POVERTY AREA EXPERIENCE SCORED SIGNIFICANTLY HIGHER THAN EACH OF THE OTHER GROUPS. THE AUTHORS HYPOTHESIZED THAT THOSE WITH LESS THAN A YEAR OF POVERTY EXPERIENCE WERE LARGELY MIDDLE-CLASS, WELL-EDUCATED COLLEGE GRADUATES WHO HAVE SUFFICIENT MOTIVATION, IDEALISM, AND INITIATIVE TO SPEND A LONG VACATION IN VOLUNTEER POVERTY WORK AND THAT SINCE RATINGS WERE OF PERFORMANCE IN THE PROGRAM RATHER THAN ON THE JOB, THIS GROUP WOULD BE EXPECTED TO DO BETTER. NEVERTHELESS, THEY FELT THAT IT IS STILL POSSIBLE THAT ONE OF THE OTHER GROUPS WOULD BE MORE EFFECTIVE IN ACTUAL WORK WITH THE DISADVANTAGED BECAUSE OF THEIR GREATER EXPERIENCE WITH SUCH PERSONS. Journal Announcement: RIESEP77

Graduates of 20 Sixth Cycle Teacher Corps Projects were compared with other young teachers in terms of their teaching behaviors and effectiveness with low income/minority children. Teacher Corps graduates were superior on many of the skills and attitudes desired by teacher Corps projects, including developing ethnically relevant curricula, using community resources in teaching, and initiating contact with parents. Teacher Corps graduates facilitated greater self-concept development in pupils as assessed by both the self-concept scale and the classroom interaction guide. However, there was no difference between the two groups of teachers in terms of facilitating pupil reading gain. (Author)

Document Type: CONFERENCE PROCEEDINGS (021); PROJECT DESCRIPTION (141)

Geographic Source: U.S.; New Hampshire

Journal Announcement: RIESEP80

The document presents information on planning, teaching, and evaluating multicultural education programs. Although most of the examples are based on current multicultural projects in New England, the authors believe that the material presented can also be useful to classroom teachers in other regions. The document contains two components. The first component describes a conference at which teachers exchanged ideas on multicultural education, identified multicultural education resources, and developed ideas for relating multicultural concepts to social studies classroom activities. In addition, evaluation data regarding conference activities and objectives is included. The second component presents materials, conference papers, objectives, and resources to help teachers set up a multicultural education program. Information is presented on approaches to multicultural education, the role of multicultural education in the curriculum, multicultural curriculum dimensions for teacher and inservice education, regional multicultural resources (mostly in New England) and activity ideas for various grade levels including analyzing reading assignments and television programs, participating in field trips, and comparing values held by different ethnic groups. EDRS Price - MF01/PC02 Plus Postage.

Language: ENGLISH

Journal Announcement: RIEFEB71

Four papers comprised this symposium report, the purpose of which was to explicate the effectiveness of the Florida Parent Education Follow Through Model, which has as its focus economically deprived, educationally divergent children. This program involves the use of paraprofessionals (called parent educators) who are indigenous to the neighborhoods which they serve: (1) to act as classroom aides; (2) to make frequent home visits; (3) to teach mothers learning tasks which they, in turn, teach their children; and (4) to serve as communication link between home and school. The first paper discussed a multi-dimensioned Home Environment Review (HER) which is a new instrument for measuring those aspects of the home environment which are amenable to change and are school related. Plans for its use include: (1) evaluating the Florida Parent Education Program (FPEP); and (2) developing tasks to be brought into the home by parent educators. The other papers discuss the FPEP's impact on the school, the community and the sponsoring university. One of the important findings is the need for a basic change in teacher education. The final paper elaborates on the University of Florida's innovative Teacher Corps Program, a two year Masters program aimed at preparing teachers for educationally divergent children. (TL)

Document Type: PROJECT DESCRIPTION (141); EVALUATIVE REPORT (142)

Geographic Source: U.S.; New Hampshire

Journal Announcement: RIENOV80

The purpose of this study was to investigate the effects of training in supervision on the performance of cooperating teachers and field supervisors. A one day workshop based upon a model of supervision developed by Boyan and Copeland (1978) was presented to 32 cooperating teachers and field supervisors. The four stages of the model included a pre-observational conference between supervisor and teacher, observation by the supervisor of the teacher's class, analysis and identification of change by the supervisor, and a post-observational conference between the supervisor and teacher. The study addressed the major areas of: 1) the immediate reaction of participants to the model, components, and the need for further training in supervision; 2) the impact that the training had on their performance; 3) the needs, expectations, and personal dynamics of cooperating teachers; and 4) the practices of cooperating teachers.

Conclusions and recommendations for a model on theory of supervision, practice and program, and research and evaluation are presented. (Author/CJ)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEOCT77

Reviewing recent research on efforts to improve the quality of public schooling in the United States, this paper focuses on evidence suggesting that negative by-products often accompany innovations and, moreover, that innovators have tended to disregard their capacity for leaving schools in worse condition than they found them. The analysis concentrates primarily on efforts to make an impact through external funding--the project approach to innovation. Several of the illustrations are drawn from the experiences of the Teacher Corps and its numerous projects, including one that involved the author. The change process is divided into three stages: (1) the planning stage, during which proposals for projects are conceived, developed, and funded; (2) the implementation stage, when the proposed impact is expected to be made; and (3) the evaluation stage, when the degree to which an impact has been made is assessed. The three stages overlap at certain points and are not regarded as mutually exclusive or temporally discrete. Recommendations for avoiding negative by-products are made, and consideration is given to the value of incremental change. (Author/MLF)

Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; Texas

Journal Announcement: RIEFEB82

Attempting to document the manner in which interventions are planned and executed in public schools, this case study presents a two-year Teacher Corps Project in which the faculty members of a junior high school were required to change their approach to discipline using Glasser's Reality Therapy Approach. Employing the Concerns-Based Adoption Model, in which participants' behaviors are classified by interventions, stages of concern, and levels of use, the study concludes that different interventions are required at different parts in the change process. Further, the study suggests that change facilitators should identify various innovation configurations prior to implementation of change; that it is important to set criteria for what constitutes use of the innovation; that there is a need to determine how much support is required for successful implementation to occur; that change facilitators need to make sure administrators have adequate training and understanding of the change process; and that it is important to choose a model for decision-making that fits the requirements and goals of the project. (JEH)

Institutional change in schools of education is discussed here with special regard for field-based teacher education programs and inservice education, both of which are viewed as potential growth areas in schools with declining enrollments. The first article deals with the challenge that inservice education offers, both in terms of growth opportunities and the demand for new skills from teacher educators. The reform of the teacher educator is the subject of the second article, which offers a grand design for collaborative problem-solving. The third article examines the history of inservice practices, resources for field programs, field experiences and professional career development, planning for college participation, opportunities and potential pitfalls, and systematic planning and design. Organizational constraints to institutionalizing change in secondary schools and institutions of higher education is reviewed in the fourth article, and the fifth focuses on building readiness for change at the University of Oregon. The final article offers an organizational analysis of the involvement of universities in inservice education, stressing the economic, political, and sociological constraints involved. References are provided. (DS)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEFEB77

As part of the Inservice Teacher Education (ISTE) Concepts Study, more than 2,000 books, periodicals, and unpublished papers written after 1957 were consulted and reviewed. The purpose of the review was the identification of the data needs and major issues in inservice education. The literature was identified, read, and categorized; and substantive areas were identified and selected for this report. These include: the varieties of inservice education; collaborative arrangements; value orientations toward inservice education; definitions of inservice education; and other issues, a selection of emergent questions and issues. Each of these is discussed. (JMF)

The management system in use at the Murray State University Teacher Corps Project is described. The system uses management by objectives and the demonstration approach, and encourages managers to focus on, the development and demonstration of ideas, processes, and structures. The system's operating concepts of time management and human resources utilization and of the identification and demonstration of significant ideas and activities for use by other educational professionals and lay people are illustrated. Copies of the instruments distributed to each of the project sites to aid participants in translating management concepts into concrete activities are included. (Author/LH)

Document Type: PROJECT DESCRIPTION (141); POSITION PAPER (120)

Geographic Source: U.S.; Alabama

Journal Announcement: RIEFEB82

An example of the application of microcomputers to education, described in this paper, indicates the possibilities for their widespread use. Forecasters claim that microcomputers will be acquired by more and more individuals and families in the 1980s. This implies that schools will also make greater use of microcomputers, in computer-assisted instruction, school management, and training in computer literacy. At present, few teacher education programs are training their students in computer usage. A Teacher Corps project at the University of South Alabama uses microcomputers both to train its students in computers and to help manage the project. As a time-bound program, the project must meet its objectives before its funding ends. Data on staff activities, entered into a microcomputer by staff members, allows the managers to monitor progress toward project objectives, analyze where staff effort is going, and decide which objectives need more staff time. Because of the project, the university and the local school system have broadened or have investigated further their use of microcomputers in both instruction and management. (RW)

Journal Announcement: RI2SEP74

This monograph, divided into three sections, describes minicourses, outlines their possible application, presents reports from three teacher training institutions that demonstrated minicourses in conjunction with their Teacher Corps programs, and suggests guidelines for minicourse utilization in teacher education. The first section discusses the following: (a) characteristics of the minicourse as a source of self-directed; competency-based teacher education; (b) a minicourse training model; (c) skills presented in minicourses; (d) supporting experiences; and (e) applications in teacher training. The second section presents an overview of the Minicourse Utilization Centers at three institutions followed by reports from Teacher Corps project members at these institutions. These reports discuss utilization design, problems and recommendations, and further applications. The final section offers 11 guidelines for utilizing minicourses, including discussions of: (a) program size; (b) selection of minicourses to be offered; (c) pretraining evaluation to determine course participation; (d) progression through courses; (e) orientation of trainees; (f) provision of training sites; (g) distribution of course materials; (h) time for minicourse work; (i) troubleshooting and guidance; (j) evaluation; and (k) monitoring performance. A PROJECT TO DETERMINE THE EFFECTIVENESS OF NATIONAL TEACHER CORPS (NTC) INTERNS IN THE ATLANTA, GEORGIA SCHOOL SYSTEM WAS DESIGNED TO FIND OUT IF THE INTERNS HAD HELPED THE DISADVANTAGED PUPILS IN THEIR CLASSES TO RAISE ACHIEVEMENT LEVELS AND IMPROVE SELF-CONCEPTS. SPECIFIC RESEARCH OBJECTIVES WERE (1) TO ASSESS THE PROGRESS IN VERBAL MENTAL AGE ATTAINED BY NTC PUPILS AS MEASURED BY A PRE- AND POSTTEST ON THE PEABODY PICTURE VOCABULARY TEST AND THE GOODENOUGH DRAW-A-MAN TEST, (2) TO COMPARE THE SELF-CONCEPTS OF THE NTC PUPILS WITH THOSE OF A SIMILAR GROUP OF PUPILS BY USING A TEACHER CHECK LIST DEVELOPED BY THE EVALUATION COMMITTEE, (3) TO COMPARE PUPIL READINESS FOR FIRST GRADE WITH THAT OF KINDERGARTEN PUPILS A YEAR EARLIER (WHO HAD NOT HAD INTERNS) BY USING THE METROPOLITAN READING READINESS TEST, FORM A, AND (4) TO COMPARE TEACHER ATTITUDES OF NTC INTERNS WITH THOSE OF OTHER BEGINNING TEACHERS OF TITLE I AND NON-TITLE I SCHOOLS BY MEANS OF THE MINNESOTA ATTITUDE INVENTORY. STATISTICAL TREATMENT OF THE DATA COLLECTED ON A VARIETY OF MEASURES SHOWED THAT THE NTC INTERNS POSITIVELY AFFECTED THE CHILDREN'S LANGUAGE AND SELF-CONCEPT DEVELOPMENT AND IMPROVED THEIR READINESS FOR FIRST GRADE. THE NTC INTERNS EXHIBITED ATTITUDES ASSOCIATED WITH EFFECTIVE TEACHING MORE OFTEN AND TO A GREATER EXTENT THAN DID REGULAR TEACHERS. (MS)

**The Need for Conceptualization in Program Development.**

Stripling, Kaye; Weber, Wilford A.

Jun 1974 7p.; Paper presented at the annual meeting of the National Teacher Corps (Washington, D.C., June 1974)

EDRS Price - MF01/PC01 Plus Postage.

Language: ENGLISH

Document Type: CONFERENCE PAPER (150)

Journal Announcement: RIEMAR76

There is a need for conceptualization in the development of a Teacher Corps program and the instructional system which is part of that program. Program conceptualization should be viewed as an important process which permeates program design efforts. Conceptualization of program purposes and objectives provides a base for the design, development, and operation of program activities, evaluation, and management. The greater the specificity and explicitness of that conceptualization, the greater the likelihood of program success. Instructional system conceptualization involves the specification of competencies and the specification of instructional characteristics. The specification of competencies should be built on conceptualized role description; that is, specified in terms of the roles persons assume during the operation of the program, and/or in terms of those roles persons are expected to play upon the completion of the program. The specification of the instructional system's operational characteristics in advance of program operation is crucial, for it is this process which sets the "rules of the game". They should be detailed prior to the initiation of training activities. Conceptualization of the program and of the instructional system is a prerequisite to maximizing program effectiveness. (RC)

Journal Announcement: CUMREPT

THIS SPEECH EXAMINES THE STATE OF SECONDARY EDUCATION IN THE UNITED STATES, AND NOTES THAT THERE IS A NEED FOR GREATER CONCERN FOR THE EDUCATION OF STUDENTS WHO ARE NOT COLLEGE BOUND. THE NEW FEDERAL PROGRAMS FOR EDUCATION CAN ENABLE SCHOOL SYSTEMS TO REMEDIATE THE EDUCATIONAL DEFICITS OF DISADVANTAGED SECONDARY SCHOOL STUDENTS. EDUCATION FOR THE DISADVANTAGED CAN ALSO BE HELPED BY EDUCATORS' EFFORTS TO INCREASE THEIR UNDERSTANDING OF SLUM YOUTH AND TO REVERSE CURRENT PREFERENTIAL TEACHER PLACEMENT POLICIES WHICH ASSIGN THE LEAST EXPERIENCED TEACHERS TO THE MORE DIFFICULT SCHOOLS. SPECIALIZED TRAINING FOR PROSPECTIVE TEACHERS OF THE DISADVANTAGED IS FELT TO BE IMPORTANT. ALSO, JOB TRAINING AND VOCATIONAL EDUCATION ARE IMPERATIVE FOR THOSE STUDENTS WHO DO NOT AND WILL NOT HAVE A HIGH SCHOOL DIPLOMA. VOCATIONAL

EDUCATION CURRICULUMS OUGHT TO BE RENOVATED TO CREATE AN ATTITUDE OF RESPECT FOR VOCATIONAL TRAINING. IT IS FELT, MOREOVER, THAT THE IDEAL IN SECONDARY EDUCATION IS THE COMPREHENSIVE HIGH SCHOOL. THIS PAPER IS AN ADDRESS PRESENTED BEFORE THE ANNUAL CONVENTION OF THE NATIONAL ASSOCIATION OF SECONDARY SCHOOL PRINCIPALS (DALLAS, TEXAS, MARCH 1, 1967). (NH)

Journal Announcement: RIEAUG69

Half of this report is an overview of national issues and trends expected to affect the future complexion of education programs, particularly those related to staffing problems in eight areas: early childhood education, new emphasis in elementary and secondary education, teaching the children of the poor, teaching handicapped children, vocational education, student counseling, school administration, and higher education. The second half of the report focuses on the federal interest in education manpower needs through the Education Professions Development Act (EPDA). It contains sections discussing the diversity of teacher functions, differentiated staffing, the Teacher Corps, school-university partnerships, and teacher certification. Included also are brief descriptions of each of the priorities set by the Office of Education for the allocation of EDPA funds in fiscal 1970: training teacher trainers, career opportunities program, teachers of basic subjects, leadership development in education, early childhood personnel, teachers for the handicapped, vocational and technical education personnel, teacher improvement through curriculum development, strengthening school administration, support personnel, and more effective school personnel utilization. The purpose of this manual is to outline a case approach to administrator training based on a study (presented in a companion volume) of four Teacher Corps projects and the role of principals in those projects. It begins with a discussion of the usefulness of a "case vignette" approach to training and then presents 21 case vignettes illustrating important issues emerging from the case studies. The purpose of these case vignettes is to emphasize the need for understandings, skills, and the resolution of certain issues by highlighting key events likely to occur in the early years of a project. Discussion questions and a diagnostic instrument to use in individual or group training sessions are included. The manual also presents a discussion of guidelines training and a selection of suggested resources to which trainers, project staff, or principals themselves might turn for materials that can be used in training sessions. Journal Announcement: RIEJUN81

To understand better the role a principal plays in the success or failure of a federal program, this study was conducted of the role of principals in Teacher Corps projects. An introductory chapter discusses the changing role of the principal in general and the role of the principal in change efforts and then more specifically discusses the emergent role of principals in Teacher Corps projects. Next comes a

synthesis of case studies of four Teacher Corps projects and an analysis of factors affecting the role of principals in the projects, with implications for policy makers, project managers, and principals themselves. One appendix briefly describes the methodology for conducting the case studies and a cross-site analysis. The other consists of two commentary chapters written by experts in the fields of educational administration and school change who reviewed the case studies and synthesis chapter and, drawing on their own disciplinary perspective and experience, made recommendations for program improvement and training. A companion volume applies the lessons learned from this study to training materials for administrator inservice education. (Author/JM)

Document Type: EVALUATIVE REPORT (142)

Geographic Source: U.S.; California

Journal Announcement: RIEMAR81

This paper reports the summative evaluation of a four-year  
Teacher Corps project at a California elementary school. The  
archives of the project and interviews with over 60 of the

persons involved are the basis of the report. The  
investigation focused on an examination of the school's formal  
and informal systems. The study looks at (1) the social system  
of the school; (2) the psychological orientations of the  
teachers; (3) the utilization of training; (4) changes in the  
behavior of the teachers; and (5) relationships between  
teacher behavior, learning styles, and achievement. Taken  
together, these studies provide a picture of the problems of  
tailoring staff development efforts to the particular  
configurations of the school and teacher. (Author/MLF)

Since 1978 federal legislation and regulations have required that Teacher Corps projects involve the participation of elected councils of at least seven members representative of the parents and other residents of the communities within the boundaries of the project schools. This booklet provides materials intended to assist in the organization and conduct of the necessary council elections. Part I presents practical alternative solutions to problems that frequently occur in such aspects of elections as solicitation of candidates, determination of eligibility, establishment of voting districts, selection of an election procedure, and processing of ballots. Part II contains sample materials suitable for use in Teacher Corps-related community council elections, including notices, voter lists, voter guides, and ballots. Part III is a checklist for use in preparing for and conducting elections. (PGD)

Journal Announcement: RIEMAY75

This module is designed to give Teacher Corps corpsmen firsthand knowledge and competency in identifying all aspects of the community which are basic to interpreting the educational needs and concerns of troubled youth. The terminal objective is to identify the community's (a) demographic, cultural, and ecological characteristics; (b) associational patterns; (c) patterns of influence; and (d) sociopsychological factors. This information is then related to planning a productive learning environment for troubled youth. The participant reads; views slides; takes tours and walks; and attends a series of seminars, workshops, and rap sessions in order to gather information regarding the community in which he is serving his internship; he then plans a design for his community profile. The process is flowcharted, and the following areas are detailed: (a) steps for completing the module, (b) preassessment, (c) enabling activities, (d) postevaluation, and (e) remediation. (JCW)

**The True Purposes of Multicultural Education.**

Brown, Carlton E.  
New England Teacher Corps Network, Portsmouth, N.H.  
.1976 9p.

EDRS Price - MF01/PC01 Plus Postage.

Language: English

Document Type: POSITION PAPER (120); REVIEW LITERATURE (070)

Geographic Source: U.S.; New Hampshire

Journal Announcement: RIEAUG80

Purposes for multicultural education in recent educational literature are reviewed and a transformist conception of multicultural education is expounded. A review of educational literature published since 1968 indicates that several objectives have been touted as core purposes for multicultural education. These include developing student understanding and appreciation of various racial and ethnic groups, correcting misconceptions of the cultures and histories of ethnic groups, removing racial and ethnic prejudices, and incorporating existing ethnic cultures into the mainstream of American socioeconomic and political life. Because the author believes that none of these is the true purpose of multicultural education, he proposes a transformist conception of multicultural education--defined as underlying attitudes which

encourage schools to change so that the educational process will be more meaningful and useful to the poor and disenfranchised and will provide students with a sense of social and political power. Major assumptions of this transformist conception are that American society perpetuates economic, political, and social inequalities by race and social class and that public education promotes this inequality. Suggestions for changing public education along lines dictated by a transformist conception include reorganizing the curriculum and structure so that members of poor and nonwhite communities are provided with access to social influence and power redistribution. Language: ENGLISH

Journal Announcement: RIEJUL74

This paper both corrects and expands on the work of Corwin and his colleagues in "Reform and Organizational Survival: The Teacher Corps as an Instrument in Educational Change." It is the author's contention that, by analysing variables that are common to all 10 programs discussed in that study and ignoring those that are unique to the individual programs, only part of the picture from which an assessment of the programs can be made could have been presented. He then presents a brief condensation of those unique variables of the Lansing Teacher Corps that are independent of the common variables as identified by Corwin. These variables are grouped according to program, personnel, and administrative variables. Personnel variables listed are a) the ethnic composition of interns, b) the socioethnic composition of interns, c) the age composition of interns, d) the value and cultural differences between teacher and intern, and the attitude of cooperating teachers. Program variables are a) the undergraduate nature of the program, b) the need for teachers with bilingual skills, and c) community and school district involvement in Teacher Corps programs. Michigan State's concern for competency-based teacher education is included as an administrative variable. (JA)

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEJAN78

The papers in this volume emerge from the experience of Fordham University and the Angelo Patri Intermediate School through their mutual efforts to establish an open-space school in a highly complex, low-income neighborhood of inner-city New York. The papers prepare the reader to understand the process involved in developing programs under conditions of organizational change and the implementation of new programs and concepts of education. Close coordination with the Union was maintained, and the papers reflect an understanding of working with the teachers' organization as a collaborative partner. The following topics are covered by the study: (1) collaborating in inservice education: a teacher's perspective; (2) changing and emerging roles in education: the role of the superintendent; (3) a Dean's reappraisal of the university's role in inservice education; (4) school community interaction; (5) open education as an alternative; (6) designing inservice education; (7) adapting college courses for on-site teacher education; (8) professional staff needs assessment; (9) school design and the educational process; (10) an inservice "lifeshop"; (11) students' role in quality education; (12) the school-based trainer of teachers; (13) curriculum development: its goals and strategies; (14) incentives for teachers in inservice education; (15) the supervisor as school instructional leader; (16) teacher evaluation-a teacher unionist's view; (17) the urban mission of the university. (JD)

are described and illustrated in this document are (1) a supervised internship providing for immediate immersion in classroom teaching on a half-day basis under the close supervision of a team of experienced teachers, coordinated by a carefully selected master teacher; (2) a series of after-school seminars involving outside experts from various fields and offering credit toward the master of arts in teaching degree; and (3) direct involvement in the community through after-school, volunteer projects and interaction with the Community Development Center. The reality-based seminars investigate the following areas: (1) sociology of urban life (emphasizing school-community relationships); (2) psychological disciplines (emphasizing various roles of the inner-city teacher and the behavior of urban youngsters); (3) methods of teaching (emphasizing approaches which permit a great deal of student-teacher interaction); and (4) curriculum materials (emphasizing continuing creation by the interns of their own units and lessons, examples of which are included). Included also is an organizational chart depicting roles and relationships of the variety of people involved in the program. (JES)

Document Type: RESEARCH REPORT (143)

Journal Announcement: RIEAUG77

The preliminary results of four of six research methodologies used to evaluate a professional development curriculum in an urban school are described and reported. The paper begins with a discussion of the social systems model underlying the project, a brief summary of the transactional evaluation scheme used to direct research efforts, a description of the inservice teacher education component of the program, and then an explanation and preliminary report of the findings of each of the four methodologies. Each methodology is analyzed in terms of the data it yields, its generation of research questions, and its contribution to general and specific bodies of knowledge. The four methodologies covered in order are: (1) Quantitative and Psychometric Analysis, (2) Ethnographic Analysis, (3) Historical, and (4) Managerial Analysis. The two methodologies not reported here, but used in the project, are the Comparative Case Study approach and the Classroom Learning Environments Studies. The paper concludes with a discussion of the cost benefits of the four methodologies under consideration. Finally, the implications for assessing complex programs in other areas are presented. Language: English

Document Type: PROJECT DESCRIPTION (141); RESEARCH REPORT (143)

Geographic Source: U.S.; Washington

Journal Announcement: RIEMAR82

Government: State

This report outlines the roles and responsibilities, pertaining to the improvement and coordination of statewide teacher inservice, of the Superintendent of Public Instruction (SPI) in the state of Washington. After a field-based research study was conducted, a system was devised by which the SPI can improve coordination of staff development programs and resources among the major agencies involved: SPI, educational service districts, institutions of higher education, teacher centers, Teacher Corps, local school districts, private schools, and professional organizations. The system is designed to: (1) facilitate the sharing of limited staff development resources; (2) establish a statewide communication and information channel; (3) link providers and users of staff development in program planning; (4) provide training for those responsible for staff development; (5) improve the quality of needs assessments, evaluation, and implementation; and (6) gather information for use in statewide planning, policy making, goal identification, and priority setting. This voluntary communication and support system would consist of local level collaborative units (Staff Development Compacts) linked by a formal communication channel, the Staff Development Compact Council. This council would also provide specific support and training activities. Supporting components of the system are a state level interagency advisory committee, committee to coordinate staff development activities for the system, and a coordinator serving as liaison with the SPI. In this report, an analysis is given of current coordination activities, factors which impede or facilitate coordination, and a proposed three-year implementation process. Recommendations are made for generating a sound system of coordination. (JD)

Journal Announcement: RIEDEC81

Eight agencies (including three teacher centers and three Teacher Corps programs) in the state of Washington, concerned with inservice teacher education, formed a network to test and to explore avenues of cooperation and coordination. Since the emphasis was on collaboration between Teacher Corps and teacher centers, the first step was to examine the areas of potential conflict and cooperation. The major areas examined were: the purposes and terms of grants, governance, plans of operation, and major thrusts. The network committee, with representatives from Teacher Corps projects, teacher centers, the Washington Education Association, and the state education agency, concentrated on the areas of common interests, while respecting each others' differences. The network's success can be attributed to the sharing of information, resources, practices, materials, and consultants. Among the accomplishments of the network during the first year were: establishing the bylaws and governance of the committee; setting realistic goals; establishing a continuous communications process; and identifying and exchanging resources on successful staff development practices. The purpose of networking was to share information, technical assistance, and solutions to problems. A flexible outline of strategies and of support is often characteristic of networks, and staff members must be able to foster collaboration under a variety of circumstances. (FG)

This resource guide, based on ideas drawn from Teachers Corps projects, contains suggestions for organizing and conducting inservice programs on reading in the content areas. The first section of the guide provides guidance from the literature concerning decisions to be made in establishing an inservice program, including suggestions from experienced inservice leaders and descriptions of models of workable programs. The second section discusses inservice activities, such as ways of creating awareness and examining beliefs, exploring the demands of the reading assignments, investigating skills in content area reading, developing vocabulary instructional techniques, and developing instructional techniques in comprehension. Resources for the inservice leader are provided in the third section, specifically resources for structuring and conducting inservice sessions, for information about reading and teaching strategies in the content areas, and for information about learning-to-learn skills. The final section outlines issues and perspectives, including discussions of teaching reading in the content areas, other considerations for classroom instruction, and inservice planning. A selected bibliography is included. (FL)

Language: ENGLISH

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEOCT77

The work-study team concept has evolved from a Teacher Corps grant to Stanford School of Education and Herbert Hoover Junior High School, San Jose, California, and represents the basic vehicle of the project for collaboration between the university and school in providing more effective inservice education, school improvement, and field-based research. Eight work-study teams were organized: four concerned with the subject areas of mathematics, language arts, social studies, and physical education; four "innovation teams" dealt with multicultural education, bilingual education, teaching in open space, and community involvement. Four of the teams were relatively successful, two remained functioning through the year, and two effectively disbanded before the end of the year for lack of support or interest. Two of the more serious difficulties were goal definition, and trust and leadership. Positive experience suggested that collaboration is possible if: (1) decisions affecting the school community are made by the school-staff team members; (2) time is invested in developing good team relations; (3) team members are willing to assume new roles; and (4) concrete, immediate problems provide the initial focus for collaboration. Limitations of the concept involve (1) the length of time needed to develop trust and credibility, (2) individual differences in team member capacities for dealing with competing goals, (3) the capability for stimulating unperceived staff development needs, and (4) practical limitations involving participant involvement, incentives, physical distances, scheduling etc. Guidelines for determining the need for and organizing effective teams and for ensuring their continuing effectiveness have been appended. Journal Announcement: RIEMAY75

This paper presents three different educational models for inner-city children. The first, the Learning by Doing Program, a preschool and kindergarten summer program at Saint Mark's Parish, proposes to meet the needs of inner-city children by developing cognitive growth necessary for further learning experiences and by preparing them to enter structured classrooms in the present school system. Outlined are activities to (a) develop physical and sensory readiness, (b) develop reading readiness, (c) develop social readiness, and (d) develop self-concept and pride in inner-city youngsters (such as a unit of Black History). Included also is the minimum achievement to be realized from these activities, suggested materials to be used, organization structure and recruitment, and methods of evaluation. The second, The Development and Study of a Reading Center in an Inner City Elementary School, focuses on an experimental study of fourth and fifth graders with reading problems who are administered the Silverroll Classroom Reading Inventory. Statistical data are included. The third, Together in Kansas City, Missouri, is a model program designed to bring together children from inner and outer Kansas City areas to enhance their academic, personal, and social experiences, and to demonstrate the value of cultural pluralism as an educational resource. Goals, objectives, organization plan, and evaluation questions are outlined. (JCW)

The planning, implementation, and evaluation of Teacher

Corps projects are all oriented toward the encouragement of community-based education, involving the evolution of an interactive relationship between educational institutions and the local community for purposes of program development and direction. Some aspects of the community-based education concept are explored in this compilation of three papers, the first in an intended series. The first paper, by Conrad Powell and Larry Winecoff, describes the origins and characteristics of community-based education. The basic concepts and methods needed to energize community-based education in the future are discussed by Roland Goddu, and in the third paper Eva Schindler-Rainman comments on societal trends affecting community-based education and on effective means for making educational efforts successful. Journal Announcement: RIENDV81

Human service agencies, including public schools and institutions of higher education, are playing an increasingly dominant role in the lives of all citizens, especially the poor. The increasingly bureaucratic nature of these agencies has been contributing to the continued powerlessness and dependence of their growing clientele. The perception by human service agencies of their role in the community can be refocused on assisting the poor in developing self-help and self-direction programs through community-based education. Three illustrations of ways in which these agencies can become involved in community-based education are presented in this document, including a parenting program involving several agencies, a high school-based inter-agency council aimed at solving needs of high school-aged community residents, and an urban cooperative extension program modeled on rural agricultural extension programs. Language: ENGLISH

Document Type: MISCELLANEDUS (999)

Journal Announcement: RIEAPR75

In 1971 six rural, eastern Kansas School Districts collaborated with Kansas State Teachers College in the development of portal schools. Four-year goals and first-year objectives were established and a steering committee comprised of representatives of each significant role group was organized to transact business associated with the development of portal schools. After a year and a half, it became apparent that the attempt at collaborative decision making was unsuccessful. Therefore, a new model was developed based on the assumptions that: (a) the controllers of resources must be willing to share their power by responding to inputs from role groups, (b) the purpose and limits of the consortium must be clearly defined and agreed to by all parties, (c) a process for input and shared decision making must be clearly defined, (d) commitment to the endeavor by member institutions is directly related to the amount of its resources invested, and (e) two decision-making bodies, one consisting of resource controllers and the other consisting of role group representatives, must be organized. The implementation of this model involved the formation of a Council of Administrators (resource controllers) and Master Steering Committee (role group representatives), development of an agreement document, specification of the decision-making process, and an increase in the amount of resources invested by each institution. Significant and encouraging developments have resulted from implementation of the new model. (HMD)

Journal Announcement: RIEJAN71

This set of documents includes the original proposal (December, 1968) for the 2-year Toledo Teacher Corps program and a summary description of the program half way through its first year (November 1969). The program summary describes it as an undergraduate training program designed to improve the educational process in urban poverty areas and to improve the training program for elementary teachers in such areas through

focus on human sensitivity, cooperative efforts of the university and the school system and community, and instructional organization within the school. Narrative sections outline the major phases of the program: 1) summer preservice program of community activities and concurrent seminar; 2) inservice program during the junior and senior school years including a team teaching internship in local schools and concurrent seminars on societal factors, instructional organization, contemporary learning-teaching process, educational technology, and research; 3) interim summer program of liberal arts requirements; and 4) community involvement activities throughout the 2 years leading to a bachelor of arts degree in education. Included in the proposal is material on certification and degree requirements, staff and team leader selection and training, evaluation procedures, the four participating schools, etc. (JS)

Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; Massachusetts

Journal Announcement: RIEMAR80

Fragmentation of elementary school teachers' time and attention is an almost universal problem. Frequent coming and going of children to and from the classroom for legitimate purposes disrupts and distracts the teacher and other students. Children receiving special education services frequently leave the classroom for half-hour periods, thus missing a portion of instruction received by classmates. Administrative interruptions, too wide a span of ability in a single class, and lack of administrative support also create a sense of frustration for the teacher. The results of a comprehensive questionnaire on this topic are reported in this study. Suggestions are made for possible options for classroom teachers, support teachers, and administrators for improving this situation. (JD)

Geographic Source: U.S.; Pennsylvania

Journal Announcement: RIEJUL81

Criticism of the field of teacher education should be constructive from those within the field. Given the rich background of experimentation, research, and substantive ideas in education, teacher educators should take the initiative for improving the profession rather than have legislative or policy mandates imposed upon them. Developments in the 1960's and 1970's, such as the curriculum reform movement, microteaching, the Teacher Corps, the Education Professions Development Act, competency based teaching, and PL 94-142, should serve as a prelude for redesigning teacher education programs in the 1980's. An autonomous two-year program of professional post-baccalaureate studies has been proposed. The undergraduate courses for prospective teachers would also be revamped under this plan, the results of which would be greater depth and enrichment in content areas for secondary school teachers and comprehensiveness for elementary school teachers. All prospective teachers would study exceptionality, educational psychology, measurement and evaluation, curriculum, and school and community relationships. The second year of the two-year program would involve full time study and clinical experience in a public school district as a training laboratory. Examples of courses and semesters are given. (FG)

Geographic Source: U.S.; Minnesota

Journal Announcement: RIEJAN82

Nine discussions identify needs and concerns of beginning teachers and call for a more concerted effort to ensure a smooth transition from preservice teacher to a working professional. An historical perspective on beginning teachers'

problems and attempted solutions is provided in the first chapter. An interview with four beginning teachers follows, with illustrations of the types of problems encountered in such areas as discipline, time management, and lack of feedback. Other essays suggest new entrance modes for teacher orientation, a stronger relationship between theory and practice in schools of education, and increased research on the initial teaching experience. Two chapters offer models from the perspectives of the school principal and the college dean, one for the encouragement of school-college cooperation, and the other proposing a concept of teacher education based on schools as centers of inquiry. The final essay presents a general framework for induction and continuing teacher education, incorporating several of the elements that were introduced in the earlier chapters. (FG)

Language: ENGLISH

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEJUL76

This teacher education model is designed to assist inservice and preservice teachers in attaining their professional goals in a continuing program of self-improvement. The model is personalized in that it calls for the determination of competencies and objectives based on the individual teacher's philosophy of education. It is also individualized since the learning that takes place is self-paced. Finally, the model is flexible and can be used with preservice or inservice programs. There are five phases of the model: (1) philosophy, (2) rationale, (3) objectives, (4) mastery of competencies, and (5) evaluation. The five phases are guided by a collaborative section which serves to familiarize participants with influences that must be considered in developing one's philosophy, objectives, and competencies (e.g., that the teacher must function within a school district, dealing with students and parents). After recognizing the influencing factors and dealing with them in a collaborative manner, the participant is ready to begin the five phases of the model. (Appended are diagrams and an explanation of phases 3-5 of the model as well as information concerning the need for a resource center when implementing the model.) (Author/RC)

Document Type: PROJECT DESCRIPTION (141)

Journal Announcement: RIEJUL77

The Excellence in Elementary Education (EEE) program provides a number of interdependent experiences aimed at optimizing the quality and availability of professional growth opportunities for persons specializing in elementary education: prospective teachers, inservice teachers, prospective teacher educators, and inservice teacher educators. The program is predicated upon the notion that outcomes will be most constructive when diverse sets of educators work together and share decision-making on how teaching and learning for any particular group of students might be improved. Recommendations are offered for the development and implementation of future EEE type programs. An essay on a first year's experience in an EEE program is attached. (MM)

**Training Change Agents in the Public School Context.**

Edgar, Donald E.; Clear, Delbert K.

1970 13p.; Paper presented at annual meeting, AERA, Minneapolis, 1970

EDRS Price - MF01/PC01 Plus Postage.

Language: ENGLISH

Journal Announcement: RIESEP70

An evaluation of two programs--the federally sponsored Teacher Corps and the Ford Training and Placement Program established at the University of Chicago in 1967-68--whose goal is to train teachers capable of acting as change agents in the schools indicates that they have not been successful in reaching this goal, and that school context is perhaps more important for the teacher than the type of training received. Both of these programs trained students in teams, and the Ford Program placed the teams intact into inner-city schools for their teaching experience. When program graduates' scores on tests designed to measure desire for autonomy and sense of power were compared with scores of graduates of traditional programs in Chicago and Milwaukee, no significant difference was found. However, when both groups were divided into teachers in black inner-city schools, white inner-city schools, and white suburban schools, there was a significant difference in scores, with the black inner-city school teachers' being the lowest. These results seem to indicate that special teacher training programs in themselves are not

enough and that resistance to change from other school personnel may be a factor. (RT)

**Training Classroom Teachers for Supervision.**

Waterman, Floyd T.; Brilhart, Barbara  
.1969 83p.

EDRS Price-- MF01/PC04 Plus Postage.

Language: ENGLISH

Journal Announcement: RIEDCT69

These symposium papers, the first two by Floyd Waterman and the last two by Barbara Brilhart, are an outgrowth of experience in directing the Teacher Corps internship program at the University of Nebraska at Omaha. No. 1 describes "The Role of the Teacher Corps Team Leader," who is a member of the local school faculty receiving continuous training and instruction from corps and university staffs during his two-year service and training period as supervisor of intern teachers. The eight roles discussed include fostering community work, counseling and advising, teaching and demonstration, and analyzing teaching acts. No. 2, "Concepts and Procedures for Training Teacher Corps Leaders," presents recommendations for a 4-phase program: selection and initial orientation, a national team leader institute, preservice orientation in local projects, and continuous inservice followup. No. 3 describes the "Development of an Attitude Scale for Evaluating Teacher Corps Team Leaders" and includes a copy of the scale with procedures for scoring. No. 4 presents "A Schema for Supervision of Teacher Corps Interns" which lists 17 problems identified within the intern's three major roles (as teacher, school-community liaison, staff/team member) with suggested activities and behaviors designed to guide him through each of four growth phases for each problem. Suggestions for use of the schema, which is also presented in chart form, are included. (JS)

Language: English

Document Type: POSITION PAPER (120); PROJECT DESCRIPTION (141)

Geographic Source: U.S.; Tennessee

Journal Announcement: RIEMAY81

In an effort to examine the effectiveness of commercially produced parent education programs, a child management and communication class given for Memphis, Tennessee, inner city parents, is evaluated in this paper. The program, sponsored by the Mid-South Teacher Corps Project, utilized two models: (1) Becker's 1971 "Parents Are Teachers: A Child Management Program," which is devoted to behavior management techniques and has been used extensively with low socioeconomic status parents; and (2) Dinkmeyer's and McKay's 1976 "Systematic Training for Effective Parenting: STEP," a model that is based on Rudolph Dreikur's philosophy of child training, emphasizes sequential development of communication skills, and has been used with mostly middle class parents. Due to what the authors perceive to be mistakes on the part of the trainers, the initial enrollment of twenty-five parents decreased to only four by the third session. One problem identified is that initial sessions were not sufficiently directed toward parents' specific concerns. The strictly sequenced approach of the Becker program model was found to be only marginally useful. Even greater difficulties were encountered in using the second model. Recommendations are offered for adapting these two models for use with low socioeconomic status parents and for enhancing the effectiveness of parenting programs in general. It is concluded that "pre-packaged" parenting programs present so many problems that it is more practical for trainers to design their own program to fit a given situation. (GC)

Journal Announcement: RIEMAY72

These guides are process and product of a continuing effort to design a training program for Teacher Corps team leaders. As a process, they represent one phase in the delineation of a training program. As a product, they are drawn from

observations of team leaders in action in 10 cities, a survey of all Teacher Corps leaders and directors, and the collected position papers of persons expert at one or another of the necessary competencies. These guides can be used by directors of individual Teacher Corps projects, along with other study products, as resources in their training programs. The format centers around (1) competencies needed by a team leader, (2) objectives for a training program to create identified competencies, (3) interim objectives related to the general competency objectives, (4) specific behaviors, (5) materials that could be utilized, and (6) recommendations concerning the time limits for the mastering of each interim objective. Document Type: CONFERENCE PAPER (150); PROJECT DESCRIPTION (141)

Geographic Source: U.S.; Ohio

Journal Announcement: RIEJUN80

An action research model of program planning and inservice teacher education is presented. The model systematically includes three groups of participants--teachers and paraprofessionals, parents and members of the community, and university and administrative personnel, and is called the "triangulation" model. Inherent in the design is the potential for providing continuous feedback and input, from each of the three groups, thus producing a source of information for data-based decision-making. The model is used as a planning vehicle for a federally funded Teacher Corps project jointly operated by the Akron Public schools, the Akron community, and Kent State University. (Author/LH)

Geographic Source: U.S.; District of Columbia

Journal Announcement: RIINDV81

Two papers by experienced Teacher Corps project personnel describing techniques and approaches used in the development of community-based education are presented in this document. The first paper, by Elaine P. Witty and Yvonne B. Miller, explores methods for identifying educational needs perceived by the community, including group discussions, interviews, surveys, and participation in meetings of community organizations. The paper also comments on integration of community experience and school learning in terms of educational activities, program content, and program goals. The second paper, by Alan Brown, identifies six reasons for citizen participation in education, details five approaches to assessing community educational needs, and itemizes twelve kinds of experiential learning activities that could be included in a community-based program. Journal Announcement: RIEAUG81

This report presents a review conducted by a multinational panel on educational policy in the United States. The report concentrates on compensatory programs in elementary and secondary education, with an emphasis on Title I programs. Topics covered include: (1) recent trends in American education; (2) the philosophy, operational design, and evaluation of Federal programs for the disadvantaged; (3) problems of program articulation; (4) the impact of compensatory education at the school level; (5) students' preparation for and transition to working life; and (6) the Federal role in educational funding. Also included is a record of a 1979 conference held to review the above mentioned issues. (APM)

Document Type: RESEARCH REPORT (143)

Geographic Source: U.S.; Florida

Journal Announcement: RIEJUN79

This report focuses on the role of universities in teacher education centers in the state of Florida as well as on some of the issues and impacts related to that role. Research makes it clear that universities, almost entirely through colleges of education, have contributed substantially to the improvement of inservice education. Several factors have combined, however, to limit both that contribution and the potential role of colleges of education in Florida's teacher education centers. These factors include: (1) the focus on inservice education; (2) the weakness in collaborative relationships; (3) the lack of Teacher Education Center (TEC) program development in the universities; (4) policy instability; (5) shortage of resources; (6) the larger university system; and (7) the tenuous development of university organization for TEC activity. The institutionalization of TEC roles would help consolidate TEC goals as part of the university mission and lessen anxieties about the role of universities in teacher education centers. (OS)

Journal Announcement: RIEAUG80

Intended to aid schools, colleges, and departments of education in the implementation of inservice teacher education programs or in the expansion of existing programs, this monograph presents current research findings on the role of the university in teacher inservice education. It outlines a step-by-step process for making such programs an integral part of the university's purpose and suggests that greater

involvement can be effected by considering the problem as one of institutional change rather than merely as a question of faculty development. (Author/LH)

**Value Changes in Black and White University Interns.**

Sikula, John P.; And Others

Toledo Univ., Ohio.

Apr 1974 17p.; Paper presented at the annual meeting American Educational Research Association (Chicago, Illinois, April 15-19, 1974)

EDRS Price - MF01/PC01 Plus Postage.

Language: ENGLISH

Journal Announcement: RIEAUG74

Forty University of Toledo Teacher Corps interns (23 black and 17 white) were asked to respond to a Rokeach Value Survey on the first day of regular classes, at the end of the year, and at the end of the program. The objective was to examine what significant value changes, if any, took place during the program. Results are assessed according to racial groups rather than individuals. Results of the first survey show that the black interns were more concerned with cleanliness, independence, politeness, and self-control than were white interns. White interns were more concerned with honesty and salvation than blacks. Results of the second survey show that the groups differed significantly only in their rankings on the value, "Clean." Survey data at the end of the program indicate that blacks and whites demonstrated fewer significant differences in their values. The author suggests that experiential influences rather than racial ones may be dominant in affecting value formation and, hence, attitudes and behavior. (RWP)

This module is designed to provide practice in observing the verbal interaction in a group and to provide an opportunity to participate in a discussion group and receive feedback. Specific activities include the formation of a group of 16-20 people and participation in three exercises; the fishbowl, the fishbowl and reversed roles, and group discussion. Each activity emphasizes the verbal interactions taking place in groups. (MJM)

**Visual Literacy: A Child-Centered Reading Program.**

Heffernan-Cabrera, Patricia; And Others

.24 Oct 1970 13p.; Paper presented at the San Diego Foreign Language Teachers Conference, October 24, 1970

EDRS Price - MF01/PC01 Plus Postage.

Language: ENGLISH

Journal Announcement: RIESEP71

The underlying theory of the Teacher Corps Rural-Migrant programs in visual literacy is developed in this paper. The primary objective of teaching communication skills to non-native speakers of English through the use of motion picture cameras is detailed in discussion of how visual literacy motivates students and improves curriculum development. The types of activities incorporated into an educational experiment at the Yettum School indicate the interrelatedness between the traditional communication skills and the more innovative approach to the development of those skills through film. Elements of the program described include: (1) visual vistas--single framing, (2) multiple-frame experiences, (3) slide presentations, (4) motion pictures, (5) visual-verbal textbooks, (6) field trips, and (7) selecting a subject. This resource book, which provides a sampling of programs developed by the Youth Advocacy Projects of the Teacher Corps on behalf of troubled youth, is organized in three major sections. Section I presents outlines, resources, and critiques of staff development courses, organized according to target youth group(s) and by subject area. Section II describes model interventions in process at each project, grouped according to their focus on: (1) inservice/staff development; (2) program development that directly affects troubled youth; and (3) community involvement. Section III presents case studies of four model programs with descriptions of their setting, intervention strategies, and evaluations of overall program effectiveness. (Author/HLM)

REPRT (143)

Geographic Source: U.S.; Texas

Journal Announcement: RIEMAY80

The final report of an extensive national study of migrant students' educational needs, this document reviews the literature, describes specific migrant education programs, and summarizes the findings of two surveys: a preliminary survey conducted in California, Texas, and Florida and a nationwide survey. Data from the national survey of administrators, teachers, migrant parents and students, and personnel in state education agencies and institutions of higher education are used to answer six major research questions: (1) What are the educational needs of migrant students? (2) What are the necessary elements of educational programs which will meet these needs? (3) What are the teachers' roles in such programs? (4) What are the training needs of prospective teachers? (5) What training models are needed to meet these needs? (6) What modifications of Teacher Corps regulations should be recommended to encourage the development of such models? Discussion of the findings includes the extent of migrant student needs, the interaction of migrancy with low-income and minority group status, and concerns and implications in the affective domain. Innovative teacher education models are suggested for Teacher Corps consideration. Appendices contain survey forms, a comprehensive directory of migrant education projects in the U.S., and a bibliography of over 700 entries. (Author/JH)

**Journal Announcement: RIEAUG81**

The Institute for Responsive Education (IRE) is a private, nonprofit organization involved in research, policy analysis, assistance to local sites, and development of a national information clearinghouse and network for citizen groups. IRE recommends an approach to community based education that encourages citizen participation in decision-making and active program involvement. IRE lends on-site assistance to school-community councils by sharing the ideas of other successful groups, and by recommending appropriate written materials for lay participants. In addition, IRE assists local groups in the process of defining their needs, issues, and agendas for action. Policy recommendation based on documented research in the area of citizen participation has resulted in the dissemination of publications that seek to increase policy coordination among various levels of government and promote effective school decision-making. The IRE library and information service has assembled advisory council packets on a variety of topics designed to assist local school councils in developing new policies, practices, and alternatives. (JEH).
